# California Drug and Alcohol Treatment Assessment (CALDATA), 1991-1993

*California Department of Alcohol and Drug Programs*

Codebook

# Terms of Use

The terms of use for this study can be found at:

**Methodology**

Please refer to the *California Drug and Alcohol Treatment Assessment (CALDATA) Methodology Report* for a complete discussion of the survey methodology.  The report is available for download as part of the documentation for this data collection.

**SAMHDA Data Cleaning and Processing**

Several steps were taken in order to prepare the CALDATA file for public release through the Substance

Abuse and Mental Health Data Archive (SAMHDA).  These steps included:

1. Checking for wild codes.

2. Checking for data consistency (e.g., making sure that codes for age-related and timeframe questions were within the range specified in the question).

3. Checking for undocumented codes.

4. Determining which variables could pose confidentiality issues and determining the best way to handle each potential risk.  Variables were considered both individually and in conjunction with other potentially identifying variables.

For the first three steps, data processors worked with the Principal Investigators to obtain value labels (e.g., for undocumented and wild codes) and confirm information in the documentation (e.g., for apparent inconsistencies).

Step four, determining confidentiality risks, involved looking individually at the variables that could present a risk and then examining those variables in conjunction with other variables.  An overriding goal in cleaning and editing the files was to both protect confidentiality and preserve variables as reported to the extent possible in order to provide the greatest analytic utility and to allow researchers to group values as necessary for comparability to other surveys.  Variable types examined and changed due to confidentiality concerns are discussed below.

**Date of birth:**  Date of birth was deleted from the public use data file; age at admission was also on the file and was preserved.

**Exact dates for events of public record**:   Exact dates for events of public record (e.g., marriages, divorces, and arrests) were replaced with a categorized age at the time of the event computed from the dates of birth and event.

**Detailed arrest variables:**  Detailed arrest variables were collapsed into summary flag variables (e.g., property offenses, etc).

**HIV and AIDS:**  Several HIV and AIDS questions (individually with low Ns) were combined into a single flag variable for each condition.

**Admission and discharge dates:** Exact admission and discharge dates for treatment segments were replaced with computed length of stay variables.

**Verbatim responses:** Verbatim responses to open-ended questions were dropped from the file

**Administrative variables:** Interview times and other variables related to questionnaire administration were deleted from the file.

**Other variables:** Other variables were examined in light of any risk to confidentiality but not changed due to the geographic and other identifying variables being removed from the file and other potentially identifying variables, such as date of birth being removed or recoded. "Program type" (modality) was examined and left alone because it is critical to the intent of the study and because other potentially identifying variables were removed or recoded. Remaining data items were related to subjective questions or approximate. These were not considered to pose risks to confidentiality and were left unchanged.

## Contents of Public Use File

The CALDATA public use file is provided in ASCII rectangular format with SAS and SPSS data definition statements.

| Part # | Part Name | Number of Observations | Number of Variables | LRECL |
|--------|-----------|------------------------|---------------------|-------|
| 1 | Questionnaire and Participant Abstraction Record | 1,826 | 1,205 | 2,551 |

## User Responsibility

Users are reminded that the data are to be used solely for statistical analysis and reporting of aggregated information and not for investigation of specific individuals or organizations.

## Processor Notes

1.      Users are advised that the data are most appropriately analyzed by modality.
2.      PADJ_WTD should be used as the default sampling weight for analyses.

**FREQUENCIES**

## IDENTIFICATION AND SURVEY ADMINISTRATION

---

**CASEID**                 **CASE IDENTIFICATION NUMBER**

## LENGTH OF STAY

---

**LOS**                    **LENGTH OF STAY IN TREATMENT (DAYS)**

Computed from admission and discharge dates.

```
Min    =     0            Mean     =    111.216
Max    = 2,033            Std Dev  =    199.181
Median =    52            Variance = 39,672.900
```

(Based on 1,608 valid cases)

Data type: numeric
Missing-data code: -9
Columns: 5-8

---

**DQ1LOS**                **SEG 2 (SAMPLE EPISODE) LENGTH OF STAY (MONTHS)**

Computed from Segment 2 admission and discharge dates.

```
Min    =   0              Mean     =    6.203
Max    = 154              Std Dev  =   13.145
Median =   2              Variance = 172.797
```

(Based on 1,826 valid cases)

Data type: numeric
Missing-data code: -9
Columns: 542-544

---

**DQ2LOS       SEG 1 (12 MOS PRIOR TO SAMPLE EPISODE) LENGTH OF STAY (MONTHS)**

---

Computed from Segment 1 admission and discharge dates.

**MQ3LOS**                    **SEG 3 LENGTH OF STAY (MONTHS)**

---

Computed from Segment 3 (MQ3) admission and discharge dates:

If the methadone maintenance treatment is 18 months or
longer, this segment covers the 12 months prior to the
interview month, including the interview month as the 12th
month: (1) enter the start and current months below. (2) draw
a line through all the months in segment in row a and write
segment 3 above the line. (3) draw a line that outlines all
the calendar months that comprise segment 3.

**PARTICIPANT QUESTIONNAIRE**

**Section A: Calendar**

| DQA4 | EVER MARRIED |
|------|--------------|

The first questions are about whether you've been married,
widowed, separated or divorced, or if you've lived with
someone in a marriage-like relationship.  First, have you
ever been married?

```
   PCT    PCT      N  VALUE  LABEL
 VALID    ALL
 60.6   60.4  1,103      1  YES
 39.4   39.3    717      2  NO
         0.3      6     -9  UNKNOWN/NOT MENTIONED/MISSING
 -----  -----  -----
 100.0  100.0  1,826 cases
```

Data type: numeric
Missing-data code: -9
Columns: 549-550

| DQA4A | EVER LIVE WITH SOMEONE |
|-------|------------------------|

Have you ever lived with someone in a marriage-like
relationship?

```
   PCT    PCT      N  VALUE  LABEL
 VALID    ALL
 70.8   27.7    505      1  YES
 29.2   11.4    208      2  NO

**DA_10**             **PROBATION, DETENTION, PAROLE**

---

The next questions are about being under supervision by the
court, the sheriff, or the department of corrections, that
is, prison, jail, probation, detention, or parole.

During (START MONTH SEGMENT ...2 months prior to tx
episode), were you on probation, detention, parole, (in
prison), or in jail including California Youth Authority
Supervision or Facility for more than one day?

---

**DB3_AGE**            **AGE ON DAY OF INTERVIEW, CATEGORIZED**

---

This is a derived variable.  ICPSR staff calculated the Age at Interview by dividing the total number of days between the interview and the respondent's self reported birth date by 365.25.  The date variables were then removed from the file to protect confidentiality.

**DK7**                      **AGREEMENT WITH COUNSELOR FOR CHANGE**

---

Next I'm going to ask about staff persons that you usually
saw for counseling or treatment at (PROGRAM) during (MONTHS).
Think about the staff person that you talked to the most:  In
general, how much did you and that person agree about things
you might need to change in your life in order to stay drug
free or alcohol free, such as changing the place you lived,
changing your friends, going back to school or getting a new
job?  Would you say you agreed ...

```

**SAMPLE WEIGHT VARIABLES**

**PADJ_WTD**          **POTTHOFF-ADJUSTED VERSION OF ADJ_WTD**

Potthoff-adjusted version of ADJ_WTD. This variable should be used as the default sampling weight for analyses.

1,826 cases (Range of valid codes: 0.0758-3.2915)

Data type: numeric
Decimals: 4
Missing-data code: -9.0000
Columns: 2546-2551

**PADJ_WT**          **POTTHOFF-ADJUSTED VERSION OF ADJ_WT**

Potthoff-adjusted version of ADJ_WT.

1,826 cases (Range of valid codes: 0.1330-3.0774)

Data type: numeric
Decimals: 4
Missing-data code: -9.0000
Columns: 2540-2545

**PWT123**          **POTTHOFF-ADJUSTED VERSION OF WT123**

Potthoff-adjusted version of WT123

1,826 cases (Range of valid codes: 0.1964-2.9008)

Data type: numeric
Decimals: 4
Missing-data code: -9.0000
Columns: 2534-2539

---

**ADJ_WTD**          **SAMPLING WT ADJ FOR NONRESPONSE AND FOR FRAME DUPLICATES**

---

    This variable is the sampling weight adjusted both for
    non-response and for frame duplicates.

    1,826 cases (Range of valid codes: 3.5545-488.6992)

    Data type: numeric
    Decimals: 4
    Missing-data code: -9.0000
    Columns: 2432-2439

---

**ADJ_WT**          **SAMPLING WT ADJ FOR PROVIDER/PARTICIPANT LEVEL NONRESPONSE**

---

    This variable is the sampling weight adjusted for
    provider-level and participant-level nonresponse.

    1,826 cases (Range of valid codes: 7.1089-488.6992)

    Data type: numeric
    Decimals: 4
    Missing-data code: -9.0000
    Columns: 2416-2423

---

**WT123**          **SAMPLING WT--INVERSE OF PROB OF SELECTION ACROSS 3 STAGES**

---

    This variable is the inverse of the product of the
    probabilities of selection in sampling stages 1, 2, and 3.

    1,826 cases (Range of valid codes: 4.7348-140.5189)

    Data type: numeric
    Decimals: 4
    Missing-data code: -9.0000
    Columns: 2408-2415
