## **Acknowledgements**

This data file was prepared for the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS), by Synectics for Management Decisions, Inc. (Synectics), Arlington, Virginia. Data collection was performed by Mathematica Policy Research (Mathematica), Princeton, New Jersey.

## **Terms of Use**

These data are distributed under the following terms of use. By continuing past this page, you signify your agreement to comply with the requirements as stated below:

## **Privacy of Study Respondents**

Any intentional identification of a study respondent (whether an individual or an organization) or unauthorized disclosure of identifiable information violates the pledge given to the providers of the information. Disclosure of identifiable information may also be punishable under federal law. Therefore, users of data agree:

- To use these datasets solely for research or statistical purposes and not for reidentification of specific study respondents.
- To make no use of the identity of any study respondents discovered inadvertently and to report any such discovery to SAMHSA ([SAMHSA\\_support@smdi.com](mailto:SAMHSA_support@smdi.com)).

## **Public Domain Notice**

All material appearing in this report is in the public domain and may be reproduced or copied without permission from SAMHSA. Citation of the source is appreciated. However, this publication may not be reproduced or distributed for a fee without the specific, written authorization of the Office of Communications, SAMHSA, U.S. Department of Health and Human Services.

## **Data Citation**

Data users agree to reference the following citation in any of the publications that use these public use data.

Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS): 2013. Data on Substance Abuse Treatment Facilities. Behavioral Health Services Information System, Rockville, MD: Substance Abuse and Mental Health Services Administration, 2015.

Authors of publications that use these data are required to send citations of their published works to SAMHSA for inclusion in a database of related publications ([SAMHSA\\_support@smdi.com](mailto:SAMHSA_support@smdi.com))

## **Disclaimer**

Data users acknowledge that SAMHSA and SMDI (Synectics) will bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

## **Violations**

If SAMHSA or SMDI determines that this “Terms of Use” agreement has been violated, then possible sanctions could include:

- Report of the violation to the Research Integrity Officer, Institutional Review Board, or Human Subjects Review Committee of the user's institution.
- If the confidentiality of human subjects has been violated, then report of the violation may be made to the Federal Office for Human Research Protections.
- Report of the violation of federal law to the United States Attorney General for possible prosecution.
- Court awarded payments of damages to any individual(s)/organization(s) harmed by the breach of confidential data.

## DESCRIPTION OF THE NATIONAL SURVEY OF SUBSTANCE ABUSE TREATMENT SERVICES (N-SSATS)

The 2012 National Survey of Substance Abuse Treatment Services (N-SSATS) was conducted between March and November 2012, with a reference date of March 30, 2012. It is the 35th in a series of national surveys begun in the 1970s. The surveys were designed to collect data on the location, characteristics, and use of alcohol and drug abuse treatment facilities and services throughout the 50 States, the District of Columbia, and other U.S. jurisdictions.<sup>1</sup> The Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services, plans and directs N-SSATS.

N-SSATS is designed to collect information from all facilities<sup>2</sup> in the United States, both public and private, that provide substance abuse treatment. N-SSATS provides the mechanism for quantifying the dynamic character and composition of the U.S. substance abuse treatment delivery system. N-SSATS collects multipurpose data that can be used to:

- Assist SAMHSA and State and local governments in assessing the nature and extent of services provided in State-supported and other substance abuse treatment facilities and in forecasting substance abuse treatment resource requirements;
- Update SAMHSA's Inventory of Behavioral Health Services (I-BHS), which was until recently called the Inventory of Substance Abuse Treatment Services (I-SATS), and which includes all known drug and alcohol abuse treatment facilities;
- Analyze substance abuse treatment services trends and conduct comparative analyses for the nation, regions, and States;
- Generate the *National Directory of Drug and Alcohol Abuse Treatment Programs*, a compendium of facilities approved by State substance abuse agencies for the provision of substance abuse treatment; and
- Update the information in SAMHSA's Behavioral Health Treatment Facility Locator, a searchable database of facilities approved by State substance abuse agencies for the provision of substance abuse treatment. The Treatment Facility Locator is available on the Internet at:

<http://findtreatment.samhsa.gov>

---

<sup>1</sup> The jurisdictions include the territory of Guam, the Federated States of Micronesia, the Republic of Palau, the Commonwealth of Puerto Rico, and the Virgin Islands of the United States.

<sup>2</sup> Entities responding to N-SSATS are referred to as "facilities." A "facility" may be a program-level, clinic-level, or multi-site respondent.

## **Data Collection Procedures for the 2012 N-SSATS**

### *Field period and reference date*

The survey reference date for the 2012 N-SSATS was March 30, 2012. The field period was from March 30, 2012, through November 19, 2012.

### *Survey universe*

The 2012 N-SSATS facility universe totaled 19,316 facilities, including all 18,833 active treatment facilities on SAMHSA's I-SATS (now I-BHS) at a point 6 weeks before the survey reference date and 483 facilities that were added by State substance abuse agencies or otherwise discovered during the first 3 months of the survey.

### *Content*

The 2012 N-SSATS questionnaire was a 15-page document with 41 numbered questions. Topics included:

- Facility identification information
- Operating entity
- Primary focus
- Type of care provided
  - Outpatient treatment services (regular outpatient treatment, intensive outpatient treatment, day treatment or partial hospitalization, detoxification, methadone maintenance)
  - Residential (non-hospital) treatment services (long-term—more than 30 days, short-term—30 days or fewer, detoxification)
  - Hospital treatment services (inpatient treatment, inpatient detoxification)
- Services offered (assessment and pre-treatment services, counseling, pharmacotherapies, testing, transitional services, ancillary services)
- Clinical/therapeutic approaches
- Special programs or groups provided for specific client types
- Provision of services in sign language and/or in languages other than English
- Detoxification from alcohol, benzodiazepines, opioids, cocaine, methamphetamines, or other drugs, and routine use of medication during detoxification
- Client outreach (outreach to persons in the community who may need treatment, provision of a facility website)
- Licensure, certification, or accreditation agencies or organizations
- Standard operating procedures

- Payment options accepted, including use of a sliding fee scale and/or treatment at no charge
- Receipt of government funding
- Smoking policy
- Operation of an Opioid Treatment Program (OTP) certified by SAMHSA and offering maintenance and/or detoxification with opioid drugs such as methadone
- Number of clients in treatment on March 30, 2012 (total, clients under age 18, clients receiving methadone, clients receiving buprenorphine)
- Percentage of clients in treatment on March 30, 2012, for abuse of both alcohol and drugs, alcohol abuse only, and drug abuse only
- Percentage of clients in treatment on March 30, 2012, with diagnosed co-occurring substance abuse and mental disorders
- Number of beds designated for residential (non-hospital) and hospital inpatient substance abuse treatment on March 30, 2012

### *Data collection*

Three data collection modes were employed: a secure web-based questionnaire, a paper questionnaire sent by mail, and a telephone interview. Five weeks before the survey reference date of March 30, 2012, letters were mailed to all facilities to announce the survey. The letters also served to update records with new address information received from the U.S. Postal Service. During the last week of March 2012, data collection packets (including the SAMHSA cover letter, State-specific letter of endorsement, State profile, information on completing the survey on the web, and a sheet of *Frequently Asked Questions*) were mailed to each facility. Initially, respondents could also request a paper questionnaire be sent to them. During the data collection phase, contract personnel were available to answer facilities' questions concerning the survey. Web-based support for facilities completing the questionnaire on the web was also available. Three weeks after the initial data collection packet mailing, thank you/reminder letters were sent to all facilities. Approximately 8 weeks after the initial packet mailing, non-responding facilities were mailed a second packet that included a hard copy questionnaire. About 2 weeks after the questionnaire mailing, non-respondents received a reminder telephone call. Those facilities that had not responded within 3 to 4 weeks of the reminder call were telephoned and asked to complete the survey by computer-assisted telephone interview (CATI).

### *Facility status and response rate*

*Table 1.1* presents a summary of response rate information. There were 19,316 facilities in the survey universe. Of these facilities, 17 percent were found to be ineligible for the survey because they had closed or did not provide substance abuse treatment or detoxification. Of the remaining 16,114 facilities, 14,995 facilities (93 percent) completed the survey and 14,311 (89 percent) were eligible to be included in the data file.

### *Quality assurance*

The web questionnaire was programmed to be self-editing; that is, respondents were prompted to complete missing responses and to confirm or correct inconsistent responses.

All mail questionnaires were reviewed manually for consistency and for missing data. Calls were made to facilities to resolve unclear responses and to obtain missing data. After data entry, automated

**Table 1.1. N-SSATS facilities, by status and mode of response: 2012**

	<i>Number</i>	<i>Percent</i>
<b>Total facilities in survey</b>	<b>19,316</b>	<b>100.0</b>
Closed/ineligible	3,202	16.6
Eligible	16,114	83.4
<b>Total eligible</b>	<b>16,114</b>	<b>100.0</b>
Non-respondents	1,119	6.9
Respondents	14,995	93.1
Excluded from data file <sup>1</sup>	394	2.4
Roll-ups <sup>2</sup>	290	1.8
Included in data file	14,311	88.8
<b>Mode of response</b>	<b>14,311</b>	<b>100.0</b>
Internet	11,604	81.1
Telephone	1,729	12.1
Mail	978	6.8

<sup>1</sup> Facilities excluded from the data file included 191 non-treatment halfway houses, 115 solo practices not approved by the State agency for inclusion, and 88 facilities that treated incarcerated clients only.

<sup>2</sup> Facilities whose client counts were included in or “rolled into” other facilities’ counts and whose facility characteristics were not reported separately.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2012.

quality assurance reviews were conducted. The reviews incorporated the rules used in manual editing, plus consistency checks and checks for data outliers not readily identified by manual review.

Item non-response was minimized through careful editing and extensive follow-up. The item response rate for the 2012 N-SSATS averaged 98 percent across 201 separate items.

### **Facility Selection for the 2012 N-SSATS Report and Data File**

*Table 1.1.* The N-SSATS questionnaire is deliberately sent to some facilities that are excluded from the data file, as explained below. For this cycle, 394 of the 14,995 questionnaire respondents provided information but were deemed out of the and excluded from the data presented here. The excluded facilities and reasons for exclusion fell into three categories:

- 191 facilities were halfway houses that did not provide substance abuse treatment. These facilities were included in the survey so that they could be listed in the *Directory* and the Treatment Facility Locator.
- 115 facilities were solo practitioners. I-BHS and N-SSATS are designed to include facilities rather than individuals. Solo practitioners are listed and surveyed only if a State substance abuse agency explicitly requests that they be included in the survey. The excluded solo practitioners had not been identified for inclusion by a State substance abuse agency.
- 88 facilities were jails, prisons, or other organizations that treated incarcerated clients exclusively.

An additional 290 facilities whose client counts were included in or “rolled into” other facilities’ counts and whose facility characteristics were not reported separately were excluded from facility counts in this data file. However, their client counts are included.

After the exclusion of 394 out-of-scope facilities and 290 rolled-up facilities, 14,311 eligible respondent facilities remained to be included in the 2012 N-SSATS data file.

#### *Number of respondents reporting facility and client data*

There were 14,311 eligible respondents to the 2012 N-SSATS. The breakdown of facility data and client counts reported by these respondents is summarized below.

- 12,839 facilities reported facility data and client counts for themselves only.
- 528 facilities reported facility characteristics for themselves and provided client counts for their own facility and for 1,596 other facilities.
- 944 facilities reported facility characteristics only. Their client counts were reported by another facility.

#### **Survey Response Mode**

*Figure 1.* The proportion of facilities using the web survey to respond to N-SSATS has increased steadily since introduction of the option in 2002. The percentage of facilities responding via the web increased from 48 percent in 2008 to 81 percent in 2012. Mail response declined from 33 percent in 2008 to 7 percent in 2012. Telephone response, which represents follow-up of facilities that had not responded by mail or web, also declined, from 19 percent in 2008 to 12 percent in 2012.

**Figure 1. Survey Response Mode: 2008-2012**

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2008-2012.

## Data Considerations and Limitations

As with any data collection effort, certain procedural considerations and data limitations must be taken into account when interpreting data from the 2012 N-SSATS. Some general issues are listed below. Considerations and limitations of specific data items are discussed where the data are presented.

- N-SSATS attempts to obtain responses from all known treatment facilities, but it is a voluntary survey. There was no adjustment for the 7 percent facility non-response.
- N-SSATS is a point-prevalence survey. It provides information on the substance abuse treatment system and its clients on the reference date. Client counts reported here do not represent annual totals. Rather, N-SSATS provides a “snapshot” of substance abuse treatment facilities and clients on an average day.
- Multiple responses were allowed for certain variables (e.g., services provided and specialized programs). Tabulations of these variables will include the total number of facilities reporting each response.

## Terminology

- *Facility operation* indicates the type of entity responsible for the operation of the facility:
  - Private for-profit
  - Private non-profit
  - Government
    - Local, county, or community
    - State
    - Federal (Dept. of Veterans Affairs, Dept. of Defense, Indian Health Service, other)
    - Tribal
- *Primary focus* indicates the services the facility primarily provides:
  - Substance abuse treatment services
  - Mental health services
  - A mix of substance abuse treatment and mental health services
  - General health care
  - Other
- *Clients in treatment* were defined as:
  - Hospital inpatient and residential (non-hospital) clients receiving substance abuse treatment services at the facility on March 30, 2012
  - and*
  - Outpatient clients who were seen at the facility for a substance abuse treatment or detoxification service at least once during the month of March 2012, and who were still enrolled in treatment on March 30, 2012

## **N-SSATS BACKGROUND**

### **Survey History**

N-SSATS has evolved from national survey efforts begun in the 1970s by the National Institute on Drug Abuse (NIDA) to measure the scope and use of drug abuse treatment services in the United States. The sixth of these surveys, conducted in 1976, introduced the data elements and format that have formed the core of subsequent surveys. These include organizational focus, service orientation, services available, clients in treatment by type of care, and hospital inpatient/residential capacity. The 1976 survey, called the National Drug Abuse Treatment Utilization Survey, was repeated in 1977 and 1978.

In 1979, the National Institute on Alcohol Abuse and Alcoholism (NIAAA) became a cosponsor of the survey, alcoholism treatment facilities were added, and the study was renamed the National Drug and Alcoholism Treatment Utilization Survey. This survey was repeated in 1980 and 1982. In 1984, a one-page version called the National Alcoholism and Drug Abuse Program Inventory was used. In 1987, the full version of the survey was reinstated and renamed the National Drug and Alcoholism Treatment Unit Survey (NDATUS). NDATUS was conducted annually from 1989 to 1993.

In 1992, with the creation of SAMHSA, responsibility for conducting the survey shifted to SAMHSA's Office of Applied Studies (now the Center for Behavioral Health Statistics and Quality). The survey was redesigned, and it was conducted annually as the Uniform Facility Data Set (UFDS) survey from 1995 to 1998. During these years, the survey was conducted by mail with telephone follow-up of non-respondents. The 1999 survey year was a transition year during which the survey was redesigned and an abbreviated telephone survey of treatment facilities was conducted. In 2000, a redesigned full mail survey was reinstated with telephone follow-up; it was renamed the National Survey of Substance Abuse Treatment Services (N-SSATS). The reference date for the annual survey had always been the end of September or beginning of October. After the 2000 survey, the reference date was changed to the end of March, and no survey was conducted during 2001.

In 2000, the use of an Internet-based questionnaire was tested; beginning in 2002, all facilities were offered the opportunity to respond via the Internet.

### **N-SSATS in the Context of the Behavioral Health Services Information System (BHSIS)**

N-SSATS is one of the three components of SAMHSA's Behavioral Health Services Information System (BHSIS—formerly the Drug and Alcohol Services Information System, or DASIS). The core of BHSIS is the Inventory of Behavioral Health Services (I-BHS), until recently called the Inventory of Substance Abuse Treatment Services (I-SATS). I-BHS is a continuously updated, comprehensive listing of all known substance abuse treatment facilities. The other substance

abuse component of BHSIS is the Treatment Episode Data Set (TEDS), a client-level database of admissions to and discharges from substance abuse treatment. Together, the components provide national- and State-level information on the numbers and characteristics of individuals admitted to alcohol and drug treatment programs and describe the facilities that deliver care to those individuals.

I-BHS is the list frame for N-SSATS. Facilities in I-BHS fall into two general categories and are distinguished by the relationship of the facility to its State substance abuse agency. These categories are described below.

#### *Treatment facilities approved by State substance abuse agencies*

The largest group of facilities (11,623 in 2012) includes facilities that are licensed, certified, or otherwise approved by the State substance abuse agency to provide substance abuse treatment. State BHSIS representatives maintain this segment of I-BHS by reporting new facilities, closures, and address changes to SAMHSA. Some facilities are not licensed, certified, or otherwise approved by the State agency. Some private for-profit facilities fall into this category. The approved facility group also includes programs operated by Federal agencies—the Department of Veterans Affairs (VA), the Department of Defense, the Indian Health Service—and Opioid Treatment Programs certified by SAMHSA. I-BHS records for Federally-operated facilities are updated annually through lists provided by these agencies.

#### *Treatment facilities not approved by State substance abuse agencies*

This group of facilities (2,688 in 2012) represents the SAMHSA effort since the mid-1990s to make I-BHS as comprehensive as possible by including treatment facilities that State substance abuse agencies, for a variety of reasons, do not fund, license, or certify. Many of these facilities are private for-profit, small group practices, or hospital-based programs. Most of them are identified through periodic screening of alternative source databases. (See *Special efforts to improve survey coverage* below.) State substance abuse agencies are given the opportunity to review these facilities and to add them to the State agency-approved list, if appropriate.

### **Survey Coverage**

The use of I-BHS as the list frame for N-SSATS imposes certain constraints related to the unit of response and the scope of facilities included. In addition, the expansion of I-BHS in recent years to provide a more complete enumeration of substance abuse treatment facilities means that year-to-year comparisons of the numbers of facilities reporting to N-SSATS must be interpreted with caution.

#### *Unit of response*

N-SSATS is designed to collect data from each physical location where treatment services are provided. Accordingly, SAMHSA requests that State substance abuse agencies use the point of delivery of service (i.e., physical location) as the defining factor for a facility. Because of the different State administrative systems, however, there are some inconsistencies in implementation. For example, in some States, multiple treatment programs (e.g., detoxification, residential, and outpatient) at the same address and under the same management have separate State licenses. These are treated as separate by the State substance abuse agency, and are given separate I-BHS ID

numbers. In other States, multiple sites are included as a single entity under a parent or administrative unit. In many of these cases, individual sites can report services data in N-SSATS, but client data are available only at a higher administrative level. Beginning in 1995, efforts have been made to identify facility networks and to eliminate duplicate reporting by networks. For most facilities, reporting level remains consistent from year to year. However, beginning in 1998, an emphasis was placed on collecting minimum information from all physical locations, and this has resulted in an increase in the number of facilities.

#### *Special efforts to improve survey coverage*

The great majority of treatment facilities in I-BHS are administratively monitored by State substance abuse agencies. Therefore, the scope of facilities included in I-BHS is affected by differences in State systems of licensure, certification, accreditation, and the disbursement of public funds. For example, some State substance abuse agencies regulate private facilities and individual practitioners while others do not. In some States, hospital-based substance abuse treatment facilities are not licensed through the State substance abuse agency.

To address these differences, SAMHSA conducted a large-scale effort during 1995 and 1996 to identify substance abuse treatment facilities that, for a variety of reasons, were not on the inventory. Some 15 source lists were examined, and facilities not on the inventory were contacted to ascertain whether they provided substance abuse treatment. As expected, this yielded a number of hospital-based and small private facilities that were not on the inventory. (These facilities were surveyed in 1995 and 1996, but they were not included in the published results of the survey until 1997.) Analysis of the results of this effort led to similar but more targeted updates before subsequent surveys. Potential new facilities are identified using data from the American Business Index, the annual American Hospital Association survey, and SAMHSA's National Mental Health Services Survey, the source lists that yielded the most new facilities in 1995 and 1996. Survey participants, who are asked to report all of the treatment facilities in their administrative networks, also identify additional facilities during the survey itself. All newly identified facilities are initially included as not approved by the State substance abuse agency. State substance abuse agencies are given the opportunity to review these facilities and to add them to the State agency-approved list, if appropriate.

Expansion of survey coverage to include all sites within networks at which treatment was provided yielded a net increase of about 2,600 facilities between 1997 and 1998. These additions were not necessarily new facilities, but were facilities not previously included in the survey as separate sites. The number of facilities reporting continued to increase in 1999, but at a slower pace, a net increase of 1,800 facilities. The increase between 1998 and 1999 was in large part because of the improved survey response rate (95 percent in 1999 vs. 90 percent in 1998). Between 2008 and 2012, the number of facilities eligible for inclusion in this data file increased steadily, from 13,688 to 14,311. The total number is deceptive, however. There was significant turnover as facilities closed and others opened.

#### *Data collection*

Until 1996, State substance abuse agencies distributed and collected the facility survey forms. Beginning in 1996, data collection was centralized; since that time, SAMHSA has mailed survey

forms directly to and collected forms directly from the facilities and has conducted follow-up telephone interviews with the facility director or his/her designee. In 2000, SAMHSA introduced an on-line web version of the questionnaire in addition to the hard-copy questionnaire. The proportion of facilities using the web survey to respond to N-SSATS has increased steadily since its inception in 2002.

### *Non-response*

Beginning in 1992, SAMHSA expanded efforts to obtain information from non-responding facilities. A representative sample of non-respondents was contacted and administered an abbreviated version of the survey instrument via telephone. In 1993 and later years, this effort was extended to all non-responding facilities. In 1997, a series of measures was introduced to enhance the survey response rate. These included advance notification and improved methods for updating address and contact information. Between 2004 and 2012, use of these methods and intensive telephone follow-up resulted in an annual follow-up rate (i.e., facilities in the sample either completed the survey or were determined to be closed or otherwise ineligible) of 92 to 96 percent. In 2012, the follow-up rate was 93.1 percent.

### *Exclusions*

In 1997, facilities offering only DUI/DWI programs were excluded; these facilities were reinstated in 1998.

Facilities operated by the Bureau of Prisons (BOP) were excluded from the 1997 survey and subsequent surveys because SAMHSA conducted a separate survey of correctional facilities.<sup>3</sup> During that survey, it was discovered that jails, prisons, and other organizations treating incarcerated persons only were poorly enumerated on the inventory. Beginning in 1999, these facilities were identified during the survey and excluded from analyses and public-use data files.

I-BHS and N-SSATS are designed to include specialty substance abuse treatment facilities rather than individuals. Solo practitioners are listed on I-BHS and surveyed in N-SSATS only if the State substance abuse agency explicitly requests that they be included.

Beginning in 2000, halfway houses that did not provide substance abuse treatment were included on the inventory and in N-SSATS so that they could be listed in the *National Directory of Drug and Alcohol Abuse Treatment Programs* and on the Treatment Facility Locator (<http://findtreatment.samhsa.gov>). These facilities are excluded from analyses and public-use data files.

## **Changes in Survey Content**

The major content areas for the survey from 1996 to 2012. Since 1992, SAMHSA has made adjustments each year to the survey design, both to minimize non-response and to include areas of emerging interest. For example, questions on the number of clients in treatment receiving buprenorphine were added in 2004. Questions about clinical/therapeutic methods, standard practices, and Access to Recovery grants were added in 2007. Questions about facility smoking

---

<sup>3</sup> SAMHSA, Office of Applied Studies. *Substance Abuse Treatment in Adult and Juvenile Correctional Facilities: Findings from the Uniform Facility Data Set 1997 Survey of Correctional Facilities*. Drug and Alcohol Services Information System Series: S-9. DHHS Publication No. (SMA) 00-3380. Rockville, MD, 2000.

policy were added in 2011, and questions about outpatient facility operating capacity were added in 2012.

There have also been changes within content areas. For example, in response to concerns about over-reporting of programs or groups for specific client types, the survey question was revised in 2003 to distinguish between those facilities that accepted specific client types and those facilities that offered specially designed programs or groups for that client type. As a result, the number and proportion of facilities offering programs or groups for each of the specified client types decreased. Surveys from 2003 and later are believed to more accurately represent the number and proportions of facilities providing programs or groups for the specified client types. In addition, over time more categories have been added to the specific client types (e.g., persons who have experienced trauma, active duty military, and members of military families in 2012).

Variable type: Numeric

## OTP: Operate an Opioid Treatment Program

12. Does this facility operate an Opioid Treatment Program (OTP) at this location?

- OTPs are certified by SAMHSA's Center for Substance Abuse Treatment to use the opioid drugs methadone and buprenorphine in the treatment of opioid (narcotic) addiction.
- Some SAMHSA-certified OTPs dispense only buprenorphine in the treatment of opioid (narcotic) addiction.
- Physicians with an x-waiver may prescribe buprenorphine without being affiliated with an OTP. Therefore, not all facilities that prescribe buprenorphine are OTPs.

If no, skip to Q.13

Value	Label	Unweighted Frequency	%
