Terms of Use

These data are distributed under the following terms of use. By continuing past this page, you signify your agreement to comply with the requirements as stated below:

Privacy of Research Subjects

Any intentional identification of a research subject (whether an individual or an organization) or unauthorized disclosure of his or her confidential information violates the promise of confidentiality given to the providers of the information. Disclosure of confidential information may also be punishable under federal law. Therefore, users of data agree:

- To use these datasets solely for research or statistical purposes and not for re-identification of specific research subjects.
- To make no use of the identity of any research subject discovered inadvertently and to report any such discovery to CBHSQ and SAMHDA (samhda-support@samhsa.hhs.gov)

Citing Data

You agree to reference the recommended bibliographic citation in any of your publications that use SAMHDA data. Authors of publications that use SAMHDA data are required to send citations of their published works for inclusion in a database of related publications.

Disclaimer

You acknowledge that SAMHSA will bear no responsibility for your use of the data or for your interpretations or inferences based upon such uses.

Violations

If CBHSQ determines that this terms of use agreement has been violated, then possible sanctions could include:

- Report of the violation to the Research Integrity Officer, Institutional Review Board, or Human Subjects Review Committee of the user's institution. A range of sanctions are available to institutions including revocation of tenure and termination.
- If the confidentiality of human subjects has been violated, then report of the violation may be made to the Federal Office for Human Research Protections. This may result in an investigation of the user's institution, which can result in institution-wide sanctions including the suspension of all research grants.
- Report of the violation of federal law to the United States Attorney General for possible prosecution.
- Court awarded payments of damages to any individual(s)/organization(s) harmed by the breach of confidential data.

Promise of confidentiality

A promise to a respondent or research participant that the information the respondent provides will not be disseminated in identifiable form without the permission of the respondent; that the fact that the respondent participated in the study will not be disclosed; and that disseminated information will include no linkages to the identity of the respondent. Such a promise encompasses traditional notions of both confidentiality and anonymity. In most cases, federal law protects the confidentiality of the respondent's identity as referenced in the Promise of Confidentiality. Under this condition, names and other identifying information regarding respondents would be confidential.

Research subject

A person or organization that participates in a research study. A research subject may also be called a respondent. A respondent is generally a survey respondent or informant, experimental or observational subject, focus group participant, or any other person providing information to a study.

Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

2005 NATIONAL SURVEY ON DRUG USE AND HEALTH SCREENING APPLICATION UPDATES

Text/Screen Updates

Controlled Access

- Renamed Controlled Access function to “Access Data” throughout the program.
- Added a column on the Access Data screen, titled ‘S,’ that displays the Screening Result Code for each case to prompt FIs to enter access data for all cases that have been visited.
- Type #2 updated from “Guard/Doorman/Staff/Manager” to “Guard/Door Person/Staff/Manager.”
- Added Characteristic #10 – ‘Empty Lot.’
- Added a ‘View’ function button at the bottom of the Access Data screen. Two options, ‘Visited’ and ‘All’ allow FIs to view all cases or just cases they have already visited (case with any pending or final Screening Result Code) but still may require access data entry.
- Fixed error on Access Data screen that occurred when the screen was first loaded and FI tapped ‘Clear’ with no case selected.
- Added a message box that displays if an FI begins to enter Access Data without a case selected, reminding the FI to select a case.
- Added a message box that displays if an FI attempts to enter Access Data for a case with Screening Result Code 00, confirming the FI has selected the correct case.

GQU

- Fixed program bug for the situation where the FI visits a non-transient room and there is only one eligible resident and the screening respondent is not the eligible resident. The Ineligible for Quarter question fill was updated from “you” to “this person.”
- Fixed program bug when tapping the back arrow on the Total GQU Member screen when a transient unit was listed by room. Updated program so it returns to Unit Type screen instead of Occupancy screen.
- Updated informative message if you try to add a Missed DU to a GQU to gather information and call FS rather than call RTI.

Missed DU

- Updated error messages to be more specific if a street name or street address is blank on the Missed DU Address screen when adding a Missed DU.

Verification

- Revised screen so that if a telephone number was entered and then FI tapped “Refused” or “Not Available” the program would not automatically delete the telephone number without confirming the action with the FI.

Summary PTE Data

- Added a fake FS ID and FS Name as the default area so that any PTE data entered during training will not be attributed with a real FS area.

Technical Updates

- Updated the Remove Completed Cases Utility so that it also checks for complete Access Data entry before the program will remove the completed, transmitted case.
- Fixed bug on Verification function where 0.46% of cases codes 10, 13, 18, 22, 26, or 30 had missing verification data.
- Added a check for Bluetooth, the iPAQ’s wireless technology, being active or on to reduce unnecessary battery drainage.
- Updated the reset process from the Admin menu so the iPAQ saves the database to the storage card when this reset is performed.
- Updated the transmission system so that in some rare dropped transmission scenarios, the partially received records are marked and the FI receives the remaining records during a subsequent transmission.
- Updated an Added DU error where an FI could enter 10 Missed DUs to a segment and discard some during reconciliation, but not enter additional added DUs (up to the 10 limit).

entered, and all final data successfully transmitted to RTI. FI obtains FS
approval before using this function.*

REMOVE ALL CASES: USE WITH EXTREME CAUTION!!! This function will remove ALL cases, and their associated data from your handheld device. This function should only be used as directed by your field supervisor and RTI.

This function prepares the iPAQ to receive the next quarter's cases by removing all current final/transmitted cases from the iPAQ, then allowing the iPAQ to pick up the next quarter's cases upon a subsequent transmission. This function was moved to the CMS, but this feature to initiate the process was left on the iPAQ as a troubleshooting option.

DATABASE UTILITIES [SELECT CASE, ADMIN, UTILITIES]

REMOVE COMPLETED CASES [SELECT CASE, ADMIN, UTILITIES, REMOVE COMPLETED CASES]

The Remove Completed Cases function verifies that the re-interview case has been activated or completed before removing any Reliability Study Pre-test initial cases. The initial interview and/or re-interview case will not be removed until the initial interview has complete Access Data entered and re-interview case has been activated, completed, and all case data successfully transmitted.

SELECT CASE

The Reliability Study Pre-test re-interview CaseID is the same as the initial Reliability Study Pre-test Interview, but the CaseID contains an additional character (R) after the line number to identify it as a re-interview (i.e., XX10010112R). The re-interview case appears by default below the corresponding initial interview case on the Select Case screen. Re-interviews are always an “A” interview.

During case transfer, screening and initial interview cases transfer with the re-interview case so the next FI has access to all ROCs for reference.

Two segments of Reliability Study Pre-test cases, consisting of eight cases each, are added to the Select Case screen.

ACTIVATE RE-INTERVIEW CASE [SELECT CASE, CASE ID, ACTIONS, ACTIVATE RE-INTERVIEW CASE]
