Introduction and Description of the 2006 National Survey on Drug Use and Health

Introduction

This codebook provides documentation for the 2006 National Survey on Drug Use and Health (NSDUH) public use file. Prior to 2002, the survey was called the National Household Survey on Drug Abuse (NHSDA). NSDUH is sponsored by the Center for Behavioral Health Statistics and Quality (CBHSQ, formerly the Office of Applied Studies) within the Substance Abuse and Mental Health Services Administration (SAMHSA) and is conducted by RTI International, Research Triangle Park, North Carolina.¹

For each variable in the 2006 public use file, the codebook provides the variable name, a description of the variable, value codes and their meanings, and a univariate frequency distribution. Most of the variables originated as interview items. For created variables, the source variables and recoding specifications are provided, if space allows. In addition, case identification, sampling, and data collection variables are included in the file and documented in the codebook. The variable names in this codebook are the variable names that appear in the dataset.

Extensive work was done on the 2006 public use file to protect respondent confidentiality while still allowing most variables to be available for analysts to use. Confidentiality protection procedures implemented in RTI's innovative statistical disclosure limitation method were used. The method is called Micro Agglomeration, Substitution, Subsampling, and Calibration (MASSC). The procedures are discussed in greater detail in the Confidentiality of Data section near the end of this introduction. Briefly, the steps included standard procedures for eliminating variables for which there was a high risk that individuals could be identified and collapsing the values of other variables. Additional special techniques to protect respondent confidentiality included subsampling of records and substitution of data from donors. Analysis of the data after these procedures were implemented showed that the effect on the levels and accuracy of estimates was minimal. Nevertheless, *because of the procedures that were implemented, users of this file are advised that previously published estimates may not be exactly reproducible from the variables on this file.*

Overview of NSDUH

The 2006 NSDUH is the 26th in a series, the primary purpose of which is to measure the prevalence and correlates of drug use in the United States. This survey series provides information about the use of illicit drugs, alcohol, and tobacco among members of the noninstitutionalized U.S. civilian population aged 12 or older. Surveys have been conducted periodically since 1971, with the most recent ones in 1979, 1982, 1985, 1988, and 1990 through 2006. Currently, public use files are available for surveys from 1979 onward.

¹ RTI International is a registered trademark and a trade name of Research Triangle Institute.

In 1999, the survey underwent a major redesign. The method of data collection was changed from a paper questionnaire administration to a computer-assisted administration. In addition, the sample design was changed from a strictly national design to a state-based sampling plan. These important changes have a major impact on the data produced from the survey. *Because of the differences in methodology and impact of the new design on data collection, only limited comparisons can be made between data from the redesigned surveys (1999 onward) and data obtained from surveys prior to 1999. Also, because of survey improvements made in 2002, the 2006 data in this file should not be compared with data collected in 2001 or earlier to assess changes over time. However, there should be no problem with comparisons between 2002 and data from subsequent public use files, including this one.*

Prior to 1999, the survey was conducted using paper-and-pencil interviewing (PAPI) methods for an interview lasting about an hour. The PAPI instrumentation consisted of a questionnaire booklet completed by an interviewer and a set of individual answer sheets completed by a respondent. All substance use questions and other sensitive questions appeared on the answer sheets, so the interviewer was unaware of the respondent's answers. Less sensitive questions concerning demographics, occupational status, household size, and composition were asked aloud by the interviewer and recorded in the questionnaire booklet.

Starting in 1999, the interview is now carried out using computer-assisted interviewing (CAI) methods. The survey uses a combination of computer-assisted personal interviewing (CAPI) conducted by an interviewer and audio computer-assisted self-interviewing (ACASI). For the most part, questions previously administered by an interviewer are now administered by an interviewer using CAPI. Questions previously administered using self-administered answer sheets are now administered using ACASI. Use of ACASI is designed to provide respondents with a highly private and confidential means of responding to questions and to increase the level of honest reporting of illicit drug use and other sensitive behaviors.

A key feature of the CAI instrument is a core/supplement structure. A core set of questions critical for basic trend measurement of prevalence estimates remains in the survey every year and comprises the first part of the interview. Supplemental questions, or modules, that can be revised, dropped, or added from year to year make up the remainder of the interview. The core consists of initial demographic items and questions pertaining to the use of tobacco, alcohol, marijuana, cocaine, crack cocaine, heroin, hallucinogens, inhalants, pain relievers, tranquilizers, stimulants, and sedatives. Supplemental items include the remaining ACASI sections and demographic questions. It should be mentioned that some of the supplemental portions of the questionnaire have remained in the survey, relatively unchanged, every year (e.g., current health insurance coverage, income). Since 1988, additional information also has been gathered about the form of cocaine known as "crack" and about sharing needles for the injection of drugs. In addition, the consequences of using various drugs have been given considerable attention since 1985.

The 2006 NSDUH documentation includes specifications for the logic governing how respondents were routed through the questions in the interview. Analysts are encouraged to refer to this document in conjunction with their review of the codebook. For searchable versions of the specifications, see the Substance Abuse and Mental Health Data Archive (SAMHDA) website at <https://datafiles.samhsa.gov/>.

The target population for the 2006 survey was the same as has been defined since the 1991 survey: the civilian, noninstitutionalized population of the United States (including civilians living on military bases) who were 12 years of age or older at the time of the survey. Before 1991, the sample was drawn from the household population of the contiguous 48 states. Residents of Alaska and Hawaii were added to the sample population in 1991, as were residents of noninstitutional group quarters (e.g., college dormitories, group homes, civilians dwelling on military installations) and persons with no permanent residence (homeless people in shelters and residents of single rooms in hotels). In addition, six special-interest metropolitan statistical areas (MSAs) were oversampled in 1991. The 1992 and 1993 surveys retained the oversampling of the six MSAs and also were designed to provide quarterly as well as annual estimates.

Beginning in 1999, the survey sample employed a 50-state design with an independent, multistage area probability sample for each of the 50 states and the District of Columbia. The eight states with the largest population (which together account for 48 percent of the total U.S. population aged 12 or older) were designated as large sample states (California, Florida, Illinois, Michigan, New York, Ohio, Pennsylvania, and Texas). For these states, the design provided a sample large enough to support direct state estimates. For the remaining 42 states and the District of Columbia, smaller, but adequate, samples were selected to support state estimates using small area estimation (SAE) techniques. The design also oversampled youths and young adults, so that each state's sample was approximately equally distributed among three major age groups: 12 to 17 years, 18 to 25 years, and 26 years or older.

Although the design of the 2006 survey is similar to the design of the 1999 through 2001 surveys, there are important methodological differences since 2002 that affect the 2006 estimates. As noted above, the survey's name was changed from the National Household Survey on Drug Abuse (NHSDA) to the National Survey on Drug Use and Health (NSDUH) in 2002. In addition to the survey's name change, each NSDUH respondent beginning in 2002 is now given an incentive of \$30. These changes have resulted in a substantial improvement in the survey response rate. The changes also affected respondents' reporting of many critical items that are the basis of prevalence measures reported by the survey each year. Further, the data could have been affected by improved data collection quality control procedures that were introduced in the survey beginning in 2001. In addition, new population data from the 2000 decennial census became available for use in NSDUH sample weighting procedures, resulting in another discontinuity between estimates since 2002 and those prior to 2002. *Analyses of the effects of each of these factors on NSDUH estimates have shown that the 2006 data in this public use file should not be compared with 2001 and earlier data to assess changes over time. As noted above, however, comparisons may be made between 2002 and surveys in subsequent years, including this one.*

Data file users who wish to analyze data from multiple survey years including 2006 (e.g., 2002-2006²) should first sort the combined data by the sample design variables VESTR (variance estimation [pseudo] stratum) and VEREP (variance estimation [pseudo] replicate within stratum). These variables are then specified in a software package, such as SUDAAN®, to automatically account for the 50 percent overlap between successive years when estimating

² Changes in the sample design are accounted for in the sample design variables. Therefore, it is appropriate to combine 2002-2004 data with 2005 and onward.

variances and standard errors.³ The original ANALWT_C should be used when analyzing data for any single year or comparing estimates between years within a combined file containing data from multiple years. However, generation of new estimates based upon pooled data from multiple years requires the use of new analysis weights. These weights would be created as ANALWT_C divided by the number of years of combined data (e.g., ANALWT_C divided by 5 for point estimates based upon the combined 2002-2006 data). In addition, special consideration needs to be given to using the proper weights to analyze pooled data from 2004 and 2005 for the adult mental health (renamed to psychological distress in 2006) and adult depression modules. This issue is discussed further in the section on the Use of Sample Weights and Sample Design Variables.

A description of the 2006 survey, including more detailed information on sample issues, can be found in the following NSDUH documents released in 2007:

- Office of Applied Studies. (2007). *Results from the 2006 National Survey on Drug Use and Health: National findings* (HHS Publication No. SMA 07-4293, NSDUH Series H-32). Rockville, MD: Substance Abuse and Mental Health Services Administration.
- Office of Applied Studies. (2007). *Results from the 2006 National Survey on Drug Use and Health: Detailed tables*. Rockville, MD: Substance Abuse and Mental Health Services Administration.

These documents present in tabular, graphical, and narrative bullet formats some key 2006 findings on drug use prevalence by age and major demographic variables. They are archived at <https://archive.samhsa.gov/data/NSDUH.aspx>.

Strengths and Limitations of NSDUH

NSDUH is the only study that annually produces estimates of drug use among civilian members of the noninstitutionalized population in the United States. The survey is an appropriate technique for estimating prevalence estimates for use of different drugs because most drug use would not ordinarily come to the attention of administrative, medical, or correctional authorities and therefore would not be included in official statistics. In-person interviews with a large national probability sample seem to be the best way to estimate drug use in virtually the entire population of the United States.

The redesign of the survey in 1999 also has yielded improvements. With the expanded sample design, the precision of the estimates at the national level is improved substantially. The CAI methodology also has made data collection and processing more efficient and has improved data quality.

Although NSDUH is useful for many purposes, it has certain limitations. First, the data are self-reports of drug use, and their value depends on respondents' truthfulness and memory. Although some experimental studies have established the validity of self-reported data in similar

³ In SUDAAN, the sample design is specified using the NEST statement. See the following reference: RTI International. (2004). *SUDAAN® language manual, Release 9.0*. Research Triangle Park, NC: Author.

contexts and NSDUH procedures were designed to encourage honesty and recall, some underreporting and overreporting may have taken place.

Second, the survey is cross-sectional rather than longitudinal. That is, individuals were interviewed only once and were not followed for additional interviews in subsequent years. Each year's survey, therefore, provides an overview of the prevalence of drug use at a specific point in time rather than a view of how drug use changes over time for specific individuals.

Third, because the target population of the survey is defined as the noninstitutionalized civilian population of the United States, a small proportion (slightly less than 2 percent) of the population is excluded. The subpopulations excluded are members of the active-duty military and persons in institutional group quarters (e.g., hospitals, prisons, nursing homes, treatment centers). If the drug use of these groups differs from that of the noninstitutionalized civilian population, NSDUH may provide slightly inaccurate estimates of drug use in the total population. This may be particularly true for prevalence estimates for rarely used drugs, such as heroin.

Survey Methodology

Like the 1999 to 2005 surveys, the 2006 survey was conducted using CAI methods. This survey also allows for improved state estimates based on minimum sample sizes per state. The target sample size of 67,500 allows SAMHSA to continue reporting adequately precise demographic subgroup estimates at the national level without needing to oversample specially targeted demographics, as was required in the past. The achieved sample size for the 2006 survey was 67,491 persons. Note that numbers discussed in this introduction that refer to restricted-use full sample data may differ from previously published numbers due to updates; for details, see Section B.3 in Appendix B of the national findings report for the 2011 NSDUH.⁴ No corresponding changes were needed on the public use data files. *Because of the subsampling step used in the procedures to control the risk of disclosing the identity of any respondent, only 55,035 records appear on the public use file (see the section on Confidentiality of Data).*

The 2006 NSDUH is the second survey in a coordinated 5-year sample design. Although there is no overlap with the 1999 through 2004 samples, the coordinated design for 2005 through 2009 facilitated a 50 percent overlap in second-stage units (area segments [see below]) between each 2 successive years from 2005 through 2009.⁵ This design was intended to increase the precision of estimates in year-to-year trend analyses because of the expected positive correlation resulting from the overlapping sample between successive survey years.

The 2006 design allows for computation of estimates by state in all 50 states plus the District of Columbia. States may therefore be viewed as the first level of stratification as well as a reporting variable. Eight states, referred to as the large sample states, had a sample designed to yield 3,600 respondents per state for the 2006 survey. This sample size was considered adequate

⁴ Center for Behavioral Health Statistics and Quality. (2012). *Results from the 2011 National Survey on Drug Use and Health: Summary of national findings* (HHS Publication No. SMA 12-4713, NSDUH Series H-44). Rockville, MD: Substance Abuse and Mental Health Services Administration.

⁵ In segments used in 2 successive years, only addresses not sampled in the first year may be included in the second year's sample.

to support direct state estimates. The remaining 43 states (which include the District of Columbia) had a sample designed to yield 900 respondents per state in the 2006 survey. In these 43 states, adequate data were available to support reliable state estimates based on SAE methodology.

Stratification and Selection of Primary and Secondary Sampling Units (Census Tracts and Area Segments)

Within each state, sampling strata called state sampling (SS) regions were formed. Based on a composite size measure, states were partitioned geographically into roughly equally sized regions. In other words, regions were formed such that each area yielded, in expectation, roughly the same number of interviews during each data collection period. The eight large sample states were divided into 48 SS regions each; the remaining states were divided into 12 SS regions each. Therefore, the partitioning of the United States resulted in the formation of a total of 900 SS regions.

Unlike the 1999 through 2004 surveys, the first stage of selection for the 2005 through 2009 NSDUHs was census tracts. The first stage of selection began with the construction of an area sample frame that contained one record for each census tract in the United States. If necessary, census tracts were aggregated within SS regions until each tract⁶ had, at a minimum, 150 dwelling units⁷ in urban areas and 100 dwelling units in rural areas.⁸ These census tracts served as the primary sampling units (PSUs) for the coordinated 5-year sample.

Before selecting census tracts, additional implicit stratification was achieved by sorting the first-stage sampling units by a CBSA/SES⁹ (core-based statistical area/socioeconomic status) indicator¹⁰ and by the percentage of the population who are non-Hispanic and white. From this well-ordered sample frame, 48 census tracts per SS region were selected with probabilities proportionate to a composite size measure and with minimum replacement.

Because census tracts generally exceed the minimum dwelling unit requirement, one smaller geographic area was selected within each sampled census tract. For this second stage of sampling, each selected census tract was partitioned into small geographic areas composed of adjacent census blocks. These geographic clusters of blocks are referred to as *segments* and are

⁶ For the remainder of the discussion, first-stage sampling units are referred to as "census tracts" even though each first-stage sampling unit contains one or more census tracts.

⁷ Dwelling unit counts were obtained from the 2000 decennial census data supplemented with revised population counts from Claritas, a market research firm headquartered in Ithaca, New York (see <https://www.claritas.com/>). Claritas used to be affiliated with Nielsen Holdings, from which they became independent in January 2017.

⁸ The basis for the differing minimum dwelling unit requirement in urban and rural areas is that it is more difficult to meet the requirement in rural areas, and 100 dwelling units is sufficient to support one field test and two main study samples.

⁹ CBSAs include metropolitan and micropolitan statistical areas, as defined in the following reference: Office of Management and Budget (OMB, 2003, June 6). *OMB Bulletin No. 03-04: Revised definitions of metropolitan statistical areas, new definitions of micropolitan statistical areas and combined statistical areas, and guidance on uses of the statistical definitions of these areas*. Washington, DC: The White House.

¹⁰ Four categories are defined as (1) CBSA/low SES, (2) CBSA/high SES, (3) non-CBSA/low SES, and (4) non-CBSA/high SES.

the secondary sampling units (SSUs) for the coordinated 5-year sample design. A sample *dwelling unit* in NSDUH refers to either a housing unit or a group quarters listing unit, such as a dormitory room or a shelter bed. To support the overlapping sample design and any special supplemental samples or field tests that SAMHSA might wish to conduct, segments were formed to contain a minimum of 150 dwelling units in urban areas and 100 dwelling units in rural areas.

One segment was selected within each sampled census tract with probability proportionate to size. The 48 selected segments then were randomly assigned to a survey year and quarter of data collection.

Selection of Dwelling Units

The sample design required an approximately equal number of persons in three age groups: 12 to 17 years, 18 to 25 years, and 26 years or older. To improve the precision of the estimates, the sample allocation process targeted five age groups: 12 to 17 years, 18 to 25 years, 26 to 34 years, 35 to 49 years, and 50 years or older. Here the allocation among the three age groups in the 26 years or older group was done in such a way as to increase precision while maintaining approximately the same sample size as the 12 to 17 and 18 to 25 age groups. The size measures used in selecting the area segments were coordinated with the dwelling unit and person selection process so that a nearly self-weighting sample could be achieved in each of the five age groups. Departures from the self-weighting objective occurred for several reasons, including the following:

- advance projections on the number of dwelling units did not accurately reflect the current housing inventory;
- maximum dwelling unit sample sizes were preset to control the interviewer workload and to allow unused addresses to be available for the next year's survey; and
- the person selection probabilities were constrained so that no more than two persons could be selected per dwelling unit.

An iterative sample allocation process was followed to adjust for these additional constraints. In addition, the dwelling unit sample allocation in each area segment was adjusted to allow for dwelling unit eligibility, for screening nonresponse, and for person nonresponse.

In advance of the survey period, specially trained listers had visited each area segment and listed all addresses for housing units and eligible group quarters units in a prescribed order. Systematic sampling was used to select the allocated sample of addresses from each segment.¹¹

¹¹ This had the effect of creating noncompact clusters (selection from a list), which differ from compact clusters in that not all units within the cluster are included in the sample. Although compact cluster designs are less costly and more stable, a noncompact cluster design was used because it provides for greater heterogeneity of dwellings within the sample. Also, social interaction (contagion) among neighboring dwellings is sometimes introduced with compact clusters. See the following reference: Kish, L. (1965). *Survey sampling*. New York, NY: John Wiley.

Selection of Persons

During each quarterly survey, field interviewers (FIs) visited each sample address to determine dwelling unit eligibility, to list all eligible persons at the address, to select the sample of persons to be interviewed, and to conduct interviews. In addition, the interviewers followed special "half-open" interval procedures to identify any new (since the time of listing) housing units or any dwelling units missed during the advance listing process. Any new or missed dwelling units following immediately after a sample dwelling unit and up to, but not including, the next initially listed address in the prescribed order of listing also were included in the sample.

The interviewers used a handheld computer to record the results of the dwelling unit screening process and to select the sample of respondents. They recorded the results of each call, the final eligibility status of the dwelling unit, and information on new and missed dwelling units. If a sample address was an eligible occupied dwelling unit, they also conducted a screening interview to identify and roster all survey-eligible persons residing at the address. When the roster was complete, the computer was programmed to select the sample of persons to be interviewed using parameters specified for that area segment and a random number specified for that address.

Data collection progress was monitored during each quarterly survey by state. Small reserve samples were held back each quarter so that the assigned sample size could be adjusted if necessary during the course of data collection.

Data Collection and Response Rates

The fieldwork for the 2006 NSDUH was directed by senior RTI staff members. RTI maintained a field staff of approximately 700 FIs to collect the data.

As noted above, a total final sample of 67,491 CAI interviews was obtained for the 2006 survey. Strategies for ensuring high rates of participation resulted in a weighted screening response rate of 90.23 percent and a weighted interview response rate for the CAI of 74.21 percent. (Note that these response rates reflect the original sample, not the subsampled data file referenced in this document.)

Throughout the course of the study, respondent anonymity and the privacy of responses were protected by separating identifying information from survey responses. Respondents were assured that their identities and responses would be handled in the strictest compliance with federal law. As discussed above, the questionnaire itself and the interviewing procedures were designed to enhance the privacy of responses, especially during segments of the interview in which questions of a sensitive nature were posed. Answers to sensitive questions were gathered using ACASI. During ACASI portions of the interview, respondents listened to prerecorded questions through headphones and entered their responses directly into a computer without interviewers knowing how they were answering. At the conclusion of the ACASI section, the interview returned to the CAPI mode with the interviewer completing the questionnaire. Each respondent who completed a full interview was given \$30 cash as a token of appreciation for his or her time.

Weighting Procedures

The estimates yielded by NSDUH are based on sample survey data rather than on complete data for the entire population. This means that the data must be weighted to obtain unbiased estimates for drug use in the population represented by the 2006 NSDUH. The "final sampling weight" of the i th respondent, say w_i , can be interpreted as the number of persons in the NSDUH target population represented by the i th respondent. The sum of the weights over all respondents is used to estimate the size of the total target population:

$$\sum_i w_i = \text{estimated size of target population,}$$

where the summation is over all respondents in the 2006 NSDUH.

The "basic sampling weights" for the 2006 NSDUH are equal to the inverse of the probabilities of selecting sample respondents. In other words, the smaller a respondent's chance of entering the sample, the larger the weight that respondent has in the calculation of unbiased estimates for the target population. The probability of selecting a respondent can be computed as the product of four stagewise sampling probabilities. Specifically, the probability of selecting respondent i equals the product of (a) the probability of selecting respondent i 's census tract from an SS region with each state, (b) the probability of selecting respondent i 's segment given the location of the census tract, (c) the probability of selecting respondent i 's dwelling unit given the selection of his or her segment, and (d) the probability of selecting respondent i within that selected dwelling unit.

To obtain the full-sample "final NSDUH weights," the basic sampling weights were adjusted to take into account dwelling unit-level and individual-level nonresponse. These weights were adjusted further to ensure consistency with 2000-based census population estimates obtained from the U.S. Census Bureau.

For the public use file, a portion of the records was randomly subsampled from the original file and removed to introduce uncertainty in a "potential intruder's" mind while reducing the probability that any known respondent was in the public use file (see the section on Confidentiality of Data near the end of this introduction). Therefore, the weights of the members of the remaining sample subsequently were adjusted for subsampling. The weights then were calibrated to known totals from the full analytic file in order to increase precision. (See the section on Confidentiality of Data for more details.)

Contents and Organization of the 2006 NSDUH Public Use File

Data File Description

The file described here is made available as an ASCII file with 3,138 variables and 55,035 observations. *Three program files are made available to read the ASCII file into SAS, SPSS, or Stata. The file also is made available as a SAS transport (CPORT) file, SPSS system file, Stata system file, and ASCII tab-delimited file. All of the data and program files are available from SAMHDA.*

The overall organization of the file is shown in the Table of Contents of this document. Edited data from core drug modules make up the first portion of the file. Edited data from the noncore self-administered modules and demographic questions are in later sections. These variables contain missing data; see the section on Standard Code Conventions for a description of the codes given to different types of missing data. For each edited variable, the number of observations assigned a given missing data code is shown in the entry for that variable.

Imputation-revised drug use variables, as well as selected recoded versions of these variables, are included for core drug use variables. These imputed and recoded drug use variables are in separate sections following the edited core drug use variables. The recoded drug use variables include indicators for lifetime, past year, and past month substance use. The imputation-revised core drug use variables served as the starting point for the recoded core drug use variables. Imputation-revised core and noncore demographic variables also are included toward the end of the codebook. Missing values for all imputation-revised variables have been imputed using the statistical imputation procedures described below. Imputation indicators are provided for each variable so that users may easily determine whether an observation contains data from the questionnaire or an imputed value. *Where imputed or recoded variables are provided, users are encouraged to use them to produce estimates rather than raw or edited variables from the interview.*

Variables containing the original responses to the recency-of-use and 12-month frequency-of-use questions are presented in the codebook section on Selected Unedited Variables. These are included to show how respondents originally answered these questions prior to the data being edited for consistency with related items in that drug's section of the interview.

Variables from self-administered noncore modules comprise the next major section in the codebook. In addition to edited variables in these noncore modules, recoded variables are in some of these sections. For example, edited variables from the section of the interview pertaining to symptoms of dependence or abuse (Substance Dependence and Abuse section in this codebook) were used to create recoded summary measures of dependence. Unlike variables in the core sections, however, imputation for missing data generally was not done prior to the recoding of noncore variables. Consequently, noncore recoded variables may still have missing values.

For recoded variables, the missing data codes contained in the source variables and defined in the Standard Code Conventions section of this codebook often were recoded to the standard missing code (.). It is intended that cases containing these missing codes be excluded from an analysis.

In many instances, the codebook itself also indicates in parentheses the question name that corresponds to an edited variable. However, one important feature of the transition to CAI in 1999 was that respondents could be routed to different versions of a question depending on prior information from the interview. For this reason, individual variables that correspond to every question in the interview do not exist on this file. For example, respondents who initiated use of a drug within 1 year of their current age were asked more detailed questions about the year and month in which they first used that drug. Depending on their age, date of birth, and interview date, respondents could be routed to one of three possible questions to identify the year in which

they first used a drug (e.g., CG04a, CG04b, or CG04c for cigarettes, as shown in the specifications). Similarly, respondents could be routed to one of two possible questions to determine the month in which they first used a drug. To facilitate analysis, therefore, responses from these multiple year-of-first-use and month-of-first-use questions were combined into one single year-of-first-use variable and one single month-of-first-use variable for each drug.

Variable Naming Conventions

Variable names are mnemonics related to the meaning of each variable. The user is advised, however, that the transition to a CAI mode of data collection beginning in 1999 marked an important change not only in the conduct of the survey, but also in the data that the survey yielded. Therefore, *data collected with the CAI mode beginning in 1999 are generally not comparable with data collected with the old PAPI mode in prior years, even if the basic wording or content of a question was the same in both the CAI and PAPI instruments.*

As much as possible, however, CAI variables were named identically to the PAPI variables when the content of questions was identical or similar in CAI and PAPI. Use of variable names in CAI that had previously been used in PAPI preserved the historical meaning of key variables, such as those pertaining to the most recent time that respondents used a particular drug.

Usable Cases

A key step in the data processing procedures established the minimum item response requirements in order for cases to be retained for weighting and further analysis (i.e., "usable" cases). These procedures were designed to eliminate cases with unacceptable levels of item nonresponse (i.e., missing data), thereby retaining cases with lower levels of missing data and reducing the amount of statistical imputation needed for any given record.

The usable case criteria established for CAI were based on the completeness of information that respondents provided about their lifetime use or nonuse of different drugs. In CAI, respondents were asked more detailed questions about different drugs only if they reported lifetime use of that drug (or lifetime use of one or more drugs within a broader category, such as hallucinogens) on an initial "gate" question.¹² Consequently, whether a CAI respondent was a lifetime user or nonuser of the drugs of interest could be readily determined by reviewing the respondent's answers to the "gate" question on lifetime use of that drug (or category of drugs).

The requirements for a CAI record to be considered usable are noted as follows:

¹² In all modules except those pertaining to hallucinogens, inhalants, pain relievers, tranquilizers, stimulants, and sedatives, the logic for asking more detailed questions about use of that drug was based on the answer to a single "yes/no" question (e.g., "Have you ever, even once, used marijuana or hashish?"). In the hallucinogens through sedatives modules, the logic for asking more detailed questions about use of that category of drugs was based on respondents' answers to multiple "yes/no" questions about the lifetime use or nonuse of specific drugs within that category (e.g., lifetime use or nonuse of the specific hallucinogens LSD, PCP, peyote, mescaline, psilocybin/mushrooms, Ecstasy [MDMA], or "any other" hallucinogen).

1. The lifetime cigarette question (i.e., "Have you ever smoked part or all of a cigarette?") had to have been answered as "yes" or "no." This requirement was set so that lifetime use or nonuse would be fully defined for at least one substance. Consequently, data about lifetime use or nonuse of cigarettes could be used in subsequent statistical imputations for other drugs where lifetime use or nonuse was undefined.
2. Responses to questions on at least nine (9) of the following additional drugs had to contain information about lifetime use or nonuse: (a) chewing tobacco, (b) snuff, (c) cigars, (d) alcohol, (e) marijuana, (f) cocaine (in any form), (g) heroin, (h) hallucinogens, (i) inhalants, (j) pain relievers, (k) tranquilizers, (l) stimulants, and (m) sedatives. Crack cocaine was not included in the usable case rule because the logic for asking about crack cocaine was dependent upon the respondent having answered the lifetime cocaine question as "yes." Although the CAI instrument also asked about pipe tobacco, this was not included in the usable case rule because there was only one other question about pipe tobacco in addition to the lifetime pipe tobacco use question.¹³

The interview also included follow-up probes for respondents who initially refused to answer a gate question or an entire series of gate questions. Follow-up probes were included in the following modules that were relevant to the usable case rule: cigarettes, chewing tobacco, snuff, cigars, alcohol, marijuana, cocaine, heroin, specific hallucinogens (i.e., LSD, PCP, and Ecstasy [MDMA]), the specific stimulant methamphetamine, and any use of inhalants, pain relievers, tranquilizers, stimulants, or sedatives (if respondents refused all lifetime use questions about these latter five drug categories). If respondents changed their initial refusal to a response of "yes" or "no," they were considered to have provided usable data to that drug's gate information.

For the hallucinogens through sedatives sections, respondents reported about use or nonuse of specific drugs within that category. For these sections, the requirement for reporting of lifetime use or nonuse was considered to have been satisfied if at least one lead lifetime question in the series was answered as "yes" or "no" (e.g., if at least one question in the hallucinogens series was answered as "yes" or "no" for hallucinogens). Similarly, in the inhalants, pain relievers, tranquilizers, stimulants, and sedatives sections, if respondents initially refused to answer all gate questions for a given drug but subsequently answered that drug's follow-up probe as "yes" or "no," they were considered to have satisfied the reporting requirement for that drug.

In addition, the CAI program terminated interviews during the initial demographics questions if respondents were ineligible for the survey (i.e., under age 12 or on active duty in the U.S. military). These ineligible cases by definition did not meet the usable case criteria because the interviews were terminated before the respondents were asked the first cigarette use question.

¹³ For a more detailed discussion of the development of the usable case requirements, see the following reference: Kroutil, L., & Myers, L. (2002). Development of editing rules for CAI substance use data. In J. Gfroerer, J. Eyerman, & J. Chromy (Eds.), *Redesigning an ongoing national household survey: Methodological issues* (HHS Publication No. SMA 03-3768, pp. 85-109). Rockville, MD: Substance Abuse and Mental Health Services Administration, Office of Applied Studies.

Logical Editing

For selected key variables, response data were reviewed to identify and address inconsistent data among related variables or to replace missing data with nonmissing values. The routing logic in the CAI instrument reduced the opportunities for respondents to give inconsistent answers by skipping respondents past questions that did not apply to them. The occurrence of inconsistent data was reduced further through the use of consistency checks built into the CAI program that prompted respondents to resolve inconsistencies between related items. Nevertheless, there still were limited situations in which respondents could answer one question in a manner that was inconsistent with their answer to a previous question.

Logical editing was the first step in processing many of the variables on the file. This procedure used data within a respondent's record to identify and address inconsistencies among related variables within a given module of the interview (e.g., within the hallucinogens section). As part of this procedure, variables were identified that had been legitimately skipped because the condition(s) for asking the questions did not apply.

As a general principle when editing data in all the modules, responses from one module (e.g., hallucinogens) were not used to edit variables in another module (e.g., inhalants).¹⁴ For this reason, data in one module may not be completely consistent with data in other modules. Subsequent discussion about editing in this section focuses on key drug use variables.

Editing Procedure for Drug Use Variables

Logical editing and processing of drug use variables in the tobacco through the sedatives modules first involved identifying whether respondents had ever used or never used the drug of interest. That included situations in which respondents initially refused to answer a question about their lifetime use of a drug but then changed their answer to "yes" or "no" on follow-up. If respondents did not provide sufficient information about their use or nonuse of a particular drug (or drug category), their final status was assigned through statistical imputation procedures. If values pertaining to lifetime use or nonuse of a given drug were changed through the editing procedures, this editing was indicated through special codes that indicated that a response was logically inferred; documentation for these codes includes the phrase "LOGICALLY ASSIGNED." In the hallucinogens, inhalants, pain relievers, tranquilizers, stimulants, and sedatives modules, for example, respondents who did not report lifetime use of a specific drug (e.g., LSD) but specified use of it as "some other drug" were logically inferred to be lifetime users of that drug. In the psychotherapeutics modules (i.e., pain relievers, tranquilizers, stimulants, and sedatives), respondents whose only reported lifetime use involved over-the-counter medications were logically inferred to have never used that particular prescription-type psychotherapeutic drug.

¹⁴ One exception to the principle of not editing across modules involved situations in which responses in one module governed whether respondents were asked questions in another module. For example, if respondents reported never using heroin, they were not asked questions in the noncore substance treatment module about treatment for heroin. Consequently, codes could be assigned to indicate that the respondents skipped out of the heroin treatment data because they had never used it.

Following determination of lifetime use or nonuse of a given drug, edits of the variables that established when respondents last used a drug of interest were probably the most critical. These edited recency-of-use variables were the precursors for the final, imputed measures that established the prevalence of use in the past 30 days, past 12 months, and lifetime.

The 2006 interview included follow-up probes for respondents who were lifetime users of a given drug but did not know or refused to report when they last used it. Respondents who initially did not know when they last used a drug were asked to give their "best guess" of when they last used it. Respondents who initially refused to report when they last used a drug were asked to reconsider answering the question. If respondents changed their initial answer of "don't know" or "refused" in response to these probes, the editing procedures incorporated data from these probes into the final, edited recency-of-use variables. For example, if respondents initially refused to report when they last used a drug but then reported last using it more than 30 days ago but within the past 12 months, their edited recency indicated use in that period, in the absence of any information that was inconsistent with what they reported in the probe (see below).

Situations were identified and flagged in which there were potential inconsistencies between a respondent's answer to a drug's recency question (or the answer in a follow-up probe) and other data in that module. For example, it would be inconsistent for a respondent to report last using a drug "more than 12 months ago" but also to report having first used it at his or her current age. These inconsistencies then were addressed by statistically imputing final values for the affected recency variable and the other variable(s) where the data were inconsistent with the respondent's original answer to the recency question.

Again, if values pertaining to the period when respondents last used a drug were changed through the editing procedures, special codes were assigned to indicate that these edits had been done. The documentation for these codes included the phrase "LOGICALLY ASSIGNED." For example, a code of 8 in a drug's recency-of-use variable means "Used at some point in the past 12 months LOGICALLY ASSIGNED." Specifically, if a respondent reported using a drug more than 30 days ago but within the past 12 months but other data suggested that the respondent may have used the drug more recently, this code of 8 indicated that at least it could be inferred that the respondent was a user in the past 12 months (and potentially more recently). Similarly, a code of 9 ("Used at some point in lifetime LOGICALLY ASSIGNED") indicated that the respondent was potentially a user in any period that was asked about for that particular drug, including the past 30 days. In particular, respondents were assigned a code of 9 if they initially answered "don't know" or "refused" to a drug's recency question and continued on follow-up to answer "don't know" or "refused" regarding when they last used it.

Standard Code Conventions

Generally, the following codes have the same (or consistent) meanings across all variables. Exceptions are noted in the documentation for individual variables.

- | | | |
|-------------------------|---|---|
| 91 or 991 or 9991, etc. | = | NEVER USED [DRUG(s) OF INTEREST] |
| 93 or 993 or 9993, etc. | = | USED [DRUG] BUT NOT IN THE PERIOD OF INTEREST |

94 or 994 or 9994, etc.	=	DON'T KNOW
97 or 997 or 9997, etc.	=	REFUSED
98 or 998 or 9998, etc.	=	BLANK (i.e., not answered; not asked the question)
99 or 999 or 9999, etc.	=	LEGITIMATE SKIP

The following analogous codes also were assigned as part of the logical editing process:

81 (or 981, 9981, etc.)	=	NEVER USED [DRUG(S) OF INTEREST] Logically assigned
83 (or 983, 9983, etc.)	=	USED [DRUG] BUT NOT IN THE PERIOD OF INTEREST Logically assigned
85 (or 985, 9985, etc.)	=	BAD DATA Logically assigned (i.e., usually inconsistent with other data)
89 (or 989, or 9989, etc.)	=	LEGITIMATE SKIP Logically assigned

The codes of 81, 83, 85, and 89 were given values in the 80s to signify that existing values were overwritten during editing. For example, if a respondent was somehow routed into the youth experiences module but that respondent was subsequently classified as being 18 or older, any answers that the respondent gave in the youth experiences module were overwritten with codes of 89 (or 989, etc.). These codes signify that this adult respondent logically was not eligible to be asked the youth experiences questions.

Codes of 85 (or 985, etc.), 94 (or 994, etc.), 97 (or 997, etc.), and 98 (or 998, etc.) are codes for missing data. In particular, codes of 98 (i.e., blank) could occur in the data for the following reasons:

- the respondent broke off the interview before reaching a particular question or section;
- the CAI program allowed the respondent to hit the ENTER key without providing a response (typically, in situations where respondents were asked to specify something, such as the name of some other drug that they had used); or
- the CAI program skipped the respondent past a question, but there was some uncertainty as to whether the skipped question applied or did not apply to the respondent (e.g., if subsequent questions about a drug were skipped because the respondent did not know whether he or she ever used that drug).

Statistical Imputation

Statistical imputation refers to the substitution of acceptable artificial values for missing values. These imputed values cannot be directly distinguished from nonimputed values. Using statistical imputation, missing data were replaced with nonmissing values for selected variables. These variables can be identified in the codebook by their labels, within which can be found the words "IMPUTATION REVISED." In addition, most imputation-revised variables have names with the prefix "IR." Associated indicator variables tell the user which values are imputed and

which ones are not. These indicator variables have the words "IMPUTATION INDICATOR" in their labels and are identified with the prefix "II." For some imputation-revised variables, additional imputation indicators are available, identified with the prefix "II2," giving more details about the source of the imputed or logically assigned value.

For all imputation-revised variables except those associated with nicotine dependence, the levels within the variables are limited to the valid responses in the interview itself. If neither editing nor imputation was required for any of these variables, the levels for the edited and imputation-revised variables are the same, with each level corresponding to a valid interview response. If an edited variable has a logically assigned value for which no imputation was required, that logically assigned value was converted to the associated valid interview response in the imputation-revised variable. Finally, levels in the edited variable that do not correspond to a valid interview response indicate that the information available for that respondent was incomplete and, consequently, imputation was required. In the imputation-revised variable, these levels were replaced by imputed values corresponding to valid interview responses, which were made consistent with any preexisting information related to that variable. Examples of levels indicating incomplete information include "bad data," "don't know," and "refused." Also, in the case of recency of use, some levels in the edited variable describe a more general recency than was designated from a valid interview response, which, in the imputation-revised variable, were replaced by imputed values consistent with the general recency level.

With the 2006 survey, the core drug use variables are recency of use, frequency of use in the past 12 months, frequency of use in the past 30 days, and age at first use. Age of first daily cigarette use and binge drinking frequency¹⁵ in the past 30 days are also core drug use variables. Imputation of missing values in these core drug use variables was accomplished using an imputation procedure developed specifically for the survey in 1999 and called predictive mean neighborhood (PMN). PMN is a combination of model-assisted and nearest neighbor hot-deck imputation methods and is described in detail in the *2006 NSDUH Methodological Resource Book*.¹⁶ In addition, the details of its application to the survey are described in the aforementioned report. Likewise, the PMN method also was used in the 2006 survey to impute missing values in the core demographic, employment status, immigrant status, income, insurance, and roster-derived household composition variables, as well as variables associated with responding pairs. In past years, weighted sequential hot deck was used to impute missing values in the immigrant status variables; PMN was used for the first time with these variables in the 2004 survey year.

The PMN method was not used for one set of variables for which imputations were performed: the variables associated with nicotine dependence. The imputations performed on these variables differ from other imputation-revised variables in three ways: (1) as stated, PMN was not used to impute missing values; (2) imputed values do not resemble preexisting

¹⁵ Binge alcohol use is defined as drinking five or more drinks on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. Heavy alcohol use is defined as drinking five or more drinks on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also binge alcohol users.

¹⁶ Center for Behavioral Health Statistics and Quality. (2008). *2006 National Survey on Drug Use and Health: Methodological resource book*. Rockville, MD: Substance Abuse and Mental Health Services Administration. (See https://archive.samhsa.gov/data/Methodological_Reports.aspx.)

nonmissing values; and (3) not all missing values are imputed. Details on the nicotine dependence imputations are given in the *2006 NSDUH Methodological Resource Book*.

To protect confidentiality, the imputation-revised race and Hispanic origin variables were not included on this file. This information is provided in a recoded variable that combines race and Hispanic ethnicity (NEWRACE2). The original version of the imputation-revised education level variable also was omitted from this file and replaced by a recoded version (IREduc2). However, the original marital status variable (IRMARIT) and employment status variables (EMPSTAT4 and EMPSTATY) are included. Although no missing data were possible for gender, the "IR" prefix for IRSEX was maintained for continuity with past years. A complete description of the processing of demographic variables is given in the *2006 NSDUH Methodological Resource Book*.

For the roster-derived household composition variables, many of the edited variables were not included on this file in order to protect confidentiality. All of the imputation-revised variables were replaced with recoded variables. All of the variables associated with responding pairs were also removed for this file. A complete description of the processing of the roster and pair variables is given in the *2006 NSDUH Methodological Resource Book*.

Variance Estimation of Totals

Prevalence rates are the proportions of the population who exhibit characteristics of interest (such as substance use). Let \hat{p}_d represent the prevalence rate of interest for domain d . Then \hat{p}_d would be defined as the ratio

$$\hat{p}_d = \frac{\hat{Y}_d}{\hat{N}_d},$$

where \hat{Y}_d = estimated number of persons exhibiting the characteristic of interest in domain d , and \hat{N}_d = estimated population total for domain d .

\hat{N}_d is estimated as $\sum w_i \delta_i$, where w_i represents the analysis weight and δ_i represents an indicator variable, which is defined as

$$\delta_i(d) = \begin{cases} 1 & \text{if the } i^{\text{th}} \text{ sample unit is in subgroup } d, \\ 0 & \text{otherwise.} \end{cases}$$

The sampling error of an estimate is the error caused by the selection of a sample instead of conducting a census of the population. The sampling error may be reduced by selecting a large sample and/or by using efficient sample design and estimation strategies, such as stratification, optimal allocation, and ratio estimation. The use of probability sampling methods in NSDUH allows estimation of sampling error from the survey data. The standard errors are used to identify unreliable estimates and to test for the statistical significance of differences between estimates.

Suitable software packages, such as SUDAAN,¹⁷ can be used to calculate direct estimates of \hat{Y}_d and \hat{N}_d (and, therefore, \hat{p}_d), and also can be used to estimate their respective standard errors. Although the standard errors of estimates of means and proportions can be calculated appropriately in software (such as SUDAAN) using a Taylor series linearization approach, standard errors of estimates of totals may be underestimated in situations where the domain size is poststratified to data from the U.S. Census Bureau.

When the domain size, \hat{N}_d , is free of sampling error, an appropriate estimate of the standard error for the total number of persons with a characteristic of interest is

$$SE(\hat{Y}_d) = \hat{N}_d SE(\hat{p}_d).$$

This approach is theoretically correct when the domain size estimates, \hat{N}_d , are among those forced to match their respective U.S. Census Bureau population estimates through the weight calibration process.¹⁸ In these cases, \hat{N}_d is not subject to a sampling error induced by the NSDUH design. For estimated domain totals, \hat{Y}_d , where \hat{N}_d is not fixed (i.e., where domain size estimates are not forced to match the U.S. Census Bureau population estimates), this formulation still may provide a good approximation if it can be assumed that the sampling variation in \hat{N}_d is negligible relative to the sampling variation in \hat{p}_d . This is a reasonable assumption for many cases in this study.

For various subsets of estimates, the above approach yielded an underestimate of the variance of a total because \hat{N}_d was subject to considerable variation. Because of this underestimation, alternatives for estimating standard errors of totals can be implemented.

A "mixed" method approach can be used to improve the accuracy of standard errors and to better reflect the effects of poststratification on the variance of total estimates. This approach assigns the method of standard error calculation to domains (subgroups for which the estimates were calculated) so that all estimates among a select set of domains with fixed \hat{N}_d were calculated using the formula above, and all other estimates were calculated directly in SUDAAN. The set of domains considered controlled (i.e., those with a fixed \hat{N}_d) was restricted to main effects and two-way interactions in order to maintain continuity between years. The use of such standard errors did not affect the standard error estimates for the corresponding proportions because all standard errors for means and proportions are calculated directly in SUDAAN. [Table 1](#) contains a list of domains with fixed \hat{N}_d for the public use file.

Statistical Significance of Differences

Because of the 2002 NSDUH methodology changes, the 2002 data constitute a new baseline for tracking trends in substance use and other measures. *As noted previously, it is not considered appropriate to make comparisons of the 2002 through 2006 CAI estimates with 2001 and earlier NHSDA estimates to assess changes in substance use over time. If comparisons such as these are made, it is recommended that they be interpreted with caution.* For a more detailed description of the changes to the 2002 NSDUH methodology, see Appendix C of the national findings report for the 2002 NSDUH.¹⁹

Customarily, the observed difference between estimates is evaluated in terms of its statistical significance. Statistical significance is based on the *p* value of the test statistic and refers to the probability that a difference as large as that observed would occur because of random variability in the estimates if there were no difference in the prevalence estimates for the population groups being compared. The significance of observed differences is generally reported at the 0.05 and 0.01 levels.

When comparing prevalence estimates, one can test the null hypothesis (no difference between prevalence estimates) against the alternative hypothesis (there is a difference in prevalence estimates) using the standard difference in proportions test expressed as

$$Z = \frac{\hat{p}_1 - \hat{p}_2}{\sqrt{\text{var}(\hat{p}_1) + \text{var}(\hat{p}_2) - 2\text{cov}(\hat{p}_1, \hat{p}_2)}}$$

¹⁹ Office of Applied Studies. (2003). *Results from the 2002 National Survey on Drug Use and Health: National findings* (HHS Publication No. SMA 03-3836, NSDUH Series H-22). Rockville, MD: Substance Abuse and Mental Health Services Administration.

where \hat{p}_1 = first prevalence estimate, \hat{p}_2 = second prevalence estimate, $\text{var}(\hat{p}_1)$ = variance of first prevalence estimate, $\text{var}(\hat{p}_2)$ = variance of second prevalence estimate, and $\text{cov}(\hat{p}_1, \hat{p}_2)$ = covariance between \hat{p}_1 and \hat{p}_2 . Note that the first and second prevalence estimates may take the form of prevalence estimates from two different survey years (e.g., 2005 and 2006, respectively), prevalence estimates from sets of combined survey data (e.g., 2003-2004 annual averages and 2004-2005 annual averages, respectively), or prevalence estimates for populations of interest within a single survey year.

Under the null hypothesis, Z is asymptotically distributed as a normal random variable. Therefore, calculated values of Z can be referred to the unit normal distribution to determine the corresponding probability level (i.e., p value). Because the covariance term between the two estimates is not necessarily zero, SUDAAN may be used to compute estimates of Z along with the associated p values such that the covariance term is calculated by taking the sample design into account.

When comparing population subgroups defined by three or more levels of a categorical variable, log-linear chi-square tests of independence of the subgroup and the prevalence variables should be conducted first to control the error level for multiple comparisons. If the chi-square test indicates overall significant differences, the significance of each particular pairwise comparison of interest may be tested using SUDAAN analytic procedures to properly account for the sample design. A detailed description of this test statistic, which is based on the Wald statistic, can be found in the SUDAAN user's manual.²⁰

Use of Sample Weights and Sample Design Variables

Because of various adjustments, such as those for nonresponse and poststratification, the 2006 NSDUH sample design is not self-weighting. *Analysts are advised to use the final sample weight when attempting to use the 2006 NSDUH data to draw inferences about the target population or any subdomains of the target population.* All estimates published in SAMHSA reports (such as results from the 2006 NSDUH²¹) are weighted using the final analysis weight for the full sample. For the public use file, the corresponding final sample weight is denoted as ANALWT_C, with the "C" denoting confidentiality protection. This sample weight represents the total number of target population persons each record on the file represents. Note that the sum of ANALWT_C, over all records on the data file, represents an estimate of the total number of people in the target population. Additional information on the full sample weighting procedures and the sample weight components is described in the *2006 NSDUH Methodological Resource Book*.²²

The public use file contains two sample design variables in addition to ANALWT_C. These variables are VESTR (variance estimation [pseudo] stratum) and VEREP (variance estimation [pseudo] replicate within each stratum) and must be used to estimate variances and standard errors when using commercially available variance estimation software packages. SAMHDA's online Survey Documentation and Analysis (SDA) system also has this capacity and

²⁰ See footnote 3.

²¹ See the documents listed at the end of the Overview of NSDUH section in this codebook introduction.

²² See footnote 16.

is available for public use. However, SDA uses the terms "Stratum" and "Cluster," which correspond, respectively, to VESTR and VEREP in the public use file.

Because of a split-sample design in 2004, analyses using 2004 data from either the adult mental health (renamed to psychological distress in 2006) module or the adult depression module need to be conducted using a different weight variable. In 2004, adult respondents aged 18 or older were split approximately evenly, where respondents in sample A were administered the full adult mental health module as it had been administered in 2002 and 2003, and respondents in sample B were administered a short version of the adult mental health module in addition to the adult depression module as it was administered in 2005 and 2006.

For 2004, analyses that include the adult mental health variables for major depressive episode (MDE) and/or unadjusted serious psychological distress (SPD) should (1) select either sample A or sample B by using the ADLTSAMP variable (ADLTSAMP = 1 corresponds to sample A, and ADLTSAMP = 2 corresponds to sample B) to restrict the analysis to the appropriate half sample, and (2) use SPDWT_C as the weight variable. (SPDWT_C essentially weights the adult half sample up to generate estimates comparable in magnitude with those for the entire adult sample.) When combining 2004 adult half-sample data with data for survey years that have comparably defined adult mental health variables, the weight variable (SPDWT_C for 2004 and ANALWT_C for the other years in the analysis) should be divided by the total number of years in the analysis.

Confidentiality of Data

To protect the confidentiality of respondents to the 2006 NSDUH, the full analytic file of 67,491 persons was treated using RTI's innovative statistical disclosure limitation method called MASSC,^{23,24,25} which consists of the following four major steps: **Micro Agglomeration**, **optimal probabilistic Substitution**, **optimal probabilistic Subsampling**, and **optimal sampling weight Calibration**. All directly identifying information on the file was eliminated. In addition, census region, state, and other geographic identifiers were removed. This is an individual record file, and the household link between respondents from the same household has been removed.

All variables on the file were reviewed for the possibility of identifying the respondent by combining a number of them at one time. Variables considered to have a high potential of personal identification, as well as a high value for analysis, were treated by standard procedures of categorization and top-and-bottom coding. Using the selected key identifying variables, the

²⁵ Singh, A., Yu, F., & Wilson, D. H. (2004, August). Measures of information loss and disclosure risk under MASSC treatment of micro-data for statistical disclosure limitation. In *Proceedings of the 2004 Joint Statistical Meetings, American Statistical Association, Section on Survey Research Methods, Toronto, Canada* (pp. 4374-4381). Alexandria, VA: American Statistical Association.

data were partitioned into risk strata to control for level of treatment in the micro agglomeration step. In addition, two other techniques were used in MASSC to introduce sufficient uncertainty for any person who attempted to identify an individual and his or her confidential responses. First, on a random basis, a sample of records was drawn, and variables were substituted from a similar donor record. Substitution introduces uncertainty about the identity of a record in the database. This process makes it difficult for an intruder to be certain that any record corresponds to a specific individual because some of the variables used to identify the record may have come from other individuals. Second, a portion of the records was randomly removed from the file to reduce the probability that any known respondent was in the public use file. This step, referred to as subsampling, introduces further uncertainty about the presence of a target record in the database. The result is that there is a very small probability of identifying an individual from the file.

Substitution and subsampling were done while simultaneously constraining the resultant file to a minimal increase in bias and a minimal decrease in precision for numerous estimates of drug use prevalence across a number of domains. In addition, the weights on the final file were recalibrated to known totals from the full analytic file so as to minimize the decrease in precision owing to the two techniques. Under the MASSC framework, both disclosure risk and information loss are controlled and measured simultaneously.

A further disclosure control procedure includes the treatment of the design variables (VESTR and VEREP). These stratum and replicate identifiers were treated by coarsening and by substitution. In addition, certain variables were recoded (e.g., by collapsing of rare levels) for confidentiality reasons.

A number of variables were reviewed after the above process was undergone in order to determine the impact of these techniques on the bias and precision of estimates compared with those from the full (i.e., untreated) file. These variables included both variables for which partial records were substituted, as well as other variables that were not perturbed. In addition, the precision was studied for 340 combinations of 34 domains and 10 response variables (e.g., the combination of alcohol past month use in the 12 to 17 age group). The ratio of the estimates from the full file and the public use file was calculated for each domain/response variable combination. For the 10 response variables, the average ratio over the 34 domains was within the 0.99 to 1.01 range. Similarly, to assess the decrease in precision, the standard error was compared between the public use file and the full file. For the 10 response variables, the average increase in standard error over the 34 domains was about 7 to 10 percent.

These statistical disclosure limitation methods have been implemented in such a way that the public use file continues to be representative of civilian members of the noninstitutionalized population in the United States.

Public Use File Estimates and Standard Errors

The sampling weights on the public use file were adjusted for subsampling and calibrated with respect to 45 demographic domains. A list of the domains can be found in [Table 1](#). Note that the domains listed in [Table 1](#) are different from those shown in Table B.1 of the national

findings report for the 2006 NSDUH²⁶ because of different adjustments applied to the weights on the public use file. Survey analysis software can be used with these weights, along with the sample design variables VESTR and VEREP, to estimate various parameters and their standard errors. Tables 2 and 3 show prevalence estimates and their standard errors for certain demographic domains that were not included in the calibration constraints. Table 2 shows the ratio of prevalence estimates and standard errors from the public use file subsample to the full sample for past month marijuana use, a relatively high prevalence drug. The results are shown for seven demographic domains. Table 3 shows the same ratios for past year heroin use, a relatively low prevalence drug.

Table 2. Past Month Marijuana Prevalence and Standard Error Ratios of Public Use File Subsample to the Full Sample, by Seven Domains: 2006

Domain	Prevalence Ratio	Standard Error Ratio
Non-Hispanic American Indian or Alaska Native	0.97	1.02
Non-Hispanic Native Hawaiian or Other Pacific Islander	0.97	1.01
Non-Hispanic Asian	1.14	1.46
Non-Hispanic Two or More Races	1.01	1.18
Household with Four Members	0.97	1.04
Household with Five Members	1.02	1.00
Household with Six or More Members	1.01	1.21

Note: *Ratio* = [*Public use file subsample estimate* / *Full sample estimate*].

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2006 (Revised March 2012).

Table 3. Past Year Heroin Prevalence and Standard Error Ratios of Public Use File Subsample to the Full Sample, by Seven Domains: 2006

Domain	Prevalence Ratio	Standard Error Ratio
Non-Hispanic American Indian or Alaska Native	1.14	1.13
Non-Hispanic Native Hawaiian or Other Pacific Islander	1.00	1.01
Non-Hispanic Asian	.	.
Non-Hispanic Two or More Races	1.32	1.40
Household with Four Members	0.92	1.11
Household with Five Members	1.10	1.16
Household with Six or More Members	1.08	1.16

Note: [1] *Ratio* = [*Public use file subsample estimate* / *Full sample estimate*].

[2] Missing cells are due to zero observed prevalence rate in the respective race/ethnicity domain.

New and Corrected Data Since Last Release

Since the release of the previous version of the 2006 Public Use Data File and Codebook on February 6, 2015, a number of variables have been added (see Table 4).

²⁶ See the documents listed at the end of the Overview of NSDUH section in this codebook introduction.

Table 4. Variables Added to the 2006 Public Use Data File and Codebook

Module	Variable Added	Label

For the sake of consistency with other variables, a modification was made to two variables for missing and legitimate skip values (see [Table 5](#)).

Table 5. Variables Updated in the 2006 Public Use Data File and Codebook

Module	Variable Updated	Label
NON-CORE DEMOGRAPHICS	EDUCATN2	WHAT GRADE IN NOW/WILL BE IN
EMPLOYMENT AND WORKPLACE	JBSTATR2	WORK SITUATION IN PAST WEEK - RECODE

The codebook section titled Selected Unedited Variables has been dropped. It was determined that the raw variables contained in this section provided no analytic value because edited versions exist on the data file. Additionally, the appendix titled Recoded Serious Psychological Distress Variable Documentation has been renamed as Recoded Mental Health.

IDENTIFICATION

IDENTIFICATION

The following variable, QUESTID2, is a unique record identifier within a particular study year. The IDs may be repeated in other study years, so analysts should always consider the study year when using the QUESTID2. It should be noted that this variable was referred to as QUESTID in prior years.

QUESTID2 Len : 7 RESPONDENT IDENTIFICATION

The following variable, FILEDATE, represents the date the SAS data file was created.

FILEDATE Len : 10 CREATION DATE OF THE DATA FILE

TOBACCO

SELF-ADMINISTERED SUBSTANCE USE SECTIONS

TOBACCO

These questions are about your use of tobacco products. This includes cigarettes, chewing tobacco, snuff, cigars, and pipe tobacco. The first questions are about cigarettes only.

Have you ever smoked part or all of a cigarette?

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

CIGEVER	Len : 1	EVER SMOKED A CIGARETTE		
			Freq	Pct
		1 = Yes	30728	55.83
		2 = No.....	24307	44.17

If one of your best friends offered you a cigarette, would you smoke it?

CIGOFRSM	Len : 2	IF BEST FRIEND OFFERED, WOULD YOU SMOKE CIG		
			Freq	Pct
		1 = Definitely Yes.....	16	0.03
		2 = Probably Yes	155	0.28

NOTE: Prior to 2004, the question corresponding to CIG30MEN asked whether respondents smoked menthol or regular cigarettes most often. In 2004, the question was changed to the yes/no question shown below, but the variable name stayed as CIG30MEN. This change in question content does not affect trend comparisons for 2004 onward. However, data in CIG30MEN for 2004 onward are not likely to be comparable with data in CIG30MEN for 2002 and 2003.

Were the cigarettes you smoked during the past 30 days menthol?

CIG30MEN	Len : 2	MENTHOL OR REG CIG SMOKED MOST PAST 30 DAYS	Freq	Pct

These next questions are about your use of snuff, sometimes called dip. Snuff is a finely ground form of tobacco that usually comes in a container called a tin. You can use snuff by placing a pinch or dip in your mouth between your lip and gum or between your cheek and gum. Snuff can also be inhaled through the nose. Snuff is sold in both loose form or in ready-to-use packets.

Have you ever used snuff, even once?

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

ALCOHOL

ALCOHOL

These questions are about drinks of alcoholic beverages. Throughout these questions, by a "drink," we mean a can or bottle of beer, a glass of wine or a wine cooler, a shot of liquor, or a mixed drink with liquor in it. We are not asking about times when you only had a sip or two from a drink.

Have you ever, even once, had a drink of any type of alcoholic beverage? Please do not include times when you only had a sip or two from a drink.

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

ALCEVER Len : 2 EVER HAD DRINK OF ALCOHOLIC BEVERAGE

MARIJUANA

MARIJUANA

The next questions are about marijuana and hashish. Marijuana is also called pot or grass. Marijuana is usually smoked, either in cigarettes, called joints, or in a pipe. It is sometimes cooked in food. Hashish is a form of marijuana that is also called "hash." It is usually smoked in a pipe. Another form of hashish is hash oil.

Have you ever, even once, used marijuana or hashish?

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

MJEVER Len : 2 EVER USED MARIJUANA/HASHISH

HALLUCINOGENS

HALLUCINOGENS

The next questions are about substances called hallucinogens. These drugs often cause people to see or experience things that are not real.

A list of some common hallucinogens is shown below. These and many other substances that people use as hallucinogens are often known by street names, and we can't list them all. Please take a moment to look at the substances listed below so you know what kind of drugs the next questions are about.

- LSD, also called "acid"
- PCP, also called "angel dust" or phencyclidine
- Peyote
- Mescaline
- Psilocybin
- "Ecstasy," also called MDMA

Have you ever, even once, used LSD, also called "acid"?

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

LSD Len : 2 EVER USED LSD ("ACID")

	Freq	Pct
1 = Yes	4147	7.54
2 = No.....	3526	6.41
3 = Yes LOGICALLY ASSIGNED	6	0.01
85 = BAD DATA Logically assigned.....	2	0.00
91 = NEVER USED HALLUCINOGENS	47299	85.94
94 = DON'T KNOW.....	46	0.08
97 = REFUSED	9	0.02

Have you ever, even once, used PCP, also called "angel dust" or phencyclidine?

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

PCP Len : 2 EVER USED PCP ("ANGEL DUST," PHENCYCLIDINE)

	Freq	Pct
1 = Yes	1105	2.01
2 = No.....	6579	11.95
3 = Yes LOGICALLY ASSIGNED	1	0.00
85 = BAD DATA Logically assigned.....	2	0.00
91 = NEVER USED HALLUCINOGENS	47299	85.94
94 = DON'T KNOW.....	41	0.07
97 = REFUSED	8	0.01

Have you ever, even once, used peyote?

PEYOTE Len : 2 EVER USED PEYOTE

	Freq	Pct
1 = Yes	854	1.55
2 = No.....	6813	12.38
85 = BAD DATA Logically assigned.....	2	0.00

INHALANTS

INHALANTS

These next questions are about liquids, sprays, and gases that people sniff or inhale to get high or to make them feel good. We are not interested in times when you inhaled a substance accidentally - such as when painting, cleaning an oven, or filling a car with gasoline.

The questions use the term "inhalant" to include all the things listed below, as well as any other substances that people sniff or inhale for kicks or to get high. Take a moment to look at the substances listed below so you know what kinds of liquids, sprays, and gases these questions are about.

- Amyl nitrite, "poppers," locker room odorizers, or "rush"
- Correction fluid, degreaser, or cleaning fluid
- Gasoline or lighter fluid
- Glue, shoe polish, or toluene
- Halothane, ether, or other paint solvents
- Lighter gases, such as butane or propane
- Nitrous oxide or "whippets"
- Spray paints
- Other aerosol sprays

Have you ever, even once, inhaled amyl nitrite, "poppers," locker room odorizers, or "rush" for kicks or to get high?

AMYLNIT Len : 2 EVER INHALED AMYL NITRITE, "POPPERS," RUSH, ETC.

	Freq	Pct
1 = Yes	1458	2.65
2 = No.....	4640	8.43
3 = Yes LOGICALLY ASSIGNED	2	0.00
85 = BAD DATA Logically assigned.....	1	0.00
91 = NEVER USED INHALANTS.....	48905	88.86
94 = DON'T KNOW.....	26	0.05
97 = REFUSED	3	0.01

Have you ever, even once, inhaled correction fluid, degreaser, or cleaning fluid for kicks or to get high?

CLEFLU Len : 2 EVER INHALED CORRECTION FLUID, DEGREASER, ETC.

	Freq	Pct
1 = Yes	737	1.34
2 = No.....	5348	9.72
3 = Yes LOGICALLY ASSIGNED	26	0.05
85 = BAD DATA Logically assigned.....	1	0.00
91 = NEVER USED INHALANTS.....	48905	88.86
94 = DON'T KNOW.....	16	0.03
97 = REFUSED	2	0.00

Have you ever, even once, inhaled gasoline or lighter fluid for kicks or to get high?

GAS Len : 2 EVER INHALED GASOLINE OR LIGHTER FLUID

	Freq	Pct
1 = Yes	1393	2.53
2 = No.....	4717	8.57
3 = Yes LOGICALLY ASSIGNED	3	0.01
85 = BAD DATA Logically assigned.....	1	0.00
91 = NEVER USED INHALANTS.....	48905	88.86
94 = DON'T KNOW.....	10	0.02
97 = REFUSED	6	0.01

Have you ever, even once, inhaled glue, shoe polish, or toluene for kicks or to get high?

GLUE Len : 2 EVER INHALED GLUE, SHOE POLISH, OR TOLUENE

	Freq	Pct
1 = Yes	1348	2.45
2 = No.....	4755	8.64
3 = Yes LOGICALLY ASSIGNED	4	0.01
85 = BAD DATA Logically assigned.....	1	0.00
91 = NEVER USED INHALANTS.....	48905	88.86
94 = DON'T KNOW.....	20	0.04
97 = REFUSED	2	0.00

INHALANTS

Have you ever, even once, inhaled halothane, ether, or other anesthetics for kicks or to get high?

ETHER	Len : 2 EVER INHALED HALOTHANE, ETHER, OR OTHER ANESTHETIC		
	1 = Yes	Freq	Pct
	2 = No.....	322	0.59
	85 = BAD DATA Logically assigned.....	5773	10.49

INHALANTS

The answers that people give us about their use of inhalants are important to this study's success. We know that this information is personal, but remember your answers will be kept confidential.

Please think again about answering this question: Have you ever, even once, used any type of inhalant for kicks or to get high?

NOTE: This variable was coded as 1 if respondents answered yes to the above question and 91 if respondents answered the above question as no (see below). This variable also was coded as 1 if the questions corresponding to any of the following variables were answered as yes: AMYLNIT, CLEFLU, GAS, GLUE, ETHER, SOLVENT, LGAS, NITOXID, SPPAINT, AEROS, or INHNOLST. This variable also was coded as 91 if all of the above variables were coded as 91.

INHEVER	Len : 2 EVER USED INHALANTS

99 = LEGITIMATE SKIP.....	297	0.54

PAIN RELIEVERS

PAIN RELIEVERS

Now we have some questions about drugs that people are supposed to take only if they have a prescription from a doctor. We are only interested in your use of a drug if:

- the drug was not prescribed for you, or
- you took the drug only for the experience or feeling it caused.

These questions are about the use of pain relievers. We are not interested in your use of "over-the-counter" pain relievers such as aspirin, Tylenol, or Advil that can be bought in drug stores or grocery stores without a doctor's prescription.

Card A shows pictures of some different kinds of prescription pain relievers and lists the names of some others. These pictures show only pills, but we are interested in your use of any form of prescription pain relievers that were not prescribed for you or that you took only for the experience or feeling they caused. Please look at Card A carefully as you answer the next questions.

Have you ever, even once, used Darvocet, Darvon, or Tylenol with codeine that was not prescribed for you or that you took only for the experience or feeling it caused?

DARVTYLC

Len : 2 EVER USED DARVOCET, DARVON, OR TYLENOL W/ CODEINE

	Freq	Pct

The answers that people give us about their use of prescription pain relievers are important to this study's success. We know that this information is personal, but remember your answers will be kept confidential.

Please think again about answering this question: Have you ever, even once, used any type of prescription pain reliever that was not prescribed for you or that you took only for the experience or feeling it caused?

NOTE: This variable was coded as 1 if respondents answered yes to the above question and 91 if respondents answered the above question as no (see below). This variable also was coded as 1 if the questions corresponding to any of the following variables were answered as yes: DARVTYLC, PERCTYLX, VICOLOR, ANLCARD, or ANLNOLST. This variable also was coded as 81 or 91 if all of the above variables were coded as 81 or 91, respectively.

NOTE: Although the Food and Drug Administration (FDA) did not approve OxyContin for medical use in the United States until late 1995, no editing was done to OXYCAGE when respondents reported first using OxyContin at ages that would indicate nonmedical use prior to FDA approval. Although no editing was done for these cases, caution is advised in interpreting data from these respondents, and particularly the farther that OXYCAGE would be from first use in 1995.

Now think only about your use of Oxycontin that was not prescribed for you or that you took only for the experience or feeling it caused. How old were you the first time you used Oxycontin in either of these ways?

How old were you the first time you used Oxycontin that was not prescribed for you or that you took only for the experience or feeling it caused?

TRANQUILIZERS

TRANQUILIZERS

These next questions ask about the use of tranquilizers. Tranquilizers are usually prescribed to relax people, to calm people down, to relieve anxiety, or to relax muscle spasms. Some people call tranquilizers "nerve pills."

Card B shows pictures of some different kinds of prescription tranquilizers. These pictures show only pills, but we are interested in your use of any form of prescription tranquilizers that were not prescribed for you, or that you took only for the experience or feeling they caused.

Please look at Card B carefully as you answer the next questions.

TRANQUILIZERS

The answers that people give us about their use of prescription tranquilizers are important to this study's success. We know that this information is personal, but remember your answers will be kept confidential.

Please think again about answering this question: Have you ever, even once, used any type of prescription tranquilizer that was not prescribed for you or that you took only for the experience or feeling it caused?

NOTE: This variable was coded as 1 if respondents answered yes to the above question and 91 if respondents answered the above question as no (see below). This variable also was coded as 1 if the questions corresponding to any of the following variables were answered as yes: KLONOPIN, XNAXATVN, VALMDIAZ, TRNCARD, or TRNOLST. This variable also was coded as 81 or 91 if all of the above variables were coded as 81 or 91, respectively.

TRNEVER Len : 2 EVER USED TRANQUILIZERS NONMEDICALLY

STIMULANTS

STIMULANTS

These next questions ask about the use of drugs such as amphetamines that are known as stimulants, "uppers," or "speed." People sometimes take these drugs to lose weight, to stay awake, or for attention deficit disorders. We are not interested in the use of "over-the-counter" stimulants such as Dexatrim or No-Doz that can be bought in drug stores or grocery stores without a doctor's prescription.

Card C shows pictures of some different kinds of prescription stimulants and lists the names of some others. These pictures show only pills, but we are interested in your use of any form of prescription stimulants that were not prescribed for you, or that you took only for the experience or feeling they caused. Please look at Card C carefully as you answer the next questions.

Have you ever, even once, used Methamphetamine, Desoxyn, or Methedrine that was not prescribed for you or that you took only for the experience or feeling it caused? Methamphetamine is also known as crank, crystal, ice, or speed.

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

METHDES Len : 2 EVER USED METHAMPHETAMINE, DESOXYN, OR METHEDRINE

	Freq	Pct

The answers that people give us about their use of prescription stimulants are important to this study's success. We know that this information is personal, but remember your answers will be kept confidential.

Please think again about answering this question: Have you ever, even once, used any type of prescription stimulant that was not prescribed for you or that you took only for the experience or feeling it caused?

NOTE: This variable was coded as 1 if respondents answered yes to the above question and 91 if respondents answered the above question as no (see below). This variable also was coded as 1 if the questions corresponding to any of the following variables were answered as yes: METHDES, DIETPILS, RITMPHEN, STMCARD, or STMNOLST. This variable also was coded as 81 or 91 if all of the above variables were coded as 81 or 91, respectively.

99 = LEGITIMATE SKIP.....	319	0.58

SEDATIVES

SEDATIVES

These next questions ask about the use of sedatives or barbiturates. These drugs are also called "downers," or "sleeping pills." People take these drugs to help them relax or to help them sleep. We are not interested in the use of "over-the-counter" sedatives such as Sominex, Unisom, Nytol, or Benadryl that can be bought in drug stores or grocery stores without a doctor's prescription.

Card D shows pictures of some different kinds of prescription sedatives and lists the names of some others. These pictures show only pills, but we are interested in your use of any form of prescription sedatives that were not prescribed for you, or that you took only for the experience or feeling they caused. Please look at Card D carefully as you answer the next questions.

Have you ever, even once, used Methaqualone, Sopor, or Quaalude that was not prescribed for you or that you took only for the experience or feeling it caused?

METHAQ Len : 2 EVER USED METHAQUALONE, SOPOR, OR QUAALUDE

The answers that people give us about their use of prescription sedatives are important to this study's success. We know that this information is personal, but remember your answers will be kept confidential.

Please think again about answering this question: Have you ever, even once, used any type of prescription sedative that was not prescribed for you or that you took only for the experience or feeling it caused?

NOTE: This variable was coded as 1 if respondents answered yes to the above question and 91 if respondents answered the above question as no (see below). This variable also was coded as 1 if the questions corresponding to any of the following variables were answered as yes: METHAQ, NEMBBARB, RESTTMAZ, SEDCARD, or SEDNOLST. This variable also was coded as 81 or 91 if all of the above variables were coded as 81 or 91, respectively.

RECODED DRUG USE

The following three variables, BRNCIG05, BRNCGR05, BRSMK5_2, were created with the intent to show the 25 (Cigarette and Cigar) and 15 (Smokeless Tobacco) most used brands in alphabetical order within the overall population. The most widely used brands for each tobacco product and the ranking of these brands were determined by examining weighted frequencies of the respective source variables among all users of that tobacco product. Once the brand ordering was determined, the top 25 or 15 were chosen and the analysis variables were created as defined below. The brand ordering was determined using the 2005 weighted data.

For each of these tobacco brand variables, all persons who indicated no past month use were set to the SAS missing code. The category "Other Brands" contains all past month users who reported other valid brands not otherwise defined in one of the other levels. The category "Unknown Brands" contains past month users who did not specify a specific tobacco brand.

The following three variables (CPNSTMFG, CPNSTMYR, CPNSTMMN), like the preceding three variables (STMFLAG, STMYR, STMMON), report lifetime, past year, and past month stimulant use. However, whereas STMFLAG, STMYR, and STMMON used the core-only methamphetamine variables MTHFLAG, MTHYR, and MTHMON in their construction, these three variables use the core-plus-noncore methamphetamine variables CPNMTHFG, CPNMTHYR, and CPNMTHMN. For details on the core-plus-noncore methamphetamine variables, please see Appendix B.4.6 of the 2006 Summary of Findings Report. (NOTE: CPN is an abbreviation for Core-Plus-Noncore.)

CPNSTMFG	Len : 1 CPN STIMULANTS - EVER USED		
		Freq	Pct
	0 = Never Used.....	50228	91.27
	1 = Ever Used.....	4807	8.73

CPNSTMYR	Len : 1 CPN STIMULANTS - PAST YEAR USE		
		Freq	Pct
	0 = Did not use in the past year	53755	97.67
	1 = Used within the past year.....	1280	2.33

CPNSTMMN	Len : 1 CPN STIMULANTS - PAST MONTH USE		
		Freq	Pct
	0 = Did not use in the past month	54584	99.18
	1 = Used within the past month.....	451	0.82

The following three variables (MTHFLAG, MTHYR, MTHMON), report recency of use for methamphetamine using only core data from the Stimulants module of the questionnaire, unlike the next three variables (CPNMTHFG, CPNMTHYR, CPNMTHMN), which use additional methamphetamine use data from the Special Drugs module. Methamphetamine use data were first added to the Special Drugs module in 2005, then were augmented in 2006 to include further clarifications. For details, please see Appendix B.4.6 of the Results from the 2006 NSDUH: National Findings Report.

MTHFLAG	Len : 1 METHAMPHETAMINE - EVER USED		
		Freq	Pct
	0 = Never Used (IRMTHRC = 9)	52879	96.08
	1 = Ever Used (IRMTHRC = 1-3)	2156	3.92

MTHYR	Len : 1 METHAMPHETAMINE - PAST YEAR USE		
		Freq	Pct
	0 = Did not use in the past year (IRMTHRC = 3,9)	54602	99.21
	1 = Used within the past year (IRMTHRC = 1,2)	433	0.79

MTHMON	Len : 1 METHAMPHETAMINE - PAST MONTH USE		
		Freq	Pct
	0 = Did not use in the past month (IRMTHRC = 2-3,9)	54886	99.73
	1 = Used within the past month (IRMTHRC = 1)	149	0.27

The following three variables (CPNMTHFG, CPNMTHYR, CPNMTHMN), like the preceding three variables (MTHFLAG, MTHYR, MTHMON), report lifetime, past year, and past month methamphetamine use. However, MTHFLAG, MTHYR, and MTHMON are based only on data from the methamphetamine questions in the stimulants section of the prescription drug module of the core questionnaire. In 2005 new methamphetamine items were added to the non-core Special Drugs module to capture methamphetamine users who failed to report the drug in the prescription stimulants module. These were augmented in 2006 to include clarifications. The new non-core Special Drugs items were used to construct the final CPNMTHFG, CPNMTHYR, and CPNMTHMN variables in 2006. Bernoulli stochastic imputations subsequently were developed for 2002 to 2005 data to approximate what the corresponding estimates would have been in those years if the methamphetamine items had been included. These variables should be used with caution, however, since the imputation of thousands of values sometimes results in "unusual" cases that may adversely affect analyses of small subsets of the data. For details, please see Appendix B.4.6 of the 2006 Summary of Findings Report. (NOTE: CPN is an abbreviation for Core-Plus-Noncore.)

CPNMTHFG	Len : 1 CPN METHAMPHETAMINE - EVER USED		
		Freq	Pct
	0 = Never Used.....	52278	94.99
	1 = Ever Used.....	2757	5.01

		Freq	Pct
	RANGE = 1921 - 2006.....	25430	46.21
	9999 = NEVER USED	29605	53.79

The following variable, MJOFLAG, was created by examination of MRJFLAG and then HALFLAG, HERFLAG, COCFLAG, INHFLAG, and PSYFLAG2.

MJOFLAG	Len : 1 MARIJUANA ONLY - EVER USED		
		Freq	Pct
	0 = Never used MJ/has used both MJ & anothr illct drug.....	46447	84.40
	1 = Marijuana is only (illicit) drug ever used	8588	15.60

RECODED DRUG USE

The following variable, MJOYR2, was created by examination of MRJYR and then HALYR, HERYR, COCYR, INHYR, and PSYYR2.

MJOYR2	Len : 1 MARIJUANA ONLY - PAST YEAR USE		
	0 = MJ not used past yr/Used MJ & othr drug past yr.....	Freq	Pct
	1 = Marijuana is only (illicit) drug in past year.....	50129	91.09
		4906	8.91

The following variable, MJOMON2, was created by examination of MRJMON and then HALMON, HERMON, COCMON, INHMON, and PSYMON2.

MJOMON2	Len : 1 MARIJUANA ONLY - PAST MONTH USE		
	0 = MJ not used past mnth/Used MJ & othr drug past mo.....	Freq	Pct
	1 = Marijuana only (illicit) drug in past month.....	51362	93.33
		3673	6.67

The following variable, IEMFLAG, was created by examination of HALFLAG, HERFLAG, COCFLAG, INHFLAG, and PSYFLAG2.

IEMFLAG	Len : 1 ILLICIT DRUG OTHER THAN MARIJUANA - EVER USED		
	0 = Never used drug/used only marijuana.....	Freq	Pct
	1 = Illicit drug except for marijuana are ever used.....	38193	69.40
		16842	30.60

The following variable, IEMYR, was created by examination of HALYR, HERYR, COCYR, INHYR, and PSYYR2.

IEMYR	Len : 1 ILLICIT DRUG OTHER THAN MARIJUANA - PAST YEAR USED		
	0 = Never used drug/used only marijuana past year.....	Freq	Pct
	1 = Illicit drug except for marijuana used past year.....	47892	87.02
		7143	12.98

The following variable, IEMMON, was created by examination of HALMON, HERMON, COCMON, INHMON, and PSYMON2.

IEMMON	Len : 1 ILLICIT DRUG OTHER THAN MARIJUANA-PAST MONTH USED		
	0 = Never used drug/used only marijuana past month.....	Freq	Pct
	1 = Illicit drug except for marijuana used past month.....	52007	94.50
		3028	5.50

The following two "any illicit drug except for marijuana" variables were created by examination of the age and date of first use variables for inhalants, hallucinogens, cocaine, heroin, and "any psychotherapeutics."

IEMAGE	Len : 3 ILLICIT DRUG EXCEPT FOR MARIJUANA - AGE FIRST USE		
	RANGE = 1 - 85.....	Freq	Pct
	991 = NEVER USED.....	16842	30.60
		38193	69.40

IEMYFU	Len : 4 ILLICIT DRUG OTHER THAN MARIJUANA - YEAR FIRST USE		
	RANGE = 1921 - 2006.....	Freq	Pct
	9999 = NEVER USED.....	16842	30.60
		38193	69.40

	0 = Never Used (IRCDUAGE=991,993).....	Freq	Pct
	1 = Ever Used (IRCDUAGE=1-60).....	39384	71.56
		15651	28.44

DCIGMON	Len : 1 PAST MONTH DAILY CIGARETTE USE		
	0 = Did not use daily in past mon (IRCIGFM=1-29,91,93).....	Freq	Pct
	1 = Used daily in the past month (IRCIGFM=30).....	47307	85.96
		7728	14.04

RECODED DRUG USE

CDCGMO	Len : 1 EVER USED CIG DAILY AND PAST MONTH CIG USE		
		Freq	Pct
	0 = No (Otherwise).....	44146	80.21
	1 = Yes (CDUFLAG=1 and CIGMON=1).....	10889	19.79

CDNOCGMO	Len : 1 EVER USED CIG DAILY AND NO PAST MONTH CIG USE		
		Freq	Pct
	0 = No (Otherwise).....	50273	91.35
	1 = Yes (CDUFLAG =1 and CIGMON=0).....	4762	8.65

CIGALCMO	Len : 1 PAST MONTH CIGARETTE/ALCOHOL USE		
		Freq	Pct
	1 = PAST MON USE OF CIG & ALC (CIGMON=1 & ALCMON=1)	10190	18.52
	2 = PAST MON USE OF CIG & NO ALC (CIGMON=1 & ALCMON=0)	4164	7.57
	3 = PAST MON USE OF ALC & NO CIG (ALCMON=1 & CIGMON=0)	14650	26.62
	4 = NO PAST MON USE OF CIG/ALC (CIGMON=0 & ALCMON=0)	26031	47.30

"Binge" Alcohol Use, BINGEDRK, is defined as drinking five or more drinks on the same occasion on at least 1 day in the past 30 days. For this variable, "occasion" means at the same time or within a couple hours of each other.

BINGEDRK	Len : 1 BINGE ALCOHOL USE PAST 30 DAYS		
		Freq	Pct
	0 = Never/No "Binge" alcohol use (IRALCD5 = 0)	40838	74.20
	1 = "Binge" alcohol use (IRALCD5 = 1-30).....	14197	25.80

Heavy Alcohol Use, HVYDRK2, is defined as drinking five or more drinks on the same occasion on each of 5 or more days in the past 30 days. For this variable, "occasion" means at the same time or within a couple hours of each other. All Heavy Alcohol Users are also "Binge" Alcohol Users.

HVYDRK2	Len : 1 HEAVY ALCOHOL USE PAST 30 DAYS		
		Freq	Pct
	0 = Never/No heavy alcohol use (IRALCD5 = 0-4)	50488	91.74
	1 = Heavy alcohol use (IRALCD5 = 5-30)	4547	8.26

The following variable, BINGEHVY, was created by examination of BINGEDRK, HVYDRK2, and ALCMON. To be considered a past month "binge" or heavy alcohol user, a respondent must have used alcohol in the past month. Further, to be a past month heavy alcohol drinker, a respondent must also be a past month "binge" alcohol user.

BINGEHVY	Len : 1 LEVEL OF ALCOHOL USE PAST MONTH		
		Freq	Pct
	1 = Heavy Alcohol Use (HVYDRK2=1).....	4547	8.26
	2 = "Binge" But Not Heavy Use (BINGEDRK=1 & HVYDRK2=0)	9650	17.53
	3 = Past Month But Not "Binge" (ALCMON=1 & BINGEDRK=0)	10643	19.34
	4 = Did Not Use Alcohol in Pst Month (All source=0).....	30195	54.87

NILALMON	Len : 1 NO ILLICIT DRUG OR ALCOHOL USE IN THE PAST 30 DAYS		
		Freq	Pct
	0 = Alc or Drg Use (Otherwise)	26254	47.70
	1 = No Alc Use and No Drg Use (ALCMON=0 & SUMMON=0).....	28781	52.30

PEYOTE2	Len : 1 EVER USED PEYOTE		
		Freq	Pct
	0 = No/Unknown (PEYOTE=2,85,91,94,97)	54181	98.45
	1 = Yes (PEYOTE=1).....	854	1.55

MESC2	Len : 1 EVER USED Mescaline		
		Freq	Pct
	0 = No/Unknown (MESC=2,85,91,94,97)	53875	97.89
	1 = Yes (MESC=1).....	1160	2.11

PSILCY2	Len : 1 EVER USED PSILOCYBIN (MUSHROOMS)		
		Freq	Pct
	0 = No/Unknown (PSILCY=2,85,91,94,97).....	50652	92.04
	1 = Yes (PSILCY=1,3)	4383	7.96

RECODED DRUG USE

AMYLNIT2	Len : 1	EVER INHALED AMYL NITRITE, "POPPERS," RUSH, ETC.		
			Freq	Pct
	0 = No/Unknown (AMYLNIT=2,85,91,94,97)		53575	97.35
	1 = Yes (AMYLNIT=1,3).....		1460	2.65
CLEFLU2	Len : 1	EVER INHALED CORRECTION FLUID, DEGREASER, ETC.		
			Freq	Pct
	0 = No/Unknown (CLEFLU=2,85,91,94,97)		54272	98.61
	1 = Yes (CLEFLU=1,3)		763	1.39
GAS2	Len : 1	EVER INHALED GASOLINE OR LIGHTER FLUID		
			Freq	Pct
	0 = No/Unknown (GAS=2,85,91,94,97)		53639	97.46
	1 = Yes (GAS=1,3)		1396	2.54
GLUE2	Len : 1	EVER INHALED GLUE, SHOE POLISH, OR TOLUENE		
			Freq	Pct
	0 = No/Unknown (GLUE=2,85,91,94,97)		53682	97.54
	1 = Yes (GLUE=1,3)		1352	2.46
ETHER2	Len : 1	EVER INHALED HALOTHANE, ETHER, OR OTHER ANESTHETIC		
			Freq	Pct
	0 = No/Unknown (ETHER=2,85,91,94,97)		54713	99.41
	1 = Yes (ETHER=1).....		322	0.59
SOLVENT2	Len : 1	EVER INHALED LACQUER THINNER, OTHER PAINT SOLVENTS		
			Freq	Pct
	0 = No/Unknown (SOLVENT=2,85,91,94,97)		54358	98.77
	1 = Yes (SOLVENT=1,3)		677	1.23
LGAS2	Len : 1	EVER INHALED LIGHTER GASES (BUTANE, PROPANE)		
			Freq	Pct
	0 = No/Unknown (LGAS=2,85,91,94,97,98)		54618	99.24
	1 = Yes (LGAS=1)		417	0.76
NITOXID2	Len : 1	EVER INHALED NITROUS OXIDE OR "WHIPPETS"		
			Freq	Pct
	0 = No/Unknown (NITOXID=2,85,91,94,97,98)		52213	94.87
	1 = Yes (NITOXID=1,3).....		2822	5.13
SPPAINT2	Len : 1	EVER INHALED SPRAY PAINTS		
			Freq	Pct
	0 = No/Unknown (SPPAINT=2,85,91,94,97,98)		54050	98.21
	1 = Yes (SPPAINT=1).....		985	1.79
AEROS2	Len : 1	EVER INHALED OTHER AEROSOL SPRAYS		
			Freq	Pct
	0 = No/Unknown (AEROS=2,85,91,94,97,98)		54094	98.29
	1 = Yes (AEROS=1,3).....		941	1.71
DARVTYL2	Len : 1	EVER USED DARVO CET, DARVON, TYLENOL W/CODEINE		
			Freq	Pct
	0 = No/Unknown (DARVTYLC=2,81,85,91,94,97,98)		50259	91.32
	1 = Yes (DARVTYLC=1,3)		4776	8.68
PERCTYL2	Len : 1	EVER USED PERCOCET, PERCODAN, TYLOX		
			Freq	Pct
	0 = No/Unknown (PERCTYLX=2,81,85,91,94,97,98)		52094	94.66
	1 = Yes (PERCTYLX=1,3)		2941	5.34

RECODED DRUG USE

VICOLOR2	Len : 1 EVER USED VICODIN, LORTAB, LORCET		
	0 = No/Unknown (VICOLOR=2,81,85,91,94,97,98).....	Freq	Pct
	1 = Yes (VICOLOR=1,3).....	49551	90.04

OTHER SELF-ADMINISTERED SECTIONS

SPECIAL DRUGS

The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a¹.

These next questions are about the different ways that certain drugs can be used.

Have you ever, even once, smoked heroin?

HERSMOKE¹	Len : 2	1EVER SMOKED HEROIN		
			Freq	Pct
		1 = Yes	219	0.40
		2 = No.....	448	0.81
		3 = Yes LOGICALLY ASSIGNED	6	0.01
		91 = NEVER USED HEROIN.....	54317	98.70
		94 = DON'T KNOW.....	1	0.00
		97 = REFUSED	12	0.02
		98 = BLANK (NO ANSWER).....	32	0.06

How long has it been since you last smoked heroin?

HRSMKREC¹	Len : 2	1TIME SINCE LAST SMOKED HEROIN		
			Freq	Pct
		1 = Within the past 30 days.....	9	0.02
		2 = More than 30 days ago but within the past 12 mos	23	0.04

98 = BLANK (NO ANSWER).....	50	0.09

How long has it been since you last used a needle to inject Methamphetamine, Desoxyn, or Methedrine when it was not prescribed for you or that you took only for the experience or feeling it caused?

MTNDLREC¹ Len : 2 1TIME SINCE LAST USED NEEDLE TO INJECT METH

	Freq	Pct
1 = Within the past 30 days.....	18	0.03
2 = More than 30 days ago but within the past 12 mos	30	0.05
3 = More than 12 months ago	175	0.32
9 = At some point in the lifetime LOG ASSN	13	0.02
13 = More than 12 months ago LOGICALLY ASSIGNED.....	2	0.00
81 = NEVER USED METHAMPHETAMINE Logically assigned	19	0.03
91 = NEVER USED METHAMPHETAMINE.....	52792	95.92
93 = USED METHAMPH BUT NEVER WITH A NEEDLE	1925	3.50
97 = REFUSED	6	0.01
98 = BLANK (NO ANSWER).....	55	0.10

NOTE: Questions corresponding to MTHAMP, MTHAREC, MTHANEDL, and MTANDLRC were follow-up questions that were asked only of respondents who had not previously reported lifetime nonmedical use of methamphetamine in the core STIMULANTS module.

Methamphetamine, also known as crank, ice, crystal meth, speed, glass, and many other names, is a stimulant that usually comes in crystal or powder forms. It can be smoked, "snorted," swallowed or injected. Have you ever, even once, used methamphetamine?

MTHAMP¹ Len : 2 1EVER USED METHAMPHETAMINE

	Freq	Pct
1 = Yes	895	1.63
2 = No.....	51648	93.85
3 = Yes LOGICALLY ASSIGNED	3	0.01
4 = No LOGICALLY ASSIGNED	269	0.49
85 = BAD DATA Logically assigned	2	0.00
94 = DON'T KNOW.....	39	0.07
97 = REFUSED	11	0.02
98 = BLANK (NO ANSWER).....	14	0.03
99 = LEGITIMATE SKIP (METHDES=1).....	2154	3.91

How long has it been since you last used methamphetamine?

MTHAREC¹ Len : 2 1TIME SINCE LAST USED METHAMPHETAMINE

	Freq	Pct
1 = Within the past 30 days.....	37	0.07
2 = More than 30 days ago but within the past 12 mos	124	0.23
3 = More than 12 months ago	729	1.32
8 = At some point in the past 12 months LOG ASN.....	4	0.01
9 = At some point in the lifetime LOG ASN	4	0.01

RECODED SPECIAL DRUGS

The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a¹.

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: The variables STNEEDLR, STNLRECR, and NEDLRECR were created to be consistent with data from corresponding variables prior to 2005. STNEEDLR was derived from the variables MTHNEEDL and OSTNEEDL. STNLRECR was derived from the variables MTNDLREC and OSTNLREC. NEDLRECR was derived from the variables HRNDLREC, CONDLREC, and STNLRECR. The variables STNEDL06, STNLRC06, and NDLREC06 also took into account data from the methamphetamine variables MTHANEDL, MTANDLRC, and MTHEVCK from the SPECIAL DRUGS module. STNEDL06 was derived from STNEEDLR and MTHANEDL. STNLRC06 was derived from STNLRECR and MTANDLRC. NDLREC06 was derived from NEDLRECR and STNLRC06.

NOTE: The following eight variables indicate whether a respondent has ever used a needle to inject heroin, cocaine, stimulants, methamphetamine or any of these drugs. NEDFLG01, NEDSTM, and NEDMTH are based only on data from the methamphetamine questions in the stimulants section of the prescription drug module of the core questionnaire. In 2005 new methamphetamine items were added to the non-core Special Drugs module to capture methamphetamine users who failed to report the drug in the prescription stimulants module. These were augmented in 2006 to include clarifications. The new non-core Special Drugs items were used to create CPNNDFLG, CPNNDSTM, and CPNNDMTH. For details, please see Appendix B.4.6 of the 2006 Summary of Findings Report. (NOTE: CPN is an abbreviation for Core-Plus-Noncore.)

A respondent was defined as having used a needle to inject drugs based on the core questions (NEDFLG01) if they indicated at least one of the following: using a needle to inject heroin (HERNEEDL), cocaine (COCNEEDL), stimulants (STNEEDLR), or any other drug (OTDGNEDL). Otherwise a respondent was defined as never using needles to inject drugs.

NEDFLG01 Len : 1 NEEDLE USE (ANY DRUG) - EVER USED

	Freq	Pct
0 = Never Used (Any source var=2,81,85,91,94,97,98).....	54384	98.82
1 = Ever Used (Any source var=1,3)	651	1.18

A respondent was defined as having used a needle to inject drugs based on the core-plus-noncore questions (CPNNDFLG) if they indicated at least one of the following: using a needle to inject heroin (HERNEEDL), cocaine (COCNEEDL), stimulants (STNEDL06), or any other drug (OTDGNEDL). Otherwise a respondent was defined as never using needles to inject drugs.

CPNNDFLG Len : 1 CPN: NEEDLE USE (ANY DRUG) - EVER USED

	Freq	Pct
0 = Never Used/Unknown (Otherwise).....	54359	98.77
1 = Ever Used (Any source var=1,3)	676	1.23

NEDHER Len : 1 EVER USED A NEEDLE TO INJECT HEROIN

	Freq	Pct
0 = No/Unknown (HERNEEDL=2,91,97,98).....	54753	99.49
1 = Yes (HERNEEDL=1,3).....	282	0.51

RISK/AVAILABILITY

RISK/AVAILABILITY

The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a¹.

We are interested in your opinion about the effects of using certain drugs and other substances, about whether it's difficult or easy to get drugs, and the extent to which drugs are available in your neighborhood.

Please indicate how much you think people risk harming themselves physically and in other ways when they do each of the following activities.

If you're not sure, choose an answer for the amount of risk that comes closest to what you think might be true for that activity.

How much do people risk harming themselves physically and in other ways when they smoke one or more packs of cigarettes per day?

RSKPKCIG¹ Len : 2 1RISK SMOKING 1 OR MORE PACKS CIGARETTES PER DAY

BLUNTS

BLUNTS

The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a¹.

Sometimes people take some tobacco out of a cigar and replace it with marijuana. This is sometimes called a 'blunt'.

NOTE: When respondents previously reported never using marijuana but reported lifetime use of cigars with marijuana in them (i.e., 'blunts'), a consistency check was triggered only when respondents reported using blunts in the past 30 days. Therefore, BLNTEVER was assigned a code of 11 when respondents reported using blunts but they did not report use in the past 30 days, and they previously had reported never using marijuana.

Have you ever smoked part or all of a cigar with marijuana in it?

BLNTEVER¹	Len : 2	1EVER SMOKED CIGAR WITH MARIJUANA IN IT		
			Freq	Pct
		1 = Yes	11052	20.08
		2 = No.....	43553	79.14
		4 = No LOGICALLY ASSIGNED.....	17	0.03
		11 = Yes (see note)	325	0.59
		85 = BAD DATA Logically assigned.....	1	0.00
		94 = DON'T KNOW.....	49	0.09
		97 = REFUSED	29	0.05
		98 = BLANK (NO ANSWER).....	9	0.02

On how many of the past 30 days, that is, since [DATEFILL], did you smoke part or all of a cigar with marijuana in it?

BLNT30DY¹	Len : 2	1# DAYS USED CIGAR WITH MJ IN IT PAST 30 DAYS		
			Freq	Pct
		RANGE = 1 - 30.....	2650	4.82
		91 = NEVER USED BLUNTS.....	43570	79.17
		93 = DID NOT USE BLUNTS IN THE PAST 30 DAYS.....	8594	15.62
		94 = DON'T KNOW.....	19	0.03
		97 = REFUSED	40	0.07
		98 = BLANK (NO ANSWER).....	162	0.29

How old were you the first time you smoked part or all of a cigar with marijuana in it?

BLNTAGE¹	Len : 3	1AGE WHEN FIRST SMOKED CIGAR WITH MJ IN IT		
			Freq	Pct
		RANGE = 1 - 58.....	11214	20.38
		981 = NEVER USED BLUNTS Logically assigned.....	17	0.03
		985 = BAD DATA Logically assigned.....	5	0.01

		997 = REFUSED	59	0.11
		998 = BLANK (NO ANSWER).....	58	0.11

NOTE: When respondents previously reported using marijuana but reported less recent use of marijuana than they reported for blunts, a consistency check was triggered only when respondents reported using blunts in the past 30 days. Therefore, BLNTREC was assigned a code of 12 when respondents reported last using marijuana more than 12 months ago but reported using blunts more than 30 days ago but within the past 12 months.

How long has it been since you last smoked part or all of a cigar with marijuana in it?

BLNTREC¹	Len : 2	1TIME SINCE LAST SMOKED CIGAR WITH MJ IN IT

		98 = BLANK (NO ANSWER).....	2	0.00
		99 = LEGITIMATE SKIP	164	0.30
			54765	99.51

NOTE: The variable BLNTNOMJ was assigned a code of 5 if respondents were not asked this question because they reported in the TOBACCO module that they smoked cigars in the past 30 days but reported in the BLUNTS module that they did not smoke cigars with marijuana in them in the past 30 days. It could be logically inferred that all of the cigars that these respondents smoked in the past 30 days did not have marijuana in them. BLNTNOMJ was assigned codes of 14 or 24 if respondents were not asked this question and they reported in the BLUNTS module that they smoked a cigar with marijuana in it in the past 30 days. A code of 14 was assigned if respondents reported in the TOBACCO module that they had smoked cigars but not in the past 30 days. A code of 24 was assigned if respondents reported in the TOBACCO module that they had never smoked part or all of a cigar.

Earlier, you reported that you had smoked part or all of a cigar during the past 30 days. During the past 30 days, did you smoke any cigars that did not have marijuana in them?

BLNTNOMJ¹	Len : 2	1SMOKE CIGARS WITH NO MARIJUANA PAST 30 DAYS

NOTE: The heroin variables in the SUBSTANCE DEPENDENCE AND ABUSE module take into account information from follow-up questions that were added to the SPECIAL DRUGS module in 2002 for the variables HRSMKREC and HRSNFREC. Respondents who had not previously reported heroin use in the past 12 months but who reported on follow-up that they smoked or sniffed heroin in the past 12 months were asked the heroin questions in the SUBSTANCE DEPENDENCE AND ABUSE module.

Think about your use of heroin during the past 12 months as you answer these next questions.

During the past 12 months, was there a month or more when you spent a lot of your time getting or using heroin?

HERLOTTM¹	Len : 2 1SPENT MON/MORE GETTING/USING HEROIN PST 12 MOS

Please look at the symptoms listed below. During the past 12 months, did you have 1 or more of these symptoms after you cut back or stopped using prescription sedatives?

- Sweating or feeling that your heart was beating fast
- Having your hands tremble
- Having trouble sleeping or sleeping more than you normally do
- Vomiting or feeling nauseous
- Seeing, hearing, or feeling things that weren't really there
- Feeling like you couldn't sit still
- Feeling anxious
- Having seizures or fits

IMPUTED SUBSTANCE DEPENDENCE AND ABUSE

NOTE: What follows are the imputation-revised versions of the 17 nicotine dependence variables that make up the Nicotine Dependence Syndrome Scale (NDSS). Missing values were only imputed if only one of the 17 variables had a missing value. Users should note that the imputed values for these variables are predicted values from regression models. These predicted values are not integers, and do not correspond directly to the integer responses from the questionnaire. It would be advisable to make the necessary adjustments (such as rounding or otherwise making the non-integer values into integers) when doing cross-tabulations.

RECODED SUBSTANCE DEPENDENCE AND ABUSE

RECODED SUBSTANCE DEPENDENCE AND ABUSE

NOTE: The variables in this section are recoded variables that were created from one or more of the variables from the following two sections: Substance Dependence and Abuse or Imputed Substance Dependence and Abuse.

NOTE: The following recoded dependence variables were defined based on the dependence criteria according to the Nicotine Dependence Syndrome Scale (NDSS) and the Fagerstrom Test of Nicotine Dependence (FTND) for respondents who reported smoking cigarettes in the past month. The NDSS score, NDSSANSP, is calculated as the average score over 17 questions pertaining to five aspects of dependence. This average score was only computed for those respondents who had a valid response (based on actual reporting and imputation) to all 17 questions. Respondents who did not have valid responses (based on actual reporting and imputation) for all 17 questions were coded as SAS missing. Based on the NDSS score a respondent was defined as having nicotine dependence, NDSSDNSP, if their average score was greater than or equal to 2.75. The FTND measure is defined by assessing how soon after waking a respondent had their first cigarette (CIGWAKE). Based on the FTND scale, a respondent was defined as having nicotine dependence, FTNDDNSP, if the first cigarette was smoked within 30 minutes of waking up on the days they smoked and the respondent reported smoking cigarettes in the past month. Based on the NDSS and the FTND, a respondent who reported smoking cigarettes was defined as having nicotine dependence in the past month, DNICNSP, if they met either the NDSS or the FTND criteria for dependence. Specific details for each of the nicotine dependence related variables are provided in the Recoded Substance Dependence and Abuse Variable Documentation Appendix.

NDSSANSP	Len : 12 NDSS SCORE

	1 = Yes (NDSSDNSP=1 or FTNDDNSP=1).....	47763	86.79
		7272	13.21

RECODED SUBSTANCE DEPENDENCE AND ABUSE

NOTE: The following recoded dependence variables were defined based on the dependence criteria listed in the Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition (DSM-IV). Specific details for each of the 10 individual drug dependence variables are provided in the Recoded Substance Dependence and Abuse Variable Documentation Appendix.

A respondent was defined as having marijuana, inhalant, hallucinogen, or tranquilizer dependence (DEPNDRMJ, DEPNDINH, DEPNDHAL, DEPNDTRN) if the respondent reported a positive response to 3 or more of these 6 dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of the substance (XXXLOTTM=1 or XXXGTOVR=1)
- (2) Unable to keep set limits on substance use or used more often than intended (XXXKPLMT=2)
- (3) Needed to use substance more than before to get desired effects or noticed that using the same amount had less effect than before (XXXNDMOR=1 or XXXLSEFX=1)
- (4) Unable to cut down or stop using the substance every time he or she tried or wanted to (XXXCUTEV=2)
- (5) Continued to use substance even though it was causing problems with emotions, nerves, mental health, or physical problems (XXXEMCTD=1 or XXXPHCTD=1)
- (6) Reduced or gave up participation in important activities due to substance use (XXXLSACT=1)

An additional question pertaining to withdrawal symptoms was asked for the following 6 drugs: alcohol, pain relievers, cocaine, heroin, sedatives, and stimulants. The withdrawal question asked the respondent if they had experienced substance specific withdrawal symptoms at one time that lasted for longer than a day after they cut back or stopped using (XXXWDSMT=1). The specific number and type of listed withdrawal symptoms varied by substance. A respondent was defined as having alcohol, pain reliever, cocaine, heroin, sedative, or stimulant dependence (DEPNDALC, DEPNDANL, DEPNDCCOC, DEPNDHER, DEPNDSED, DEPNDSTM) if the respondent reported a positive response to 3 or more of the 7 dependence criteria (including the six standard criteria listed above plus a seventh withdrawal symptom criteria).

Given the current editing and imputation procedures, along with the use of both core and non-core questions to determine whether or not a respondent was asked the substance dependence and withdrawal questions, it is possible for these dependence recode variables to be inconsistent with the imputed substance use and frequency of use variables. The types of inconsistencies that can occur differ by substance since different combinations of the skip logic criteria were used for each substance. Specific details about these inconsistencies are included in the Recoded Substance Dependence and Abuse Variable Documentation Appendix.

DEPNDALC	Len : 1 ALCOHOL DEPENDENCE IN THE PAST YEAR	Freq	Pct
	0 = No/Unknown (Otherwise).....	52685	95.73
	1 = Yes (See comment above).....	2350	4.27

	1 = Yes (See comment above).....	1143	2.08

RECODED SUBSTANCE DEPENDENCE AND ABUSE

DEPNSED	Len : 1 SEDATIVE DEPENDENCE IN THE PAST YEAR		
	0 = No/Unknown (Otherwise).....	Freq	Pct
	1 = Yes (See comment above).....	55016	99.97
		19	0.03

A respondent was defined with dependence on stimulants, DEPNDSTM, if the respondent was classified as being dependent (see dependence criteria listed above) on stimulants and was routed to the dependence and abuse questions in 2006 based on variables that existed ONLY in 2004 (STMDAFLG=98), not including new variables added in 2005 or 2006. See Recoded Substance Dependence and Abuse Variable Documentation Appendix for further details.

DEPNDSTM	Len : 1 STIMULANT DEPENDENCE IN THE PAST YEAR		
	0 = No/Unknown (Otherwise).....	Freq	Pct
	1 = Yes (See comment above).....	54936	99.82
		99	0.18

DEPNDTRN	Len : 1 TRANQUILIZER DEPENDENCE IN THE PAST YEAR		
	0 = No/Unknown (Otherwise).....	Freq	Pct
	1 = Yes (See comment above DEPNDALC)	54983	99.91
		52	0.09

A respondent was defined as having illicit drug dependence, DEPNDILL, if the respondent was classified as dependent (see dependence criteria listed above) on any of these following substances: marijuana (DEPNDRMJ), hallucinogens (DEPNDRHAL), inhalants (DEPNDRINH), tranquilizers (DEPNDRTRN), cocaine (DEPNDRCOCC), heroin (DEPNDRHER), pain relievers (DEPNDRANL), stimulants (DEPNDRSTM), or sedatives (DEPNDRSED).

DEPNDRILL	Len : 1 ILLICIT DRUG DEPENDENCE IN THE PAST YEAR		
	0 = No/Unknown (Otherwise).....	Freq	Pct
	1 = Yes (Any source variable listed above=1)	53265	96.78
		1770	3.22

A respondent was defined with dependence on any illicit drug other than marijuana, DEPNDIEM, if the respondent was classified as being dependent (see dependence criteria listed above) on any one of these following substances: hallucinogens (DEPNDRHAL), inhalants (DEPNDRINH), tranquilizers (DEPNDRTRN), cocaine (DEPNDRCOCC), heroin (DEPNDRHER), pain relievers (DEPNDRANL), stimulants (DEPNDRSTM), or sedatives (DEPNDRSED). A respondent's marijuana dependency status is not considered in the creation of this variable.

DEPNDRIEM	Len : 1 ILLICIT DRUG OTHER THAN MARIJUANA DEP IN PAST YR		
	0 = No/Unknown (Otherwise).....	Freq	Pct
	1 = Yes (Any source variable listed above=1)	54261	98.59
		774	1.41

A respondent was defined with dependence on any illicit drug excluding marijuana and not dependent on marijuana, DEPNDXMJ, if the respondent was classified as being not marijuana dependent (DEPNDRMJ=0), but being dependent (see dependence criteria listed above) on any one of these following substances: hallucinogens (DEPNDRHAL), inhalants (DEPNDRINH), tranquilizers (DEPNDRTRN), cocaine (DEPNDRCOCC), heroin (DEPNDRHER), pain relievers (DEPNDRANL), stimulants (DEPNDRSTM), or sedatives (DEPNDRSED).

DEPNDRXMJ	Len : 1 ILLICIT DRUG EXCLUDING MARIJUANA DEP IN PAST YR		
	0 = No/Unknown (Otherwise).....	Freq	Pct
	1 = Yes (DEPNDRMJ=0 & any other source variable=1).....	54408	98.86
		627	1.14

DEPNDRPSY	Len : 1 PSYCHOTHERAPEUTIC DEPENDENCE IN THE PAST YR		
	0 = No/Unknown (Otherwise).....	Freq	Pct
	1 = Yes (DEPNDRTRN, DEPNDANL, DEPNDSTM, OR DEPNDSED=1).....	54575	99.16
		460	0.84

DRPILLALC	Len : 1 ILLICIT DRUG OR ALCOHOL DEPENDENCE IN PAST YR		
	0 = No/Unknown (DEPNDRILL=0 and DEPNDALC=0).....	Freq	Pct
	1 = Yes (DEPNDRILL=1 or DEPNDALC=1)	51384	93.37
		3651	6.63

RECODED SUBSTANCE DEPENDENCE AND ABUSE

DPILANAL	Len : 1	ILLICIT DRUGS AND ALCOHOL DEPENDENCE IN PAST YR		
			Freq	Pct
		0 = No/Unknown (DEPN DILL=0 or DEPNDALC=0)	54566	99.15
		1 = Yes (DEPN DILL=1 and DEPNDALC=1).....	469	0.85

NOTE: The following abuse variables were defined based on the abuse criteria listed in the Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition (DSM-IV). Specific details for each of the 10 individual substance abuse variables are provided in the Recoded Substance Dependence and Abuse Variable Documentation Appendix. A respondent was defined as having alcohol, marijuana, cocaine, heroin, hallucinogen, inhalant, pain reliever, tranquilizer, stimulant, or sedative abuse (ABUSEALC, ABUSEMRJ, ABUSECOC, ABUSEHER, ABUSEHAL, ABUSEINH, ABUSEANL, ABUSETRN, ABUSESTM, ABUSESED) if they reported a positive response to one or more of the following four abuse criteria and was determined not to be dependent upon the substance of interest:

- (1) Respondent reported having serious problems due to substance use at home, work or school (XXXSERPB=1)
- (2) Respondent reported using substance regularly and then did something where substance use might have put them in physical danger (XXXPDANG=1)
- (3) Respondent reported substance use causing actions that repeatedly got them in trouble with the law (XXXLAWTR=1)
- (4) Respondent reported having problems caused by substance use with family or friends (XXXFMFPB=1) and continued to use substance even though it was thought to be causing problems with family and friends (XXXFMCTD=1)

Given the current editing and imputation procedures, along with the use of both core and non-core questions to determine whether or not a respondent was asked the abuse questions, it is possible for these abuse recode variables to be inconsistent with the imputed substance use and frequency of use variables. The types of inconsistencies that can occur differ by substance since different combinations of the skip logic criteria were used for each substance. Specific details about these inconsistencies are included in the Recoded Substance Dependence and Abuse Variable Documentation Appendix.

In addition, because the dependence and abuse variables are mutually exclusive with dependence taking precedence (i.e., dependence is determined first and respondents are only classified as having abused if they are not already classified as dependent, regardless of responses to the abuse questions), it is possible for the variables showing abuse of a combination of substances to not correspond with the abuse status of those individual substances. For example, a respondent who is classified as having abused cocaine in the past year may be classified as not having abused illicit drugs because they were dependent on marijuana and already classified as being dependent on illicit drugs.

ABUSEALC	Len : 1	ALCOHOL ABUSE - PAST YEAR		
			Freq	Pct
		0 = No/Unknown (Otherwise)	51792	94.11
		1 = Yes (Any one of above criteria and DEPNDALC=0)	3243	5.89

The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a¹.

The next questions are about encounters with the police or the court system.

Not counting minor traffic violations, have you ever been arrested and booked for breaking the law?

Being 'booked' means that you were taken into custody and processed by the police or by someone connected with the courts, even if you were then released.

BOOKED¹ Len : 2 1EVER ARRESTED AND BOOKED FOR BREAKING THE LAW

	Freq	Pct
1 = Yes	7882	14.32

SPECIAL TOPICS

NOTE: For the variable BKOTH, a code of 3 indicates that respondents did not originally answer "yes" to any of the questions about specific offenses for which they were arrested/booked in the past 12 months, including the question about "some other offense." However, these respondents subsequently specified a valid response for an offense in the past 12 months. A code of 5 in BKOTH indicates that respondents reported being arrested/booked at least once in the past 12 months but did not indicate at least one offense for which they were arrested in that period.

In the past 12 months, were you arrested and booked for some other offense besides these that have been named? Please do not include minor traffic violations.

RECODED MARIJUANA PURCHASES

RECODED MARIJUANA PURCHASES

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

MJPGOT Len : 1 METHOD OF OBTAINING LAST USED MARIJUANA

	Freq	Pct
1 = Bought it (MMGETMJ=1)	3566	6.48
2 = Traded for it (MMGETMJ=2)	99	0.18
3 = Got it for free/shared (MMGETMJ=3)	5117	9.30
4 = Grew it yourself (MMGETMJ=4)	74	0.13
5 = Method Unspecified (MMGETMJ=85,94,97,98)	309	0.56
6 = Never Used MJ (MMGETMJ=91,93)	45870	83.35

NOTE: The following "source of last used marijuana bought" variable (MJPBTFRM) is defined so that respondents with unknown data for whether they obtained marijuana in the past year by buying it (MMGETMJ) or if they bought marijuana (MMBTPYR) in the past year are included in the "Source Unspecified" level (MJPBTFRM=4). This differs from the "location where last used marijuana was bought" variable (MJPBTPL2) where these unknown cases are defined as SAS missing (MJPBTPL2=.). To produce estimates among respondents who reported last obtaining marijuana by buying it or buying marijuana in the past year, the analysis should be restricted to MMGETMJ=1 or MMBTPYR=1.

MJPBTFRM Len : 1 SOURCE OF LAST USED MARIJUANA BOUGHT

	Freq	Pct
1 = Friend (MMBUYWHO=1)	3846	6.99
2 = Relative or Family Member (MMBUYWHO=2)	168	0.31
3 = Someone Just Met/Did Not Know (MMBUYWHO=3)	905	1.64
4 = Source Unspecified (MMBUYWHO=94,97,98)	457	0.83
5 = Nevr Use MJ/Didn't Buy Last MJ (MMBUYWHO=91,93,99)	49659	90.23

NOTE: The following variable MJPBTPL2 was assigned a positive response if the respondent reported buying their last used marijuana or buying marijuana in the past 12 months (MMGETMJ=1 OR MMBTPYR=1) and reported the corresponding location of buying the marijuana as noted in the level statements below (MMBPLACE/MMBPLOS2). MJPBTPL2 was assigned to SAS missing if a respondent did not report buying their last used marijuana (MMGETMJ=2,3,4,85,91,93,94,97,98) and the respondent did not report buying marijuana in the past year (MMBTPYR=2,85,91,93,94,97,98).

MJPBTPL2 Len : 1 LOCATION WHERE LAST USED MARIJUANA WAS BOUGHT

	Freq	Pct
. = Didn't Buy Last MJ or MJ in PY (See comment above)	49958	90.77
1 = Inside a Public Building (MMBPLACE=1,11)	269	0.49
2 = Outside in Public Area (MMBPLACE=5,15)	1202	2.18
3 = Inside School (MMBPLACE=2)	154	0.28
4 = Outside on School Property (MMBPLACE=3)	103	0.19
5 = Inside Home/Apt/Dorm (MMBPLACE=4,14)	2715	4.93
6 = Som Oth Plc (MMBPLACE=6 & MMBPLOS2=7,14,25)	60	0.11
7 = Location Unspecified (Otherwise)	574	1.04

NOTE: The following "source of last used free marijuana" variable (MJPFREGT) is defined so that respondents with unknown data for how they got their last used marijuana (MMGETMJ) or whether they bought (MMBTPYR) or traded something (MMTRADE) for marijuana in the past year are included in the "Source Unspecified" level (MJPFREGT=4). This differs from the "location where last used free marijuana was received" variable (MJPFRPL2) where these unknown cases are defined as SAS missing (MJPFRPL2=.). To produce estimates among respondents who reported obtaining their last used marijuana for free and reported not buying or not trading something for marijuana in the past year, the analysis should be restricted to MMGETMJ=3 and MMBTPYR=2 and MMTRADE=2.

MJPFREGT Len : 1 SOURCE OF LAST USED FREE MARIJUANA

	Freq	Pct
1 = Friend (MMFREWHO=1)	3033	5.51
2 = Relative or Family Member (MMFREWHO=2)	357	0.65
3 = Someone Just Met/Did Not Know (MMFREWHO=3)	205	0.37
4 = Source Unspecified (MMFREWHO=85,94,97,98)	352	0.64
5 = Nevr Use MJ/Didn't Get Free MJ (MMFREWHO=91,93,99)	51088	92.83

RECODED MARIJUANA PURCHASES

NOTE: The following variable MJFPRPL2 was assigned a positive response if the respondent reported getting their last used marijuana for free and reported not buying or trading something for marijuana in the past 12 months (MMGETMJ=3 AND MMBTPYR=2 AND MMTRADE=2) and reported the corresponding location of getting the marijuana for free as noted in the level statements below (MMFPLACE/MMFPLOS2). MJFPRPL2 was assigned to SAS missing if any one of the three criteria mentioned above was not met (MMGETMJ=1,2,3,4,85,91,93,94,97,98 OR MMBTPYR=1,2,85,91,93,94,97,98,99 OR MMTRADE=1,2,85,91,93,97,98,99).

MJFPRPL2	Len : 1	LOCATION WHERE LAST USED FREE MRJ WAS RECEIVED	Freq	Pct

7		= Location Unspecified (Otherwise)	348	0.63

PRIOR SUBSTANCE USE

PRIOR SUBSTANCE USE

The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a¹.

NOTE: The variables MRJYRBFR and MRJAGLST were not edited with respect to one another. Therefore, inconsistencies could exist between these two variables.

Earlier questions were about the past 12 months. This question is about the year before that, that is, from [DATEFILL - 12 MONTHS] to [DATEFILL]. During that year, beginning [DATEFILL - 12 MONTHS] and ending [DATEFILL], did you use marijuana or hashish, even once?

MRJYRBFR¹ Len : 2 1USE MJ OR HASHISH EVEN ONCE YR BEFORE LAST

NOTE: Respondents were assigned legitimate skip codes of 99 or 89 in CIGYRBFR if they reported in the core TOBACCO module that they last smoked a cigarette more than 3 years ago. Logically, these respondents would not have smoked a cigarette in the past 12 to 24 months. In addition, CIGYRBFR was not edited with respect to CIGAGLST or CIGDLLST. Therefore, inconsistencies could exist between CIGYRBFR and these other variables.

Earlier questions were about the past 12 months. This question is about the year before that, that is, from [DATEFILL - 12 MONTHS] to [DATEFILL]. During that year, beginning [DATEFILL - 12 MONTHS] and ending [DATEFILL], did you smoke part or all of a cigarette, even once?

RECODED PRIOR SUBSTANCE USE

NOTE: The variables in this section are recoded variables that were created from one or more of the variables from the following two sections: Recoded Drug Use and Prior Substance Use.

MJPRIOR	Len : 1 MARIJUANA USE 12 TO 23 MONTHS PRIOR TO INTERVIEW		
		Freq	Pct
	0 = No (Otherwise).....	46591	84.66
	1 = Used MRJ 12-23 months ago (MRJYRBFR=1).....	8444	15.34
MJPRIYR	Len : 1 MRJ USE 12-23 MONTHS PRIOR & PST YR MRJ USE		
		Freq	Pct
	0 = No (Otherwise).....	48640	88.38
	1 = Used in Prior Yr & Past Yr (MRJYR=1 & MJPRIOR=1).....	6395	11.62
MJPRNOYR	Len : 1 MRJ USE 12-23 MONTHS PRIOR & NO PST YR MRJ USE		
		Freq	Pct
	0 = No (Otherwise).....	52986	96.28
	1 = Used in Pr Yr NOT Pst Yr (MRJYR=0 and MJPRIOR=1).....	2049	3.72

RECODED PRIOR SUBSTANCE USE

The following variables: ANLLTSC, TRNLTS2, STMLTS2, SEDLTS2, and MTHLTSC2, were created to capture the sources for most recent nonmedical use of prescription pain relievers, prescription tranquilizers, prescription stimulants, prescription sedatives, and methamphetamine within the past year.

For each variable, excluding MTHLTSC2, there are 11 mutually exclusive levels; 10 levels for specific sources and one level for those respondents who did not indicate using the drug in the past year (or lifetime). Since methamphetamine is not available by prescription, there are 7 mutually exclusive levels; 6 sources and one level for non past year users. The levels for the specific sources take into account responses from past month users who indicated a single source during the past 30 days, past month users who indicated their most recent source after indicating multiple sources during the past 30 days, and past year users who indicated their most recent source of drug use.

Note that questions related to source of stimulant use pertain only to prescription stimulants and are not asked of respondents who were users of only methamphetamine, thus those respondents who indicated non-prescription stimulant use only (STMGTLA2=99) were classified as having "No Past Year Use" (STMLTS2=11).

A respondent was classified in one of the following 12 categories for the source of most recent prescription drug use in the past year for the variables, ANLLTSC, TRNLTS2, STMLTS2, and SEDLTS2:

- (1) Got From One Doctor ((XXXGTLAS or XXXGTLA2)=1,11 or only XXXRX1DR=1,3,5)
- (2) Got From More Than One Doctor ((XXXGTLAS or XXXGTLA2)=2,12 or only XXXRXDRS=1,3,5)
- (3) Wrote Fake Prescription ((XXXGTLAS or XXXGTLA2)=3,13 or only XXXRXFAK=1,3,5)
- (4) Stole from Dr Office, Clinic, Hospital, or Pharmacy ((XXXGTLAS or XXXGTLA2)=4,14 or only XXXSTOLE=1,3,5)
- (5) Got From Friend or Relative for Free ((XXXGTLAS or XXXGTLA2)=5,15 or only XXXFRFRE=1,3,5)
- (6) Bought from Friend or Relative ((XXXGTLAS or XXXGTLA2)=6,16 or only XXXFRBUY=1,3,5)
- (7) Took from Friend or Relative without Asking ((XXXGTLAS or XXXGTLA2)=7,17 or only XXXFRTKE=1,3,5)
- (8) Bought from Drug Dealer or Other Stranger ((XXXGTLAS or XXXGTLA2)=8,18 or only XXXDEALR=1,3,5)
- (9) Bought on the Internet ((XXXGTLAS or XXXGTLA2)=9,19 or only XXXINET=1,3,5)
- (10) Got Some Other Way ((XXXGTLAS or XXXGTLA2)=10 and XXXGTOS2=10-29,71) or (only XXXOTHWY=1,3,5 and XXXOTHS2=10-29,71))
- (11) No Lifetime or Past Year Use ((XXXGTLAS or XXXGTLA2)=81,91,93,(99 for STM only))

SAS Missing = Unknown/Invalid Source ((XXXGTLAS or XXXGTLA2)=85,94,97,98 or [(XXXGTLAS or XXXGTLA2)=10 and XXXOTHS2=70,72,85,94,97,98] or [XXXOTHWY=1 and XXXOTHS2=70,72,85,94,97,98]))

ANLLTSC

Len : 2 SOURCE OF PAIN RELIEVERS FOR LAST NONMED USE

	Freq	Pct
. = Unknown/Invalid Source	762	1.38
1 = Got From One Doctor	597	1.08
2 = Got From More Than One Doctor	72	0.13

9 = Bought on the Internet	9	0.02
10 = Got Some Other Way	46	0.08
11 = No Lifetime or Past Year Use	53312	96.87

STMLTS2

Len : 2 SOURCE OF RX STIMULANTS FOR LAST NONMED USE

	Freq	Pct
. = Unknown/Invalid Source	258	0.47
1 = Got From One Doctor	79	0.14
2 = Got From More Than One Doctor	8	0.01
3 = Wrote Fake Prescription	3	0.01
4 = Stole from Dr Office, Clinic, Hospital, or Pharmacy	5	0.01
5 = Got From Friend or Relative for Free	439	0.80
6 = Bought from Friend or Relative	130	0.24
7 = Took from Friend or Relative without Asking	59	0.11
8 = Bought from Drug Dealer or Other Stranger	49	0.09
9 = Bought on the Internet	14	0.03
10 = Got Some Other Way	38	0.07
11 = No Lifetime or Past Year Rx Use	53953	98.03

RECODED PRIOR SUBSTANCE USE

The variable for the source of most recent methamphetamine use in the past year, MTHLTSC2, was defined by including respondents routed from the core Stimulants module as well as respondents routed from the noncore Special Drugs module who reported they did not think of methamphetamine as a prescription drug when asked about use in the core Stimulants module.

MTHLTSC2 is similar to the variables MTHLTSC and MTHLTSC3, which were created in the 2005 NSDUH. The difference between these variables is how the noncore Special Drug responses were handled. MTHLTSC excluded respondents if they were routed to the source questions based only on their responses to the noncore questions, and MTHLTSC3 did not exclude respondents based on their noncore responses, regardless of whether they did or did not think of methamphetamine as a prescription drug when asked about use in the core Stimulants module.

As indicated below, the imputed recency variable, CPNMTHYR, was used in conjunction with the edited source variables to determine a respondent's source for most recently used methamphetamine based on past year use as defined from both the core Stimulants module and legitimate responses from the noncore Special Drugs module, as previously stated. The categories were defined as follows:

- (5) From Friend or Relative for Free (Valid Past Year Use [CPNMTHYR=1] and MTHGTLAS=5,15 or only MTHFRFRE=1,3,5)
- (6) Bought from Friend or Relative (Valid Past Year Use [CPNMTHYR=1] and MTHGTLAS=6,16 or only MTHFRBUY=1,3,5)
- (7) Took from Friend or Relative without Asking (Valid Past Year Use [CPNMTHYR=1] and MTHGTLAS=7,17 or only MTHFRTRKE=1,3,5)
- (8) Bought from Drug Dealer or Other Stranger (Valid Past Year Use [CPNMTHYR=1] and MTHGTLAS=8,18 or only MTHDEALR=1,3,5)
- (9) Bought on the Internet (Valid Past Year Use [CPNMTHYR=1] and MTHGTLAS=9,19 or only MTHINET=1,3,5)
- (10) Some Other Way (Valid Past Year Use [CPNMTHYR=1] and [MTHGTLAS=10 and MTHGTOS2=10,11 OR only MTHOTHWY=1,3,5 and MTHOTHS2=10])
- (11) No Lifetime or Past Year Use (CPNMTHYR=0)

(SAS Missing) Unknown/Invalid Source (Valid Past Year Use [CPNMTHYR=1] and ([MTHGTLAS=85,94,97,98] or [MTHGTLAS=10 and MTHGTOS2=85,97,98] or [only MTHOTHWY=1 and MTHOTHS2=85,94,97,98]))

Please see Appendix B.4.6 of the Results from the 2006 NSDUH: National Findings for more information.

11 = No Lifetime or Past Year Use.....	54480	98.99

RECODED PRIOR SUBSTANCE USE

NOTE: The following 46 variables were created to capture all a respondent's reported sources of past month prescription drug and methamphetamine (MTH) use. The prescription drugs include pain relievers (ANL), tranquilizers (TRN), stimulants (STM), and sedatives (SED).

NOTE: For the following 40 variables, to produce estimates among adults with past month prescription drug use, the analysis will need to be restricted by the specific past month prescription drug use variable (XXXMON=1).

ANLRX1D2	Len : 1 GOT ONE+ RX FOR ANL FROM JUST ONE DOCTOR - PST MON

RECODED PRIOR SUBSTANCE USE

The following variables: ANLSRCFR, TRNSRCFR, STMSRCFR, SEDSRCFR, and MTHSRCFR were created to capture the source of friend or relative's most recent nonmedical use of prescription pain relievers, prescription tranquilizers, prescription stimulants, prescription sedatives, and methamphetamine within the past year.

During the 2013 data processing some errors were detected where not all valid levels of the other-specify variables were considered when distinguishing between an unknown/invalid source and a valid source not from a friend or relative for free. The overall impact of these inconsistencies is anticipated to be small and it is recommended that the SAS missing and level 11 not be used as two distinct levels in analyses. See the 2013 data file codebook documentation for more detailed information.

For each variable, excluding MTHSRCFR, there are 11 mutually exclusive levels; 10 levels for specific sources and one level for those respondents who did not indicate using the drug in the past year (or lifetime). Since methamphetamine is not available by prescription, there are 7 mutually exclusive levels; 6 sources and one level for non past year users. The levels for the specific sources take into account responses from past month users who indicated a single source during the past 30 days, past month users who indicated their most recent source after indicating multiple sources during the past 30 days, and past year users who indicated their most recent source of drug use.

Note that questions related to source of stimulant use pertain only to prescription stimulants and are not asked of respondents who were users of only methamphetamine, thus those respondents who indicated non-prescription stimulant use only (STMGTLA2=99) were classified as having "No Past Year Use" (STMSRCFR=11).

A respondent was classified in one of the following 12 categories for the source of most recent prescription drug use in the past year for the variables, ANLSRCFR, TRNSRCFR, STMSRCFR, and SEDSRCFR:

- (1) Got From One Doctor (((XXXGTLAS=5 or XXXGTLA2=5) and XXXFFLAS=1,11) or ((XXXGTLAS=89,99 or XXXGTLA2=99) and XXXFRFRE=1,3,5 and only XXXFF1DR=1,3,5) or ((XXXGTLAS=89,99 or XXXGTLA2=99) and XXXFRFRE=1,3,5 and XXXFFOTH=1,3,5 and XXXFFOSP=1))
- (2) Got From More Than One Doctor (((XXXGTLAS=5 or XXXGTLA2=5) and XXXFFLAS=2,12) or ((XXXGTLAS=89,99 or XXXGTLA2=99) and XXXFRFRE=1,3,5 and only XXXFFDRS=1,3,5) or ((XXXGTLAS=89,99 or XXXGTLA2=99) and XXXFRFRE=1,3,5 and XXXFFOTH=1,3,5 and XXXFFOSP=2))
- (3) Wrote Fake Prescription (((XXXGTLAS=5 or XXXGTLA2=5) and XXXFFLAS=3,13) or ((XXXGTLAS=89,99 or XXXGTLA2=99) and XXXFRFRE=1,3,5 and only XXXFFAKE=1,3,5) or ((XXXGTLAS=89,99 or XXXGTLA2=99) and XXXFRFRE=1,3,5 and XXXFFOTH=1,3,5 and XXXFFOSP=3))
- (4) Stole from Dr Office, Clinic, Hospital, or Pharmacy (((XXXGTLAS=5 or XXXGTLA2=5) and XXXFFLAS=4,14) or ((XXXGTLAS=89,99 or XXXGTLA2=99) and XXXFRFRE=1,3,5 and only XXXFFSTL=1,3,5) or ((XXXGTLAS=89,99 or XXXGTLA2=99) and XXXFRFRE=1,3,5 and XXXFFOTH=1,3,5 and XXXFFOSP=4))
- (5) Got From Friend or Relative for Free (((XXXGTLAS=5 or XXXGTLA2=5) and XXXFFLAS=5,15) or ((XXXGTLAS=89,99 or XXXGTLA2=99) and XXXFRFRE=1,3,5 and only XXXFFREE=1,3,5) or ((XXXGTLAS=89,99 or XXXGTLA2=99) and XXXFRFRE=1,3,5 and XXXFFOTH=1,3,5 and XXXFFOSP=5))

11	= No Lifetime or Past Year Use	54347	98.75

RECODED PRIOR SUBSTANCE USE

Due to the outcome of the 2006 Methamphetamine Analysis Study, the variable for a friend or relative's source of methamphetamine for the respondent's most recent methamphetamine use in the past year when they reported they received this most recent drug from a friend or relative for free, MTHSRCFR, was defined by including respondents routed from the core Stimulants module, as well as respondents routed from the noncore Special Drugs module who reported they did not think of methamphetamine as a prescription drug when asked about use in the core Stimulants module.

As described in the comment above ANLSRCFR, during the 2013 data processing some errors were detected. It is recommended that the SAS missing and level 11 not be used as two distinct levels in analyses. See the 2013 data file codebook documentation for more detailed information.

As indicated below, the imputed recency variable, CPNMTHYR, was used in conjunction with the edited source variables to determine a respondent's source for most recently used methamphetamine based on past year use as defined from both the core Stimulants module and legitimate responses from the noncore Special Drugs module, as previously stated. Please see Appendix B.4.6 of the Results from the 2006 NSDUH: National Findings for more information.

- (5) From Friend or Relative for Free {CPNMTHYR=1 and ([MTHGTLAS=5 and MTHFFLAS=5,15] or [MTHGTLAS=89,99 and MTHFRFRE=1,3,5 and only MTHFFREE=1,3,5] or [MTHGTLAS=89,99 and MTHFRFRE=1,3,5 and MTHFFOTH=1,3,5 and MTHFFOSP=5])}

SUBSTANCE TREATMENT

SUBSTANCE TREATMENT

The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a¹.

NOTE: Respondents were not asked questions in the SUBSTANCE TREATMENT module if they did not report lifetime use of alcohol, marijuana, cocaine, heroin, hallucinogens, or inhalants, or lifetime use of prescription-type psychotherapeutics (pain relievers, tranquilizers, stimulants, or sedatives) for nonmedical reasons. Codes of 81 or 91 in the edited SUBSTANCE TREATMENT variables indicate that the questions did not apply because respondents were nonusers of all of these substances.

These next questions deal with treatment for alcohol and drug problems, not including cigarettes. Please report treatment or counseling designed to help you reduce or stop your alcohol or drug use. Please include detoxification and any other treatment for medical problems associated with your alcohol or drug use.

Have you ever received treatment or counseling for your use of alcohol or any drug, not counting cigarettes?

SUBSTANCE TREATMENT

NOTE: For most of the remaining questions in the SUBSTANCE TREATMENT module, the wording differed depending on whether respondents previously reported that they were still in treatment or that they were no longer in treatment. Where two question wordings appear for a given variable, the first wording was what respondents received if they reported that they were no longer in treatment. The second wording was what respondents received if they reported that they were still in treatment.

What was the main place where you received treatment the last time you started treatment for your alcohol or other drug use, not counting cigarettes?

NOTE: The variables TXALONEV, TXALONAG, TXDRONEV, TXDRONAG, TXALCDEV, TXALCDAG, TXDRGAEV, and TXDRGAAG pertain to respondents who were lifetime recipients of substance treatment but who had not received treatment in the past year. TXALONEV and TXALONAG pertain to respondents who were lifetime alcohol users but had not reported lifetime use of other drugs. TXDRONEV and TXDRONAG pertain to respondents who did not report lifetime use of alcohol but reported lifetime use of other drugs. TXALCDEV, TXALCDAG, TXDRGAEV, and TXDRGAAG pertain to respondents who were lifetime users of alcohol and other drugs.

NOTE: TXALONEV was assigned a value of 11 or 12 when respondents originally reported that they had not received treatment in the past 12 months but they were logically inferred to have received treatment in that period (TXYREVER=3). Respondents who themselves reported that they had gotten treatment in the past 12 months were asked a different set of questions. However, respondents who reported that they had ever received treatment for their use of alcohol but were logically inferred to have gotten treatment in the past 12 months cannot be inferred to have received alcohol treatment in that period (TXALONEV=11). TXALONEV was assigned a value of 22 when respondents were lifetime users of alcohol but had never used (or misused) marijuana, cocaine, heroin, hallucinogens, inhalants, prescription psychotherapeutics (pain relievers, tranquilizers, stimulants, or sedatives), and they reported that they had never received treatment for their use of alcohol.

Earlier you reported that at some time in your life you received treatment or counseling for your use of alcohol or any drug, not counting cigarettes. Have you ever received treatment for your alcohol use?

NOTE: The variables TXYALAGE, TXYALDRG, TXYALDAG, TXYDRAGE, TXYDRALC, TXYDRAAG, TXYADAAG, and TXYADDAG pertain to respondents who received substance treatment in the past 12 months. TXYALAGE, TXYALDRG, and TXYALDAG pertain to respondents who reported that they received treatment only for alcohol in the past 12 months. TXYDRAGE, TXYDRALC, and TXYDRAAG pertain to respondents who reported that they received treatment only for other drugs in the past 12 months. TXYADAAG and TXYADDAG pertain to respondents who reported receiving treatment for both alcohol and other drugs in the past 12 months.

Earlier you reported that you received treatment or counseling for your use of alcohol during the past 12 months. How old were you when you first received treatment or counseling for your alcohol use?

NOTE: TXFGALAG is a "flag" variable that indicates when the first receipt of alcohol treatment in TXALONAG, TXALCDAG, TXYALAGE, TXYDRAAG, or TXYADAAG is inconsistent with the first use of alcohol (from ALCTRY). When TXFGALAG=5, the respondent previously reported never using alcohol. However, the respondent subsequently reported an age for first receipt of alcohol treatment, based on some indication of alcohol treatment in TXYRADG.

TXFGALAG¹	Len : 2 1CONSISTENCY OF ALC TX AGE WITH ALC AFU		
	0 = 1st alc tx age consistent with alc AFU.....	Freq	Pct

97 = REFUSED	84	0.15
98 = BLANK (NO ANSWER)	424	0.77
99 = LEGITIMATE SKIP	40567	73.71

SUBSTANCE TREATMENT

NOTE: TXSHGFLG compares the consistency of data in the self-help group variable TX12MSHG and the self-help group variable TXYRSHG. TXSHGFLG has a value of 1 when TX12MSHG was answered as "yes" but TXYRSHG indicates that respondents did not receive treatment in a self-help group, even though they reported that they received treatment in the past 12 months. TXSHGFLG has a value of 2 when TX12MSHG was answered as "yes" but TXYREVER or TXEVER indicated that respondents never received any treatment in the past 12 months or lifetime, respectively. TXSHGFLG has a value of 3 when TX12MSHG was not answered as "yes" but TXYRSHG indicates that respondents were logically inferred to have gotten treatment in a self-help group in the past 12 months. TXSHGFLG has a value of 4 when TX12MSHG was answered as "yes" but TXYRSHG was answered as "don't know" or "refused" or it was blank. Finally, TXSHGFLG has a value of 5 when TX12MSHG was answered as "don't know" or "refused" but TXYRSHG was answered as "no."

TXSHGFLG¹	Len : 2 1CONSISTENCY FLAG BETWEEN TX12MSHG AND TXYRSHG	Freq	Pct

RECODED SUBSTANCE TREATMENT

A respondent was classified as receiving treatment in the past year for alcohol use but not illicit drug use at a specialty facility, SPCALNIL, that is a hospital (inpatient), a rehabilitation facility (in or outpatient), or at a mental health center if they met one of the following conditions:

1. Reported receiving only alcohol treatment in the past year (TXYRADG=1) and that treatment was received at a specialty facility (TXYRHOSP=1,3,5 or TXYRRFIN=1,3,5 or TXYRRFOP=1,3,5 or TXYRMHC=1,3,5 or TXYROTS2=21,22,23,24,45,46,56,64,76,81).
2. Reported receiving only alcohol treatment in the past year but also reported receiving treatment for illicit drug use during their last or current treatment (TXYRADG=11), the reported alcohol treatment was received at one of the four specialty facilities (TXYRHOSP=1,3,5 or TXYRRFIN=1,3,5 or TXYRRFOP=1,3,5 or TXYRMHC=1,3,5 or TXYROTS2=21,22,23,24,45,46,56,64,76,81), and their last or current treatment was not at one of the four specialty facilities (LASTTXSP=0).
3. Reported receiving both illicit drug and alcohol treatment in the past year (TXYRADG=3,6) and reported specifically receiving only alcohol treatment at one of the four specialty facilities in the follow-up questions (TXYRHPAD=1 or TXYRINAD=1 or TXYRPOAD=1 or TXYRMHAD=1 or (TXYROTAD=1 and TXYROTS2=21,22,23,24,45,46,56,64,76,81)) but did not report specifically receiving illicit drug treatment or illicit drug and alcohol treatment at one of the four specialty facilities in the follow-up questions (TXYRHPAD NE 2,3 or TXYRINAD NE 2,3 or TXYRPOAD NE 2,3 or TXYRMHAD NE 2,3 or (TXYROTAD NE 2,3 and TXYROTS2=21,22,23,24,45,46,56,64,76,81) or TXYROTS2 NE 21,22,23,24,45,46,56,64,76,81).

For the logically assigned levels of TXYRADG, the creation of this variable may be unclear; therefore, details for classifying respondents as not receiving alcohol only treatment at a specialty facility for these logically assigned levels are below:

1. Reported receiving alcohol treatment in the past year but illicit drug treatment status is unknown (TXYRADG=4) or reported receiving illicit drug treatment in the past year but alcohol treatment status is unknown (TXYRADG=5).
2. Reported receiving only illicit drug treatment in the past year but also reported receiving treatment for alcohol during their last or current treatment (TXYRADG=12).
3. Reported receiving only alcohol treatment in the past year but also reported receiving treatment for illicit drug use during their last or current treatment (TXYRADG=11) and the reported alcohol treatment was not at a specialty facility (TXYRHOSP=2,94,97,98 and TXYRRFIN=2,94,97,98 and TXYRRFOP=2,94,97,98 and TXYRMHC=2,94,97,98 and TXYROTS2 NE 21,22,23,24,45,46,56,64,76,81).
4. Reported receiving only alcohol treatment in the past year but also reported receiving treatment for illicit drug use during their last or current treatment (TXYRADG=11) and their reported alcohol treatment was at a specialty facility (TXYRHOSP=1,3,5 or TXYRRFIN=1,3,5 or TXYRRFOP=1,3,5 or TXYRMHC=1,3,5 or TXYROTS2=21,22,23,24,45,46,56,64,76,81) but their last or current treatment was at a specialty facility (LASTTXSP=1) and included treatment for illicit drug use.

RECODED SUBSTANCE TREATMENT

A respondent was classified as receiving treatment in the past year for illicit drug use but not alcohol use at a specialty facility, SPCILNAL, that is a hospital (inpatient), a rehabilitation facility (in or outpatient), or at a mental health center if they met one of the following conditions:

1. Reported receiving only illicit drug treatment in the past year (TXYRADG=2) and that treatment was received at a specialty facility (TXYRHOSP=1,3,5 or TXYRRFIN=1,3,5 or TXYRRFOP=1,3,5 or TXYRMHC=1,3,5 or TXYROTS2=21,22,23,24,45,46,56,64,76,81).
2. Reported receiving only illicit drug treatment in the past year but also reported receiving treatment for alcohol use during their last or current treatment (TXYRADG=12), the reported illicit drug treatment was received at one of the four specialty facilities (TXYRHOSP=1,3,5 or TXYRRFIN=1,3,5 or TXYRRFOP=1,3,5 or TXYRMHC=1,3,5 or TXYROTS2=21,22,23,24,45,46,56,64,76,81), and their last or current treatment was not at one of the four specialty facilities (LASTTXSP=0).
3. Reported receiving both illicit drug and alcohol treatment in the past year (TXYRADG=3,6) and reported specifically receiving only illicit drug treatment at one of the four specialty facilities in the follow-up questions (TXYRHPAD=2 or TXYRINAD=2 or TXYRPOAD=2 or TXYRMHAD=2 or (TXYROTAD=2 and TXYROTS2=21,22,23,24,45,46,56,64,76,81)) but did not report specifically receiving alcohol treatment or illicit drug and alcohol treatment at one of the four specialty facilities in the follow-up questions (TXYRHPAD NE 1,3 or TXYRINAD NE 1,3 or TXYRPOAD NE 1,3 or TXYRMHAD NE 1,3 or (TXYROTAD NE 1,3 and TXYROTS2=21,22,23,24,45,46,56,64,76,81) or TXYROTS2 NE 21,22,23,24,45,46,56,64,76,81).

For the logically assigned levels of TXYRADG, the creation of this variable may be unclear; therefore, details for classifying respondents as not receiving illicit drug only treatment at a specialty facility for these logically assigned levels are below:

1. Reported receiving alcohol treatment in the past year but illicit drug treatment status is unknown (TXYRADG=4) or reported receiving illicit drug treatment in the past year but alcohol treatment status is unknown (TXYRADG=5).
2. Reported receiving only alcohol treatment in the past year but also reported receiving treatment for illicit drugs during their last or current treatment (TXYRADG=11).
3. Reported receiving only illicit drug treatment in the past year but also reported receiving treatment for alcohol use during their last or current treatment (TXYRADG=12) and the reported illicit drug treatment was not at a specialty facility (TXYRHOSP=2,94,97,98 and TXYRRFIN=2,94,97,98 and TXYRRFOP=2,94,97,98 and TXYRMHC=2,94,97,98 and TXYROTS2 NE 21,22,23,24,45,46,56,64,76,81).
4. Reported receiving only illicit drug treatment in the past year but also reported receiving treatment for alcohol use during their last or current treatment (TXYRADG=12) and their reported illicit drug treatment was at a specialty facility (TXYRHOSP=1,3,5 or TXYRRFIN=1,3,5 or TXYRRFOP=1,3,5 or TXYRMHC=1,3,5 or TXYROTS2=21,22,23,24,45,46,56,64,76,81) but their last or current treatment was at a specialty facility (LASTTXSP=1) and included treatment for alcohol use.

NOTE: The following 11 variables pertain to respondents feeling a need and making an effort to obtain treatment for a specific substance (NDEFXXX) in the past year.

A respondent was classified as feeling a need for substance use treatment and making an effort to get substance use treatment in the past year (NDEFXXX=1) if they felt a need for treatment for their substance use (FLTNDXXX=1) and if they met either of the following conditions:

(1) Reported making an effort to get treatment (NDTXEFTR=1,11).

(2) Reported making an effort to get ADDITIONAL treatment (NDTMREFT=1).

A respondent was classified as feeling a need for and NOT making an effort to get substance use treatment in the past year (NDEFXXX=2) if they felt a need for treatment for their substance use (FLTNDXXX=1) and if they met either of the following conditions:

(1) Reported NOT making an effort to get treatment (NDTXEFTR=2,12,94,97,98,99).

(2) Reported NOT making an effort to get ADDITIONAL treatment (NDTMREFT=2,94,97,98,99).

ADULT MENTAL HEALTH TREATMENT

ADULT MENTAL HEALTH TREATMENT

The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a¹.

These next questions are about treatment and counseling for problems with emotions, nerves or mental health. Please do not include treatment for alcohol or drug use.

NOTE: This variable incorporates the value from a probe question that was asked when the respondent answered REFUSED to this question.

During the past 12 months, have you stayed overnight or longer in a hospital or other facility to receive treatment or counseling for any problem you were having with your emotions, nerves, or mental health? Please do not include treatment for alcohol or drug use.

The list below includes some of the places where people can get outpatient treatment or counseling for problems with their emotions, nerves, or mental health.

During the past 12 months, did you receive any outpatient treatment or counseling for any problem you were having with your emotions, nerves, or mental health at any of the places listed below? Please do not include treatment for alcohol or drug use.

- An outpatient mental health clinic or center
- The office of a private therapist, psychologist, psychiatrist, social worker, or counselor that was not part of a clinic
- A doctor's office that was not part of a clinic
- An outpatient medical clinic
- A partial day hospital or day treatment program
- Some other place

Earlier, we asked whether you have received prescription medicines, inpatient treatment or outpatient treatment for your emotions, nerves or mental health. The list below contains possible sources of treatment, counseling or support that were not mentioned before.

- Acupuncturist or acupressurist
- Chiropractor
- Herbalist
- In-person support group or self-help group
- Internet support group or chat room
- Spiritual or religious advisor, such as a pastor, priest, rabbi
- Telephone hotline
- Massage therapist

Did you receive treatment, counseling or support from any other sources such as these during the past 12 months?

RECODED ADULT MENTAL HEALTH TREATMENT

RECODED ADULT MENTAL HEALTH TREATMENT

NOTE: The variables in this section are recoded variables that were created from one or more variables from the following sections: Adult Mental Health Treatment or Recoded Substance Treatment.

AMHINP2	Len : 1 RCVD INPATIENT MENTAL HEALTH TRT IN PST YR		
	. = Unknown/Aged 12-17 (AUINPYR=85,89,94,97,98,99)	Freq	Pct
	1 = Yes (AUINPYR=1)	18295	33.24
	2 = No (AUINPYR=2)	364	0.66
		36376	66.10

NOTE: AMHOUTP3 is similar to the variable AMHOUTP2 which was created in previous NSDUHs. The only difference is that those respondents who reported receiving outpatient mental health treatment/counseling in the past year at "Some Other Place" (AUOPTYR=1 and AUOPOTOP=1) only and their write-in response was classified as an invalid outpatient mental health treatment/counseling location or alternative treatment/support (AUOPYRS2=8,10,11,26) are defined as SAS missing instead of having a positive response. In addition to the responses described above, like AMHOUTP2, AMHOUTP3 was also defined as SAS missing for persons aged 12-17 and those coded as bad data, legitimate skip, don't know, refused, or blank (AUOPTYR=85,89,94,97,98,99).

AMHOUTP3 was assigned a positive response if a respondent indicated they had received outpatient mental health treatment/counseling in the past year (AUOPTYR=1) and they did not indicate an alternative source or invalid outpatient location (AUOPYRS2=8,10,11,26) as their only location for outpatient treatment.

AMHOUTP3	Len : 1 RCVD OUTPATIENT MENTAL HEALTH TRT IN PST YR

		31959	58.07

RECODED ADULT MENTAL HEALTH TREATMENT

The following variable, AMHSV TYP, classifies what type of mental health treatment/counseling was received in the past year. Respondents who reported receiving treatment for mental health were classified in one of 7 mutually exclusive categories. A respondent was assigned to level one if they reported receiving inpatient treatment only (AMHINP2=1 and AMHOUTP3=2 and AMHRX2=2), to level two if they reported receiving outpatient treatment only (AMHINP2=2 and AMHOUTP3=1 and AMHRX2=2), to level three if they reported receiving prescription medication treatment only (AMHINP2=2 and AMHOUTP3=2 and AMHRX2=1), to level four if they reported receiving both inpatient and outpatient treatment only (AMHINP2=1 and AMHOUTP3=1 and AMHRX2=2), to level five if they reported receiving inpatient and prescription medication treatment only (AMHINP2=1 and AMHOUTP3=2 and AMHRX2=1), to level six if they reported receiving outpatient and prescription medication treatment only (AMHINP2=2 and AMHOUTP3=1 and AMHRX2=1), or to level seven if they reported receiving inpatient, outpatient, and prescription medication treatment (AMHINP2=1 and AMHOUTP3=1 and AMHRX2=1). Respondents who did not receive mental health treatment in the past year were assigned to level eight (AMHINP2=2 and AMHOUTP3=2 and AMHRX2=2). Respondents whose specific treatment was not distinguishable due to missing values in one or more of the three source variables (AMHINP2, AMHOUTP3, or AMHRX2) were assigned a SAS missing.

RECODED ADULT MENTAL HEALTH TREATMENT

NOTE: The following 7 variables contain information about the location of outpatient mental health treatment/counseling received in the past year. These variables were revised for the 2009 NSDUH to include those respondents who reported receiving NO outpatient mental health treatment (AMHOUTP3=2) in the No category for the location. This differs from the variables named similarly in the past as they were only defined for those respondents who reported having received outpatient mental health treatment in the past year (AMHOUTP3=1) and those respondents who reported No outpatient mental health treatment were previously defined as SAS missing.

Only respondents who reported having received outpatient mental health treatment/counseling (AMHOUTP3=1) can be defined as having received it at the location. A respondent was allowed to report any of five specific locations or "Some Other Place". If a respondent reported "Some Other Place," they were asked to provide a description of the other location in a follow-up question. The first five variables below were created by examination of the variables containing information on the five specific locations, while the last two variables were created by examination of the variables containing information on the other-specify locations which were grouped into two main categories.

NOTE: The following variables, MHLSCHL3 and MHLOTH3, were created by examination of the other specified write-in responses for locations where a respondent received outpatient mental health treatment/counseling. See additional information included above the location of outpatient mental health treatment recode variable, MHLMNT3.

The following variable, MHLSCHL3, was assigned a positive response if a respondent indicated receiving outpatient mental health treatment/counseling in the past year (AMHOUTP3=1) at some location other than the five locations defined above (AUOPOTOP=1) and the location was classified as "School or University Setting/Clinic/Center" (AUOPYRSP=9). A negative response was assigned if the respondent indicated receiving outpatient mental health treatment/counseling in the past year (AMHOUTP3=1) at one of the five locations defined above but not some location other than these five locations (AUOPOTOP=6 AND AUOPYRS2=99), at some location other than the five locations defined above or "School or University Setting/Clinic/Center" and this location was classified as a valid outpatient treatment location (AUOPYRS2=1-4,12-16,18-20,23,24,28,29,43,44,47,58,70), or if they did not received outpatient mental health treatment in the past year (AMHOUTP3=2). Respondents who indicated receiving outpatient treatment in the past year (AMHOUTP3=1) at some location other than the five locations defined above (AUOPOTOP=1) and the location was classified as an invalid or alternative source of treatment (AUOPYRS2=7,8,10,11,22,30,36,39,55,56,71,72), bad data, don't know, refused, or blank (AUOPYRS2=85,94,97,98), aged 12-17 (AUOPYRS2=99 and AMHOUTP3=.), or classified as missing for receiving outpatient treatment in the past year (AMHOUTP3=.) were set to SAS missing.

RECODED ADULT MENTAL HEALTH TREATMENT

The following variable, MHLOTH3, was assigned a positive response if a respondent indicated receiving outpatient mental health treatment/counseling in the past year (AMHOUTP3=1) at some location other than the six locations defined above and was classified as a valid location for outpatient mental health treatment/counseling and not considered an alternative source of treatment (AUOPOTOP=1 and AUOPYRS2=12-16,18-20,23,24,28,29,44,47,58). A negative response was assigned if the respondent indicated receiving outpatient mental health treatment/counseling in the past year (AMHOUTP3=1) at one of the first five specified locations but not some location other than these locations (AUOPOTOP=6 and AUOPYRSP=99), indicated some other location to be one of the six specified locations defined above (AUOPYRS2=1-4,9,43), provided a name of a facility (AUOPYRS2=70) as the 'other' location, or if reported not receiving outpatient mental health treatment in the past year (AMHOUTP3=2). Respondents who indicated receiving outpatient treatment in the past year (AMHOUTP3=1) at some location other than the five locations defined above (AUOPOTOP=1) and the location was classified as an invalid or alternative source of treatment (AUOPYRS2=7,8,10,11,22,30,36,39,55,56,71,72), bad data, don't know, refused, or blank (AUOPYRS2=85,94,97,98), aged 12-17 (AUOPYRS2=99 and AMHOUTP3=.), or classified as missing for receiving outpatient treatment in the past year (AMHOUTP3=.) were set to SAS missing.

NOTE: The following 15 variables contain information about the reasons for not receiving mental health treatment/counseling that was needed in the past year. A respondent must have reported not receiving mental health treatment that was needed in the past year (AUUNMTYR=1) in order to be asked the questions on the reason for not receiving treatment. A respondent was allowed to report any of eight specific reasons or "Some Other Reason." If a respondent reported "Some Other Reason," they were allowed to report any of six additional specific reasons or report "Some Other Reason" again. If a respondent reported "Some Other Reason" again, they were then asked to provide the most important other reason in a follow-up question. The first 14 variables below were created by examination of the variables containing information on the fourteen specific reasons; while the last variable was created by examination of the most important other-specify reasons.

PSYCHOLOGICAL DISTRESS

PSYCHOLOGICAL DISTRESS

The next questions are about problems with your emotions, nerves, or mental health in the past 12 months.

Most people have periods when they are not at their best emotionally. Think of one month in the past 12 months when you were the most depressed, anxious, or emotionally stressed. If there was no month like this, think of a typical month.

During that month, how often did you feel nervous?

DSTNRVOS¹	Len : 2 1HOW OFT FELT NERVOUS IN WORST MONTH, PST 12 MOS		
		Freq	Pct

RECODED PSYCHOLOGICAL DISTRESS

RECODED PSYCHOLOGICAL DISTRESS

NOTE: The variables in this section are recoded variables that were created from one or more of the variables from the following two sections: Psychological Distress or Recoded Substance Dependence and Abuse.

NOTE: This section contains 2 sets of SPD recoded variables. The first set (SPD_USCR and SPD_UADJ) is based only on the K6 questions in the 2006 questionnaire. The second set (K6SMXADJ and SPDYRADJ) is also based on the K6 questions but is statistically adjusted to be comparable with the past year SPD recoded variables in 2008 and later NSDUHs.

NOTE: In the 2006 NSDUH, consistent with 2005, all respondents aged 18 or older were administered only 6 questions in the Psychological Distress module. The following recoded serious psychological distress variables, SPD_USCR and SPD_UADJ, were defined based on data collected from this series of six questions asking respondents how frequently they experienced symptoms of psychological distress during the one month in the past year when they were at their worst emotionally. These questions are known as the K6 and include the following symptoms of distress: feeling nervous (DSTNRVOS), feeling hopeless (DSTHOPLS), feeling restless or fidgety (DSTRSTLS), feeling so sad or depressed that nothing could cheer you up (DSTCHEER), feeling everything was an effort (DSTEFFRT), and feeling no good or worthless (DSTNGOOD). Specific details about the variables, SPD_USCR and SPD_UADJ are provided in the Recoded Mental Health Appendix.

In order to do multi-year trend analyses that includes the 2004 data please refer to the 2005 documentation for details on comparing data for these measures (including necessary weight adjustments).

The variable, SPD_USCR, is a score from 0 to 24 indicating the level of serious psychological distress (SPD). For adults, this score was calculated by assigning a value of 0 to 4 to each reported response regarding the frequency a respondent experienced symptoms of psychological distress (see above). Subsequently these assigned values were summed to calculate a total score.

SPD_USCR	Len : 2 SCORE INDICATING LEVEL OF UNADJUSTED SPD		
		Freq	Pct
	RANGE = 0 - 24.....	36801	66.87
	. = Aged 12-17 (AGE2<=6)	18234	33.13

SPD_UADJ	Len : 1 SERIOUS PSYCHOLOGICAL DISTRESS INDICATOR		
		Freq	Pct
	. = Aged 12-17 (AGE2<=6)	18234	33.13
	0 = No (AGE2>=7 and SPD_USCR<13)	31293	56.86
	1 = Yes (AGE2>=7 and SPD_USCR>=13)	5508	10.01

NOTE: The following two variables were created using statistical adjustments to allow comparisons with the past year SPD variables (K6SCMAX and SPDYR) which are available starting in the 2008 NSDUH. In 2008, K6 questions for the past 30 day reference period were added to the mental health module (referred to as the psychological distress module in 2006). This change prevented comparisons with past year SPD variables between 2004-2007 and 2008 and subsequent years. In order to compare the 2008 SPD variables with the 2005-2007 SPD variables, adjusted versions of the past year K6 total score (K6SMXADJ) and past year SPD (SPDYRADJ) were created. Adjusted variables were not created for 2004. The adjusted past year K6 total scores were used to classify respondents as having past year SPD, using the same cut point as the unadjusted variables. The 2005-2007 adjusted past year SPD variables K6SMXADJ and SPDYRADJ can be renamed to the 2008 and later SPD variable names, i.e., K6SCMAX and SPDYR, in order to make comparisons across years. The adjusted variables were first used to produce past year SPD estimates in the 2010 mental health detailed tables. Additional information on the adjustment that was applied can be found in the Recoded Mental Health Appendix.

K6SMXADJ	Len : 2 ADJUSTED WORST K6 TOTAL SCORE IN PAST YEAR		
		Freq	Pct

1 = Drug/Alc Dep/Abuse Only (SPD_UADJ=0 & ABODILAL=1)	3860	7.01
2 = Otherwise (See comment above).....	32941	59.85

NOTE: The following two variables are the outcomes measures of an alternative predictive model used to generate estimates of Serious Mental Illness (SMI) for 2005-2007. More information about this alternative model can be found in the report "Statistical Models to Predict Mental Illness from 2005 to 2007" (CBHSQ, 2017). Note the 2012 SMI predictive model is used in 2008 and subsequent years.

The following variable, SMIPP_A, is a predicted probability that a respondent has Serious Mental Illness (SMI) estimated using an alternative logistic regression model of SMI developed for 2005-2007 that used predictor variables consisting of past year suicidal thoughts, past year MDE, past year diagnosis of depression, K6, and the SDS. This exploratory variable was developed in an attempt to be comparable with the variable SMIPP_U for 2008 and later NSDUHs; however, it is based on a different set of predictors. Users should consider the differences in methodology prior to making any decision on whether and how to use this variable. For more information about this measure, please see the Recoded Mental Health appendix.

SMIPP_A Len : 12 PREDICTED SERIOUS MENTAL ILLNESS PROB ADJUSTED - ALT MODEL

	Freq	Pct
RANGE = 0.0002072124 - 0.9976962409.....	36801	66.87
. = 12-17 Years Old (AGE<18)	18234	33.13

RECODED PSYCHOLOGICAL DISTRESS

The following variable, SMIYR_A, is not recommended to be used when analyzing variables that were used as predictor variables for the SMI model: past year suicidal thoughts, past year MDE, past year diagnosis of depression, K6, or the SDS. Furthermore, the use of this variable is not recommended to be used when analyzing other variables closely linked with the predictor variables (including past year suicide attempts, suicide plans, medical treatment for suicide attempts, lifetime MDE or depression, SPD, or components used in the K6 or SDS scales). This exploratory variable was developed in an attempt to be comparable with the variable SMIYR_U for 2008 and later NSDUHs; however, it is based on a different set of predictors. Users should consider the differences in methodology prior to making any decision on whether and how to use this variable. For more information about this measure, please see the Recoded Mental Health appendix.

ADULT DEPRESSION

ADULT DEPRESSION

The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a¹.

NOTE: All of the respondents aged 18 or older were asked the questions in the Adult Depression module in this current survey year. In the 2004 survey, a subset of the adults was asked these questions.

Have you ever in your life had a period of time lasting several days or longer when most of the day you felt sad, empty or depressed?

ADULT DEPRESSION

Here is a list of professionals some people talk to about the problems we have been asking about:

- General practitioner or family doctor
- Other medical doctor like a cardiologist, gynecologist, urologist
- Psychologist
- Psychiatrist or psychotherapist
- Social Worker
- Counselor
- Other mental health professional, like a mental health nurse
- A nurse, occupational therapist, or other health professional
- A religious or spiritual advisor like a minister, priest, or rabbi
- Another healer, like an herbalist, chiropractor, acupuncturist, or massage therapist

At any time in the past 12 months, did you see or talk to a medical doctor or other professional about your [FEELNOUN]?

RECODED ADULT DEPRESSION

RECODED ADULT DEPRESSION

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the preceding section.

NOTE: This codebook contains two versions of adult lifetime and past year major depressive episode (MDE) variables. The unadjusted variables (MDELT and MDEYR), located in the Recoded Adult and Adolescent Depression section, are defined for both adult and adolescent respondents. Due to questionnaire changes in 2008, the unadjusted MDE variables for the adults are only comparable with 2004 sample B (ADLTSAMP=2) and between 2005 and 2007. The adjusted variables (AJAMDELT and AJAMDEYR), included in this section, are only defined for adult respondents. These variables were developed to allow comparisons of adult MDE data across years beginning with 2005 and continuing through 2008 and later years. Adjusted variables were not created for 2004. Specific details about both versions can be found in the Recoded Depression Variable Documentation Appendix.

The adjusted adult MDE variables (AJAMDELT and AJAMDEYR) were created using a weighted logistic regression model to compute predicted probabilities of past year MDE for each respondent. The predicted probabilities, which can have any value between 0 and 1, then were dichotomized such that each respondent was specified as having or not having MDE in the past year.

These variables have the same names for 2005-2008 but can be renamed to match the 2009 and later year adult MDE variables (AMDELT and AMDEYR) in order to make comparisons across years. No weight adjustments are needed when using the adjusted MDE variables. The adjusted variables were first used to produce lifetime and past year adult MDE estimates in the 2010 mental health detailed tables. The unadjusted MDE variables were used in the 2006 detailed tables (See the Recoded Adult and Adolescent Depression section). For more information on the creation of the adjusted adult depression variables see the Recoded Depression Variable Documentation Appendix.

AJAMDELT Len : 1 ADULT: ADJUSTED LIFETIME MAJOR DEPRESSIVE EPISODE

	Freq	Pct
. = Aged 12-17/Unknown (Otherwise)	18517	33.65
1 = Yes (see comment above)	5238	9.52
2 = No (see comment above).....	31280	56.84

AJAMDEYR Len : 1 ADULT: ADJUSTED PAST YEAR MAJOR DEPRESSIVE EPISODE

	Freq	Pct
. = Aged 12-17/Unknown (Otherwise)	18550	33.71
1 = Yes (see comment above AJAMDELT).....	2837	5.15
2 = No (see comment above AJAMDELT)	33648	61.14

NOTE: The following five variables in this section are based on questions asked of all applicable respondents regardless of whether they were ultimately classified as having a Major Depressive Episode (MDE) in their lifetime or not. If you would like estimates among persons with MDE, you will need to restrict your analysis by either the lifetime MDE variable (MDELT) or the past year MDE variable (MDEYR).

NOTE: The following four variables make up the four role domains (home management, work, close relationships with others, and social life) of the Sheehan Disability Scale (SDS), which measures the impact of a disorder on a person's life.

ASDSHOME Len : 1 ADULT: MDE ROLE IMPAIRMENT - HOME MANAGEMENT

1 = Yes (YUSHCNYR=1)	1871	3.40

NOTE: The following five variables, ANYMHIN, ANYMHOUT, ANYSMH, ANYMHED, and ANYSMHPS, were created to generate multi-year trend estimates for the 2007 Detailed Tables. The following two variables, ANYMHIN2 and ANYSMH2, were created to generate multi-year trend estimates for the 2013 Mental Health Detailed Tables. These variables contain information on the general types of mental health services received by youths in the past year for problems with behavior or emotions that were not caused by alcohol or drugs.

The following variable, ANYMHIN, indicates whether a youth reported receiving specialty inpatient/residential mental health services in the past year from any of 3 specific inpatient/residential sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created based on the following 3 sources of treatment variables: stayed overnight in hospital (YHOSP), stayed in residential treatment facility (YRESID), and spent time in foster care (YFOST). Youths who reported a positive response (source variable=1) to one or more of the 3 questions were included in the yes category regardless of how many of the 3 questions they answered. Youths who did not report a positive response, but answered all 3 of the questions were included in the no category. Youths who did not report a positive response and did not answer all the questions, and adults were included in the unknown/18+ category.

ANYMHIN Len : 1 YTH RCVD SPEC INPATIENT MH SERVICES IN PY

	Freq	Pct
. = Unknown/Aged 18+ (Otherwise)	36942	67.12
0 = No (YHOSP, YRESID, and YFOST = 0)	17604	31.99
1 = Yes (YHOSP, YRESID, or YFOST = 1)	489	0.89

The following variable, ANYMHOUT, indicates whether a youth reported receiving specialty outpatient mental health services in the past year from any of 4 specific outpatient sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created based on the following 4 source of treatment variables: spent time in a day treatment facility (YDAYTRT), received treatment from a mental health clinic (YCLIN), from a private therapist (YTHER), and from an in-home therapist (YHOME). Youths who reported a positive response (source variable=1) to one or more of the 4 questions were included in the yes category regardless of how many of the 4 questions they answered. Youths who did not report a positive response, but answered all 4 of the questions were included in the no category. Youths who did not report a positive response and did not answer all the questions, and adults were included in the unknown/18+ category.

1 = Yes (YDAYTRT, YCLIN, YTHER, or YHOME = 1)	2155	3.92

The following variable, ANYSMH, indicates whether a youth reported receiving specialty mental health services in the past year from any of 7 specific inpatient/residential or outpatient specialty sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created based on the following 7 source of treatment variables: stayed overnight in a hospital (YHOSP), stayed in a residential treatment facility (YRESID), spent time in foster care (YFOST), spent time in a day treatment facility (YDAYTRT), received treatment from a mental health clinic (YCLIN), from a private therapist (YTHER), and from an in-home therapist (YHOME). Youths who reported a positive response (source variable=1) to one or more of the 7 questions were included in the yes category regardless of how many of the 7 questions they answered. Youths who did not report a positive response, but answered all 7 of the questions were included in the no category. Youths who did not report a positive response and did not answer all the questions, and adults were included in the unknown/18+ category.

RECODED YOUTH MENTAL HEALTH TREATMENT

The following variable, ANYMHED, indicates whether a youth enrolled in school reported receiving mental health services in the past year from education sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created using the following source of treatment variables: talked to school counselors, school psychologist, or regular teacher for problems (YSCHL) and received special education services in the classroom or placed in a special classroom, program, or school (YSPED). Youths who reported a positive response (source variable=1) to one or more of these questions were included in the yes category regardless of how many of the questions they answered. Youths who did not report a positive response, but answered both questions were included in the no category. Youths who did not report a positive response and did not answer both questions, and adults were included in the unknown/18+ category.

1 = Yes (YSCHL or YSPED = 1).....	2268	4.12

The following variable, ANYSMHPS, indicates whether a youth reported receiving specialty mental health services along with services from either education or general medical (family doctor/pediatrician) settings in the past year for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created using the following 3 source of treatment variables: received specialty mental health services (ANYSMH), education setting-based mental health services (ANYMHED), and treatment from a family doctor/pediatrician (YPED). Included in the unknown/18+ category were adults and youths who did not provide enough information to determine whether mental health care was received at both a specialty mental health service along with services from either an education or general medical setting [ANYSMH=. or (ANYSMH=1 and ((ANYMHED=0 and YPED=.) or (ANYMHED=. and YPED=0) or (ANYMHED=. and YPED=.)]]).

The following variable, SPINVST, indicates how many overnight stays were reported at an inpatient/residential specialty mental health service in the past year. The number of overnight stays is calculated by adding the number of overnight stays at a hospital (YUHOSPN2), residential treatment center (YURSIDN2), and in foster care (YUFCARN2). A value of 6 (No Overnight Stays) was assigned whenever a respondent said they had used none of the services (YUHOSPYR, YURSIDYR, YUFCARYR all equal 2). A value of missing was assigned when the response to whether received treatment or number of overnight stays was unknown for any of the 3 locations (any of YUHOSPYR, YURSIDYR, YUFCARYR = 85,94,97,98 OR any of YUHOSPN2, YURSIDN2, YUFCARN2 = 985,994,997,998), unless the sum of the overnight stays for services with non-missing information was greater than or equal to 25, in which case a value of 5 (25 or more stays) was assigned. A missing value was also assigned for respondents aged 18 or older.

RECODED YOUTH MENTAL HEALTH TREATMENT

The following variable, SPOUTVST, indicates how many times a specialty outpatient mental health service was visited in the past year. The number of visits is calculated by adding the number of visits to a day treatment facility (YUDYTXN2), mental health clinic (YUMHCRN2), private therapist (YUTPSTN2), and an in-home therapist (YUIHTPN2). A value of 6 (No Visits) was assigned whenever a respondent said they had used none of the services (YUDYTXYR, YUMHCRYR, YUTPSTYR, YUIHTPYR all equal 2). A value of missing was assigned when the response to whether received treatment or number of visits was unknown for any of the 4 locations (any of YUDYTXYR, YUMHCRYR, YUTPSTYR, YUIHTPYR = 85,94,97,98 OR any of YUDYTXN2, YUMHCRN2, YUTPSTN2, YUIHTPN2 = 985,994,997, 998), unless the sum of the visits for services with non-missing information was greater than or equal to 25, in which case a value of 5 (25 or more visits) was assigned. A missing value was also assigned for respondents aged 18 or older.

RECODED YOUTH MENTAL HEALTH TREATMENT

NOTE: The following 78 variables were created and used in the 2007 analyses. These variables contain the reasons that youths received their most recent mental health service from various types of mental health sources.

NOTE: The following 13 variables contain the reasons that youths received their most recent mental health services from at least one inpatient/residential specialty mental health source for emotional or behavioral problems not caused by alcohol or drugs.

The following variable, SIMHSUI, indicates whether a respondent received their most recent mental health services from at least one inpatient/residential specialty mental health source in the past year because they thought about or tried to kill themselves. This recode was created by examination of the following source variables: stayed overnight in hospital (YUHOSUIC), residential treatment center (YURSSUIC), or in foster care (YUFCSUIC) because of suicidal thoughts. None of the write-in other-specify values were applicable for this variable. Adults, youths that did not report receiving services from any of the 3 inpatient/residential sources in the past year, and youths that reported receiving services in the past year, but did not indicate a valid reason for receiving services at any of these locations were assigned to the unknown category.

NOTE: The following 13 variables, FDOCXXX, indicate whether a respondent last talked with their family doctor or pediatrician in the past year because of respective reasons. Youths were assigned a "reason not indicated" for the specific reason if they did not indicate that specific reason for their last talk with their family doctor or pediatrician (YUFDXXX=6) but did indicate one of the other 12 reasons. Adults, youths that did not report or had unknown information about receiving services from a family doctor or pediatrician in the past year, and youths that reported receiving services in the past year, but did not indicate any valid reason for receiving services were assigned to the unknown category.

NOTE: The following 13 variables, SEMXXX, indicate whether a respondent last received any specialty mental health services along with services from either education or general medical (family doctor/pediatrician) settings in the past year because of respective reasons for problems with behavior or emotions that were not caused by alcohol or drugs. These recodes were created by examination of the following sources: received any specialty mental services (SMHXXX), received treatment from a family doctor or pediatrician (FDOCXXX), and talked to a school counselor, school psychologist, or regular teacher (SHCNXXX) in the past year because of respective reasons.

Respondents for the SEMXXX reason variables were treated as missing if 1) they were aged 18 or older 2) they did not receive care or it is unknown if they received care for any reason at any of the specialty mental health services (ANYSMH=0 or missing) or at both an education and general medical setting (YPED and YSCHL=0 or missing) or if 3) they did receive treatment at both of these services but did not indicate a valid reason for receiving services at a specialty mental health service along with services from either education or general medical setting, or there was not sufficient information to determine if these services were received for the specified reason. Respondents were categorized as not having received care for the specified reason if they were not categorized as missing and it could not be shown that they received care for the specified reason at a specialty mental health service along with services from either an education or general medical setting.

Note that responses for receipt of care for the specified reason are only taken into account for services received. For example, a respondent who indicated receiving both education and general medical services, and indicated that they did not receive care for the specified reason for education, but did not indicate any reason for medical will be assigned to the unknown category. However, if this respondent only indicated receiving education services then with the same responses to the reason questions, they would be assigned to the "No" category (assuming that they also did not receive care from any specialty services).

The following variable, ANYTRT10, indicates whether a youth reported receiving treatment/counseling in the past year from any of 10 specific sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created by counting the number of positive responses (source variables=1), and the number of questions answered (source variables=1,2,4) to the following 10 source of treatment questions: hospital (YUHOSPYR), residential treatment facility (YURSIDYR), foster care (YUFCARYR), day treatment facility (YUDYTXYR), mental health clinic (YUMHCRYR), private therapist (YUTPSTYR), in-home therapist (YUIHTPYR), family doctor (YUFDOCYR), through special education (YUSPEDYR), and school counselor (YUSHCNYR). Youths who reported a positive response to one or more of the 10 questions were included in the yes category regardless of how many of the 10 questions they answered. Youths who did not report a positive response, but answered 5 or more of the 10 questions were included in the no category. Youths who did not report a positive response, but answered fewer than 5 of the 10 questions, and adults were included in the unknown category.

	Freq	Pct
. = Unknown/Aged 18+ (See comment above).....	36895	67.04
0 = No (See comment above).....	14157	25.72
1 = Yes (Any above source variables=1).....	3983	7.24

The following variable, ANYMHIN2, indicates whether a youth reported receiving specialty inpatient/residential mental health services in the past year from any of two specific inpatient/residential sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created based on the following two sources of treatment variables: stayed overnight in hospital (YHOSP) and stayed in residential treatment facility (YRESID). Youths who reported a positive response (source variable=1) to either question were included in the yes category. Youths who did not report a positive response, but answered both questions were included in the no category. Youths who did not report a positive response and did not answer both questions, and adults, were included in the unknown/18+ category.

During the 2013 NSDUH process, it was determined that treatment received through foster care should not be included in the specialty treatment category instead; thus the revised variable ANYMHIN2 that does not include foster care was created and is available for all years back to 2002.

1 = Yes (YHOSP=1 or YRESID=1)	425	0.77

The following variable, ANYSMH2, indicates whether a youth reported receiving specialty mental health services in the past year from any of six specific inpatient/residential or outpatient specialty sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created based on the following six source of treatment variables: stayed overnight in a hospital (YHOSP), stayed in a residential treatment facility (YRESID), spent time in a day treatment facility (YDAYTRT), received treatment from a mental health clinic (YCLIN), from a private therapist (YTHER), and from an in-home therapist (YHOME). Youths who reported a positive response (source variable=1) to one or more of the six questions were included in the yes category regardless of how many of the six questions they answered. Youths who did not report a positive response, but answered all six of the questions were included in the no category. Youths who did not report a positive response and did not answer all the questions, and adults were included in the unknown/18+ category.

During the 2013 NSDUH process, it was determined that treatment received through foster care should be included in the nonspecialty treatment category instead; thus the revised variable ANYSMH2 was created and is available for all years back to 2002.

RECODED YOUTH MENTAL HEALTH TREATMENT

The following variable, ANYTRT9, indicates whether a youth reported receiving treatment/counseling in the past year from any of 9 specific sources for problems with behavior or emotions that were not caused by alcohol or drugs. This variable was created by counting the number of positive responses (source variables=1), and the number of questions answered (source variables=1,2,4) to the following 9 source of treatment questions: hospital (YUHOSPYR), residential treatment facility (YURSIDYR), foster care (YUFCARYR), day treatment facility (YUDYTXYR), mental health clinic (YUMHCRYR), private therapist (YUTPSTYR), in-home therapist (YUIHTPYR), family doctor (YUFDOCYR), and school counselor (YUSHCNYR). This variable was created in the same manner as ANYTRT10 (see above), except that the source of treatment question about special education (YUSPEDYR) was not included as a source variable. This variable was omitted because CAI did not include a follow-up question about the reasons for receiving mental health treatment at this source of treatment. Youths who reported a positive response to one or more of the 9 questions were included in the yes category regardless of how many of the 9 questions they answered. Youths who did not report a positive response, but answered 5 or more of the 9 questions were included in the no category. Youths who did not report a positive response, but answered fewer than 5 of the 9 questions, and adults were included in the unknown category.

RECODED YOUTH MENTAL HEALTH TREATMENT

NOTE: The following 13 variables were created and used in the 2006 analyses. They define the reasons youth reported receiving treatment across all the reported sources of treatment in the past year.

NOTE: For 9 of the 10 reported source of treatment/ counseling for problems with behavior or emotions that were not caused by alcohol or drugs (see ANYTRT9), the respondent was asked to report the reason(s) for the last time he/she received treatment from this source. The respondent was first allowed to choose from 5 specific reasons or 'some other reason.' If a respondent reported 'some other reason,' then he/she was allowed to choose from 6 additional specific reasons or 'some other reason.' If he/she again reported 'some other reason' then he/she was asked to specify the most important other reason for treatment/counseling. The first 5 specific reasons were: thought about or tried suicide, felt depressed, felt very afraid or tense, breaking rules and "acting out", and eating problems. The next 6 specific reasons were: trouble controlling anger, gotten into physical fights, problems at home or in the family, problems with friends, problems with people other than friends or family, and problems at school. Multiple reasons could be reported for each source of treatment, thus the response categories are not mutually exclusive. For each of the 9 sources of treatment there are 11 variables that contain data about the 11 specific reasons for treatment and 1 variable with the write-in other specify reason, resulting in 108 variables that include data about the reasons for treatment/counseling. The following recoded variables indicate the reasons youth reported for receiving treatment across all the reported sources of treatment in the past year. Note that these variables are only defined for youth who received treatment from one or more of the 9 sources and reported at least one reason for treatment.

The following variable, REASSUI2, indicates whether respondents received treatment/counseling from at least one source in the past year because they thought about or tried to kill themselves. This recode was created by examination of the following source variables: YUHOSUIC, YURSSUIC, YUFCSUIC, YUDYSUIC, YUMHSUIC, YUTPSUIC, YUIHSUIC, YUFDSUIC, and YUSHSUIC. None of the write-in other specify values were applicable for this variable. Adults, youths that did not report receiving treatment in the past year, and youths that reported receiving treatment in the past year at one or more of the 9 sources, but did not indicate any reasons for their treatment were assigned to the unknown category.

RECODED ADOLESCENT DEPRESSION

RECODED ADOLESCENT DEPRESSION

NOTE: The variables in this section are recoded variables that were created from one or more of the edited variables from the following sections: Adolescent Depression and Recoded Substance Dependence and Abuse. Specific details about the recoded variables are provided in the Recoded Depression Variable Documentation Appendix.

NOTE: Additional adolescent depression recoded variables can be found in the Recoded Adult and Adolescent Depression section along with additional information on how to use these recodes.

YMDEADA	Len : 1 YOUTH: PAST YEAR MDE AND SUB DEP OR ABUSE		
	. = Aged 18+/Unknown (Otherwise)	Freq	Pct
	0 = No (MDEYR=2 or ABODILAL=0)	37168	67.54
	1 = Yes (MDEYR=1 & ABODILAL=1).....	17584	31.95
		283	0.51

NOTE: The following variables in this section are based on questions asked of all applicable respondents regardless of whether they were ultimately classified as having a Major Depressive Episode (MDE) in their lifetime or past year. If you would like estimates among persons with MDE, you will need to restrict your analysis by either the lifetime MDE variable (MDELT) or the past year MDE variable (MDEYR).

NOTE: The following variable, YHLMDE, indicates whether a youth reported seeing or talking to a health professional about MDE in the past year. Youths were classified as having seen or talked to a health professional (YHLMDE=1) if they reported seeing or talking to any of the following professionals: general practitioner or family doctor (DOCMDE=1); other medical doctor (OMDMDE=1); psychologist (PSY1MDE=1); psychiatrist or psychotherapist (PSY2MDE=1); social worker (SOCMDE=1); counselor (COUNMDE=1); other mental health professional (OMHMDE=1); or nurse, occupational therapist, or other health professional (NURSMDE=1). Respondents were classified as having not seen or talked to a health professional (YHLMDE=0) if they reported not seeing or talking to all of the professionals listed above (source variable=0).

RECODED ADOLESCENT DEPRESSION

NOTE: The following four variables make up the four role domains (chores at home, school or work, close relationships with family, and social life) of the Sheehan Disability Scale (SDS), which measures the impact of a disorder on a person's life.

YSDSHOME Len : 1 YOUTH: MDE ROLE IMPAIRMENT - CHORES AT HOME

	Freq	Pct
. = Unknown/Legitimate Skip (YOPSHMGT=94,95,97,98,99).....	53649	97.48
1 = None (YOPSHMGT=0)	88	0.16
2 = Mild (YOPSHMGT=1,2,3)	295	0.54
3 = Moderate (YOPSHMGT=4,5,6).....	572	1.04
4 = Severe (YOPSHMGT=7,8,9).....	351	0.64
5 = Very Severe (YOPSHMGT=10)	80	0.15

YSDSWRK Len : 1 YOUTH: MDE ROLE IMPAIRMENT - SCHOOL OR WORK

	Freq	Pct
. = Unknown/Legitimate Skip (YOPSWORK=94,95,97,98,99)	53655	97.49
1 = None (YOPSWORK=0).....	55	0.10
2 = Mild (YOPSWORK=1,2,3).....	253	0.46
3 = Moderate (YOPSWORK=4,5,6)	516	0.94
4 = Severe (YOPSWORK=7,8,9)	452	0.82
5 = Very Severe (YOPSWORK=10).....	104	0.19

YSDSREL Len : 1 YOUTH: MDE ROLE IMPAIRMENT - FAMILY RELATIONSHIPS

	Freq	Pct
. = Unknown/Legitimate Skip (YOPSRELS=94,95,97,98,99).....	53631	97.45
1 = None (YOPSRELS=0)	43	0.08
2 = Mild (YOPSRELS=1,2,3).....	188	0.34
3 = Moderate (YOPSRELS=4,5,6)	455	0.83
4 = Severe (YOPSRELS=7,8,9).....	542	0.98
5 = Very Severe (YOPSRELS=10).....	176	0.32

YSDSSOC Len : 1 YOUTH: MDE ROLE IMPAIRMENT - SOCIAL LIFE

	Freq	Pct
. = Unknown/Legitimate Skip (YOPSSOC=94,95,97,98,99)	53641	97.47
1 = None (YOPSSOC=0)	37	0.07
2 = Mild (YOPSSOC=1,2,3)	220	0.40
3 = Moderate (YOPSSOC=4,5,6).....	499	0.91
4 = Severe (YOPSSOC=7,8,9)	503	0.91
5 = Very Severe (YOPSSOC=10)	135	0.25

The following variable, YSDSOVRL, is assigned the maximum level of interference over the four role domains of SDS: chores at home (YSDSHOME), school or work (YSDSWRK), family relationships (YSDSREL), and social life (YSDSSOC).

YSDSOVRL Len : 1 YOUTH: MAX SEVERITY LEVEL OF MDE ROLE IMPAIRMENT

	Freq	Pct
. = Unknown/Legitimate Skip (Otherwise)	53595	97.38
1 = None (See comment above)	6	0.01
2 = Mild (See comment above)	74	0.13
3 = Moderate (See comment above).....	349	0.63
4 = Severe (See comment above)	724	1.32
5 = Very Severe (See comment above)	287	0.52

The following variable, MDEIMPY, is derived from the acmaximum severity level of MDE role impairment (YSDSOVRL) and past year MDE (MDEYR).

MDEIMPY Len : 1 YOUTH: HAD MDE WITH SEVERE ROLE IMPAIRMENT

	Freq	Pct
. = Unkn/Age 18+ (CATAG2=2,3 or MDEYR=. or YSDSOVRL=.)	37178	67.55
1 = Yes (CATAG2=1 and MDEYR=1 and YSDSOVRL=4,5)	1000	1.82
2 = No (CATAG2=1 and (MDEYR=2 or YSDSOVRL=1,2,3))	16857	30.63

RECODED ADULT AND ADOLESCENT DEPRESSION

RECODED ADULT AND ADOLESCENT DEPRESSION

NOTE: The variables in this section are recoded variables that were created from one or more of the variables from the Adult Depression and Adolescent Depression sections.

NOTE: This codebook contains two versions of adult lifetime and past year major depressive episode (MDE) variables. The unadjusted variables (MDELTA and MDEYR), located in this section, are defined for both adult and adolescent respondents. Due to questionnaire changes in 2008 the unadjusted MDE variables for adults are only comparable with 2004 sample B (ADLTSAMP=2) and other years between 2005 and 2007. The adjusted variables (AJAMDELTA and AJAMDEYR), included in the Recoded Adult Depression section, are only defined for adult respondents. These variables were developed to allow comparisons of adult MDE data across years beginning with 2005 and continuing through 2008 and later years. Adjusted variables were not created for 2004. Specific details about both versions can be found in the Recoded Depression Variable Documentation Appendix.

The unadjusted MDE variables were used in the 2006 detailed tables. Adjusted MDE variables (AJAMDELTA and AJAMDEYR) were developed to allow comparisons across years beginning with 2005 (See the Recoded Adult Depression section). The adjusted variables were first used to produce lifetime and past year adult MDE estimates in the 2010 mental health detailed tables. For more information on the creation of the unadjusted adult depression variables see the Recoded Depression Variable Documentation Appendix.

Additional adolescent depression recodes are available in the Recoded Adolescent Depression section and are defined for only youth.

A respondent was classified as having a major depressive episode (MDE) in their lifetime (MDELTA=1) if they reported experiencing at least 5 out of the 9 criteria used to define an adult as having had MDE in their lifetime, where at least one of the criteria is a depressed mood or loss of interest or pleasure in daily activities (ADSMMDEA=1).

A respondent was classified as NOT having a major depressive episode (MDE) in their lifetime (MDELTA=2) if they met either of these conditions:

(1) Reported experiencing fewer than 5 out of the 9 criteria used to define a person as having had MDE in their lifetime (ADSMMDEA=2 or YODSMMDE=2)

(2) If the number of criteria used to define a person as having had MDE in their lifetime is unknown (ADSMMDEA=98 or YODSMMDE=98) and reported at least one of the following:

(I) Never having had a period of time lasting several days or longer when felt sad, empty, or depressed (ADDPREV=2 or YODPREV=2), discouraged about how things were going in life (ADDSCEV=2 or YODSCEV=2), and lost interest in most things usually enjoy (ADLOSEV=2 or YOLOSEV=2).

(II) Never having had a period of time when being sad, discouraged, or having lost interest in most things usually enjoy lasting nearly every day for two weeks or longer [(ADLSI2WK=2 or YOLSI2WK=2) and (ADDP2WK=2 or YODP2WK=2)].

(III) Having a period of time when being sad, discouraged, or having lost interest in most things usually enjoy lasted nearly every day for two weeks or longer and the sadness, discouragement, or loss of interest lasted less than an hour when mood was most severe and frequent (ADWRHRS=1 or YOWRHRS=1).

(IV) Having a period of time when being sad, discouraged, or having lost interest in most things usually enjoy lasted nearly every day for two weeks or longer and during those times when mood was most severe and frequent, emotional distress was mild (ADWRDST=1 or YOWRDST=1), there was never a time when emotional distress was so severe that you could not be cheered up (ADWRCHR=4 of YOWRCHR=4), and there was never a time when your emotional distress was so severe that you could not carry out your daily activities (ADWRIMP=4 or YOWRIMP=4).

(v) Having a period of time when being sad, discouraged, or having lost interest in most things usually enjoy lasted nearly every day for two weeks or longer and never had any other problems during those weeks, such as changes in sleep, appetite, energy, the ability to concentrate and remember, or feelings of low self-worth (YODPPROB=2).

MDELTA	Len : 1 HAD LIFETIME MAJOR DEPRESSIVE EPISODE (MDE)

RECODED ADULT AND ADOLESCENT DEPRESSION

The following variable, OMHMDE, indicates whether a person saw or talked to a mental health professional, such as a mental health nurse or other therapist where type not specified, in the past year for MDE.

A respondent was classified as having seen or talked to other mental health professional about MDE during the past year (OMHMDE=1) if they met either of these conditions:

- (1) Reported seeing or talking to a medical doctor or other professional during the past year (ADOTHMHP =1 or YOOTHMHP=1,3).
- (2) Response entered for whether other mental health professional was seen or talked to during the past year.

A respondent was classified as NOT having seen or talked to other mental health professional about MDE during the past year (OMHMDE=0) if they met either of these conditions:

- (1) Reported NOT seeing or talking to a medical doctor or other professional during the past year (ADSEEDOC=2 or YOSEEDOC=2).
- (2) Response not entered for whether other mental health professional was seen or talked to during the past year (ADOTHMHP=6 or YOOTHMHP=6).

OMHMDE Len : 1 SAW/TALK TO OTHER MENTAL HEALTH PROF ABOUT MDE -PY

	Freq	Pct
. = Unknown/Legitimate Skip (Otherwise)	46914	85.24
0 = No (See comment above)	7932	14.41
1 = Yes (See comment above).....	189	0.34

A respondent was classified as NOT having seen or talked to a nurse, occupational therapist, or other health professional about MDE during the past year (NURSMDE=0) if they met either of these conditions:

- (1) Reported NOT seeing or talking to a medical doctor or other professional during the past year (ADSEEDOC=2 or YOSEEDOC=2).
- (2) Response not entered for whether nurse was seen or talked to during the past year (ADNURSE=6 or YONURSE=6).

CONSUMPTION OF ALCOHOL

CONSUMPTION OF ALCOHOL

The values in the section may be inconsistent with values from the core section(s). Items in this section were edited when respondents legitimately skipped out of these items based on prior answers in the core section(s). Otherwise, non-core items generally were not edited to make them consistent with core items, and core items were not edited to make them consistent with non-core items. This note applies to variables in this section marked by a¹.

The next few questions return to the topic of alcohol. Remember that by a drink, we mean a can or bottle of beer, a glass of wine or a wine cooler, a shot of liquor, or a mixed drink with liquor in it. We are not asking about times when you only had a sip or two from a drink.

Earlier, the computer recorded that you drank at least one alcoholic beverage within the past 30 days, that is, since [DATEFILL].

Please think about the last time you drank any alcoholic beverage. How many drinks did you have that time?

CADRLAST¹ Len : 3 1# OF DRINKS THE LAST TIME DRANK IN PAST 30 DAYS

	.	Freq	Pct
	. = Unknown (CADREVNT=91,93,94,97,98,99).....	48396	87.94
	1 = Yes (CADREVNT=1,3).....	107	0.19
	2 = No (CADREVNT=6).....	6532	11.87

UADSCHL	Len : 1 MOST RECENT ALCOHOL USE AT SCHOOL		
	.	Freq	Pct
	. = Unknown (CADRSCHL=91,93,94,97,98,99).....	48396	87.94
	1 = Yes (CADRSCHL=1,3).....	183	0.33
	2 = No (CADRSCHL=6).....	6456	11.73

RECODED CONSUMPTION OF ALCOHOL

The following variable, UADROTH, was assigned a negative response if a respondent indicated not receiving their most recent alcohol from some other place (CADROTH=6) or indicated receiving their most recent alcohol from one of the other specific locations asked about (CADROTH=1 & CADROTS2=1-7). A missing was assigned if a respondent indicated that they received their most recent alcohol from some other place (CADROTH=1) and their response to the other specify follow-up question was invalid or unknown (CADROTS2=70,85,94,97) or if they were not alcohol users, or did not indicate any location for their most recent alcohol use (CADROTH=91,93,94,97,98,99).

UADROTH Len : 1 MOST RECENT ALCOHOL USE AT SOME OTHER PLACE

	Freq	Pct
. = Unknown (See comment above)	48516	88.15
1 = Yes (CADROTH=1 and CADROTS2=8-35)	481	0.87
2 = No (See comment above)	6038	10.97

UADOTSP Len : 1 OTHER LOCATIONS OF MOST RECENT ALCOHOL USE

	Freq	Pct
. = Unknown (CADROTS2=70,85,94,97,98)	595	1.08
1 = Party, wedding, or celebration (CADROTS2=35)	132	0.24
2 = Outside; Location not specified (CADROTS2=24)	68	0.12
3 = Hotel, motel, or resort (CADROTS2=15)	63	0.11
4 = Camping, hunting, or fishing (CADROTS2=22)	30	0.05
5 = Cabin, cottage, vacation home, etc. (CADROTS2=14)	18	0.03
6 = Dorm room (CADROTS2=29)	18	0.03
7 = Other location, nonuser, or aged 21+ (Otherwise)	54111	98.32

UADPAID Len : 1 UNDERAGE DRINKER PAID FOR MOST RECENT ALCOHOL

	Freq	Pct
. = Unknown (CABUYFRE=85,94,97,98)	431	0.78
1 = Yes (CABUYFRE=1)	2004	3.64
2 = No (CABUYFRE=2)	4679	8.50
3 = No Past Mon Alc/Aged 21+ (CABUYFRE=89,91,93,99)	47921	87.07

A respondent was assigned a value of UADMONY=3 if they did not use alcohol in the past month, were aged 21 or older, or were past month alcohol users who were under 21 but did not pay for their most recent alcohol (CAGVMONY=89,91,93,99).

UADMONY Len : 1 UNDERAGE DRINKER PURCHASED MOST RECENT ALCOHOL

	Freq	Pct
. = Unknown (CAGVMONY=85,94,97,98)	447	0.81

The following variable, DRKIEEM, was created to capture the use of any illicit drug other than marijuana with the respondents most recent use of alcohol. It was created by examination of the following recoded variables: DRKCOC, DRKHER, DRKHAL, DRKINH, DRKANL, DRKTRN, DRKSTM, DRKMTH and DRKSED. A positive response was assigned if a respondent answered 'Yes' to any of these individual drugs. A negative response was assigned if a respondent answered 'No' to all of these drugs or they were not a past month user of any illicit drug other than marijuana (IEMMON=0). If neither of these was true, then DRKIEEM was set to missing.

0 = No (CADRKMJR=6,89,91,93,99)	52553	95.49
1 = Yes (CADRKMJR=1,5)	2263	4.11

The following variable, DRKMTH, was created to capture the respondent's use of methamphetamine with his or her most recent use of alcohol. A positive response was assigned if the respondent reported methamphetamine use with his or her most recent alcohol use (CADRMTH=1, 5) and if he or she reported methamphetamine use in the core Stimulants module or he or she reported its use in the noncore Special Drugs module and they did not report methamphetamine use in the core Stimulants module because he or she did not consider it to be a prescription drug. A negative response was assigned if the respondent reported no methamphetamine use with his or her most recent alcohol use or reported never having used alcohol or methamphetamine or not having used in the past 30 days (CADRMTH=6,81,83,89,91,93,99). A negative response could also be assigned if a respondent reported methamphetamine use with his or her most recent alcohol use (CADRMTH=1,5) but he or she did not report ever having used methamphetamine in the core Stimulants module or in the noncore Specialty Drug module because they did not consider it to be a prescription drug.

DRKMTH Len : 1 USED METHAMPHETAMINE WITH LAST ALCOHOL USE

The following variable, IRPINSUR, is the imputation revised version of the edited variable PRVHLTIN.

IRPINSUR	Len : 1 IMPUTATION - REVISED PRIVATE HEALTH INSURANCE		
		Freq	Pct
	1 = Yes, respondent does have private health insurance	35387	64.30
	2 = No, respondent does not have private health insur	19648	35.70

IIPINSUR	Len : 1 IMPUTATION - INDICATOR IRPINSUR		
		Freq	Pct
	1 = Questionnaire data	54663	99.32
	3 = Statistically imputed data	372	0.68

HOUSEHOLD COMPOSITION (ROSTER)

For IRINSUR, a respondent is classified as having any health insurance (IRINSUR=1) if he/she satisfied ANY of the following conditions.

- (1) Covered by Private Health Insurance (PRVHLTIN=1)
- (2) Covered by Medicare (MEDICARE=1)
- (3) Covered by Medicaid (answered question QHI02 as yes)
- (4) Covered by Champus, Champva, Va, or Military (CHAMPUS=1)

A respondent is classified as NOT having any health insurance (IRINSUR=2) if he/she met EVERY one of the following conditions.

- (1) Not covered by Private Health Insurance (PRVHLTIN=2)
- (2) Not covered by Medicare (MEDICARE=2)
- (3) Not covered by Medicaid (answered question QHI02 as no)
- (4) Not covered by Champus, Champva, Va, or Military (CHAMPUS=2)

Responses to question QHI02 were used in part to create the variable CAIDCHIP. However, CAIDCHIP took into account responses to another question that was not used to create IRINSUR.

If the respondent is not classified as having or not having any health insurance according to the respondent's answers to questions about private health insurance, Medicare, Medicaid, or military health coverage, then he/she is imputed to either of these two categories, where consistency is maintained between IRINSUR, IRINSUR3, and IRPINSUR.

IRINSUR	Len : 1 IMPUTATION - REVISED HEALTH INSURANCE	Freq	Pct
	1 = Yes, respondent does have health insurance.....	43932	79.83
	2 = No, respondent does not have health insurance	11103	20.17

IIINSUR	Len : 1 IMPUTATION - INDICATOR IRINSUR	Freq	Pct
	1 = Questionnaire data	54638	99.28
	2 = Logically assigned data.....	7	0.01
	3 = Statistically imputed data	390	0.71

HOUSEHOLD COMPOSITION (ROSTER)

The IRINSUR3 variable is similar to IRINSUR. The only difference is that it uses the variable CAIDCHIP (Covered by Medicaid or state health insurance programs for children) instead of MEDICAID (Covered by Medicaid), and it uses an additional variable, HLTINNOS (covered by any other health insurance). This results from changes in the 2001 questionnaire when compared to previous years.

For IRINSUR3, a respondent is classified as having any health insurance (IRINSUR3=1) if he/she satisfied ANY of the following conditions.

- (1) Covered by Private Health Insurance (PRVHLTIN=1)
- (2) Covered by Medicare (MEDICARE=1)
- (3) Covered by Medicaid or state health insurance programs for children (CAIDCHIP=1)
- (4) Covered by Champus, Champva, Va, or Military (CHAMPUS=1)
- (5) Covered by any type of health insurance (not otherwise specified) (HLTINNOS=1)

A respondent is classified as NOT having any health insurance (IRINSUR3=2) if he/she met EVERY one of the following conditions.

- (1) Not covered by Private Health Insurance (PRVHLTIN=2)
- (2) Not covered by Medicare (MEDICARE=2)
- (3) Not covered by Medicaid or state health insurance programs for children (CAIDCHIP=2)
- (4) Not covered by Champus, Champva, Va, or Military (CHAMPUS=2)
- (5) Not covered by any type of health insurance (not otherwise specified) (HLTINNOS=2)

If the respondent is not classified as having or not having any health insurance according to PRVHLTIN, MEDICARE, CAIDCHIP, CHAMPUS, and HLTINNOS, then he/she is imputed to either of these categories, where consistency is maintained between IRINSUR, IRINSUR3, and IRPINSUR.

IRINSUR3	Len : 1 IMPUTATION - REVISED HEALTH INSURANCE		
	1 = Yes, respondent does have health insurance.....	Freq	Pct
	2 = No, respondent does not have health insurance	45975	83.54
		9060	16.46
IIINSUR3	Len : 1 IMPUTATION - INDICATOR IRINSUR3		
	1 = Questionnaire data	Freq	Pct
	2 = Logically assigned data.....	54611	99.23
	3 = Statistically imputed data	7	0.01
		417	0.76

HOUSEHOLD COMPOSITION (ROSTER)

Starting in 2002, missing values in the variables describing the type of health insurance were imputed. In particular, missing values in the edited variables PRVHLTIN (private health insurance), MEDICARE, CAIDCHIP (Medicaid/children's state-assisted health insurance), CHAMPUS, and a modified version of HLTINNOS (other health insurance) were imputed. The overall health insurance variable was then created by combining the information from the detailed imputation-revised variables in the variable IRINSUR4. This differs from the method used in 1999-2001 where the edited health insurance variables were combined before imputation to create a recoded overall health insurance variable, the missing values of which were imputed in the variable IRINSUR3. As in previous years, missing values in PRVHLTIN were imputed. However, the name has changed (IRPINSUR in 1999-2001, IRPRVHLT in 2002) to reflect the fact that the imputation of missing values in PRVHLTIN was univariate from 1999-2001, and multivariate (with the other detailed variables) in 2002.

IRMCDCHP	Len : 1	IMPUTATION REVISED CAIDCHIP

		1 = Questionnaire data	Freq	Pct
		3 = Statistically imputed data	54663	99.32
			372	0.68

HOUSEHOLD COMPOSITION (ROSTER)

A respondent is eligible for the other health insurance question if they satisfied the following conditions.

- (1) Not Covered by Private Insurance (IRPRVHLT=2)
- (2) Not Covered by Medicare (IRMEDICR=2)
- (3) Not Covered by Medicaid/CHIPCOV (IRMCDCHP=2)
- (4) Not Covered by Champus, ChampVA, VA, or Military (IRCHMPUS=2)

Otherwise, they are not eligible and IROTHHLT=99

IROTHHLT	Len : 2 IMPUTATION REVISED OTHER HEALTH INSURANCE	Freq	Pct
	1 = Yes, R is covered by other health insurance	1174	2.13
	2 = No, R is not covered by other health insurance	9077	16.49

IIOTHHLT	Len : 1 IMPUTATION INDICATOR FOR IROTHHLT	Freq	Pct
	1 = Questionnaire data	10123	18.39
	3 = Statistically imputed data	417	0.76
	9 = Legitimate skip	44495	80.85

NOTE: The variable HLCALLFG is a created "flag" variable that indicates when a respondent (or proxy) reported that the respondent was covered by all of the following: Medicare, Medicaid, the Children's Health Insurance Program (if aged 12 to 19), military health care, and private health insurance. The variable HLCALL99 also is a created "flag" variable that indicates when respondents were reported to be covered by Medicare, Medicaid, military health care, and private health insurance. This HLCALL99 variable is comparable to HLCALLFG in 1999, when these four types of health insurance were the only types of current coverage that were asked about in the interview.

HLCALLFG	Len : 2 FLAG IF EVERY FORM OF HEALTH INS REPORTED	Freq	Pct
	1 = Answered yes to all current health insurance Qs	9	0.02
	98 = BLANK (NO ANSWER)	55026	99.98

HLCALL99	Len : 2 YES TO MEDICARE/MEDICAID/CHAMPUS/PRVHLTIN	Freq	Pct
	1 = Yes (see comment above)	9	0.02
	98 = BLANK (NO ANSWER)	55026	99.98

NOTE: The following variable, ANYHLT12, was created from the source variables MEDICARE, CAIDCHIP, CHAMPUS, PRVHLTIN, and HLTINNOS.

ANYHLT12	Len : 2 COVERED BY ANY HEALTH INSURANCE - RECODE	Freq	Pct
	1 = Yes	45646	82.94
	2 = No	8972	16.30
	94 = DON'T KNOW	371	0.67
	97 = REFUSED	24	0.04
	98 = OTHER MISSING	22	0.04

For IRINSUR4, a respondent is classified as having any health insurance (IRINSUR4=1) if they satisfied ANY of the following conditions.

- (1) Covered by Private Insurance (IRPRVHLT=1)
- (2) Covered by Medicare (IRMEDICR=1)
- (3) Covered by Medicaid/children's state-assisted health insurance (IRMCDCHP=1)
- (4) Covered by Champus, ChampVA, VA, or Military (IRCHMPUS=1)
- (5) Covered by Other Health Insurance (IROTHHLT=1)

A respondent is classified as NOT having any health insurance (IRINSUR4=2) if they meet EVERY one of the following conditions.

- (1) Not Covered by Private Insurance (IRPRVHLT=2)
- (2) Not Covered by Medicare (IRMEDICR=2)
- (3) Not Covered by Medicaid/children's state-assisted health insurance (IRMCDCHP=2)
- (4) Not Covered by Champus, ChampVA, VA, or Military (IRCHMPUS=2)
- (5) Not Covered by Other Health Insurance (IROTHHLT=2)

INCOME AND INSURANCE

INCOME AND INSURANCE

NOTE: The variable INCSAMP reflects the split-sample design for the Income module. Respondents in Sample A received the same set of income questions as in the 2005 survey. Respondents in Sample B received a reduced set of income questions. However, edited variables continue to have the same names that they had in prior years. If a question corresponding to a given variable was not administered to respondents in Sample B, it was assigned a LEGITIMATE SKIP code.

INCSAMP	Len : 2	INCOME SPLIT SAMPLE INDICATOR		
		1 = Sample A.....	Freq	Pct
		2 = Sample B.....	51907	94.32
			3128	5.68

NOTE: The variables which immediately follow refer to questions about the kinds and amounts of income received. Only imputed variables are included since other variables do not provide any additional analytic utility. Users can differentiate between imputed and non-imputed values using the imputation indicators. Questions about income from the questionnaire are not reproduced since the variables below do not correspond exactly to those questions. Edited and imputed health insurance variables, with the accompanying questionnaire questions, follow the income variables.

RECODED INCOME AND INSURANCE

RECODED INCOME AND INSURANCE

NOTE: The variables in this section are recoded variables that were created from one or more of the variables from the preceding section.

The following variable, GOVTPROG, was created by examination of these government assistance program variables: Supplemental Security Income (IRFAMSSI), food stamps (IRFSTAMP), cash assistance (IRFAMPMT), and non-cash assistance (IRFAMSVC).

GOVTPROG	Len : 1	PARTICIPATED IN ONE OR MORE GOVT ASSIST PROGRAMS		
			Freq	Pct
		1 = YES (ANY SOURCE VARIABLE=1)	10115	18.38
		2 = NO (ALL SOURCE VARIABLES=2).....	44920	81.62

INCOME	Len : 1	TOTAL FAMILY INCOME RECODE		
			Freq	Pct
		1 = Less than \$20,000	12602	22.90
		2 = \$20,000 - \$49,999.....	19539	35.50
		3 = \$50,000 - \$74,999.....	9346	16.98
		4 = \$75,000 or More	13548	24.62

The following variable, POVERTY2, indicates a person's family income relative to poverty thresholds. The U.S. Census Bureau assigns a poverty threshold for each combination of family size and number of children in the household. To be at 100% of the poverty threshold is equivalent to having a family income that is the same as the poverty threshold. A poverty level less than 100% indicates having a family income less than the poverty threshold and therefore defined by the Federal government as living in poverty. A poverty level greater than 100% indicates having a family income greater than the poverty threshold.

POVERTY2 was created for each individual based on their poverty threshold (determined by their age, family size, the number of children in the household, and total family income). Since NSDUH only collects categorical values of family income, for each level of income, the midpoint of each range was assigned as the effective family income. However, for the unbounded highest level of income, an effective family income of \$120,000 was assigned. Effective family income was divided by the poverty threshold and multiplied by 100 to show family income as a percentage of the federal poverty threshold. Respondents aged 18 to 22 currently living in a college dormitory (GQTYPE2='C') were set to SAS missing and do not have a valid value for this variable.

POVERTY2	Len : 1	POVERTY LEVEL (% OF US CENSUS POVERTY THRESHOLD)		
			Freq	Pct
		. = Persons Aged 18 to 22 Living in a College Dorm	790	1.44

CORE DEMOGRAPHICS

DEMOGRAPHICS

CORE DEMOGRAPHICS

NOTE: After a respondent has entered his/her birthdate in the first part of the questionnaire, he/she has multiple opportunities to change his/her age in response to consistency checks throughout the questionnaire. It is therefore possible for the age recorded by the respondent at the beginning of the questionnaire to be different than the age at the end of the questionnaire. The final age variable is determined using these two constituent age variables, in addition to the age calculated from the raw birthdate and the final edited interview date, the age entered in the questionnaire roster (if it exists), and the pre-interview screener age.

AGE2 Len : 2 RECODE - FINAL EDITED AGE

	Freq	Pct
1 = Respondent is 12 years old.....	2791	5.07
2 = Respondent is 13 years old.....	3026	5.50

NON-CORE DEMOGRAPHICS

NON-CORE DEMOGRAPHICS

For the remaining questions, I will read the question out loud, you can tell me your answer, and I will enter it into the computer.

How many times in the past 12 months have you moved?

MOVESPY2	Len : 3 # TIMES MOVED PAST 12 MONTHS		
		Freq	Pct
	0 = None.....	37244	67.67
	1 = One time.....	11138	20.24
	2 = Two times.....	3805	6.91
	3 = Three or more times.....	2803	5.09
	994 = DON'T KNOW.....	24	0.04
	997 = REFUSED.....	3	0.01
	998 = BLANK (NO ANSWER).....	18	0.03

NOTE: EIMOVPIR is an indicator of editing to MOVESPY2. The default value for EIMOVPIR is 1, when no editing was done to MOVESPY2. EIMOVPIR has a value of 2 when the item corresponding to MOVESPY2 had missing data but it could be logically inferred that the respondent moved zero times in the past 12 months, because SNMOV5Y2 or YEMOV5Y2 indicated zero moves in the past 5 years.

EIMOVPIR	Len : 1 EDITING INDICATOR FOR MOVESPY2		
		Freq	Pct
	1 = Questionnaire data.....	55035	100.0

NOTE: MOVYRFLG is a "flag" variable that indicates inconsistent reports between moves in the past 12 months in MOVESPY2 and moves in the past 5 years from either SNMOV5Y2 or YEMOV5Y2. The default value for MOVYRFLG is 98 (blank). MOVYRFLG has a value of 1 when respondents reported more moves in the past 12 months than they reported for moves in the past 5 years. However, no editing was done to MOVESPY2, SNMOV5Y2, or YEMOV5Y2 in these situations.

MOVYRFLG	Len : 2 CONSISTENCY FLAG FOR MOVESPY2 VS SNMOV5Y2/YEMOV5Y2		
		Freq	Pct
	1 = Moves in past yr greater than moves in past 5 yrs.....	889	1.62
	98 = BLANK (NO ANSWER).....	54146	98.38

NOTE: The school enrollment variable SCHENRL is analogous to the variable ENROLED from prior years. SCHENRL takes into account information from follow-up probes if respondents originally reported that they were not enrolled in school. Based on these probes, respondents were coded as yes (i.e., enrolled) if they were on break from school and intended to return to school once their break was over. SCHENRL was assigned a code of 11 if the respondent reported currently being enrolled but there was uncertainty about the respondent's school enrollment status.

The next questions are about school. Are you now attending or are you currently enrolled in school? By "school," we mean an elementary school, a junior high or middle school, a high school, or a college or university. Please include home schooling as well.

SCHENRL	Len : 2 NOW ENROLLED IN ANY SCHOOL		
		Freq	Pct
	1 = Yes.....	26784	48.67
	2 = No.....	28210	51.26

EMPLOYMENT AND WORKPLACE

EMPLOYMENT AND WORKPLACE

NOTE: The variable JBSTATR2 was created from questions that asked respondents whether they worked in the past week, whether they usually work 35 or more hours per week, and where relevant, reasons why they did not work in the past week. Respondents who did not know or refused to report whether they worked in the past week but indicated that they did not work in the past 12 months were classified in JBSTATR2 as not having a job. In addition, respondents who reported that they had no job but were looking for work were not classified as being in the labor force unless they reported making specific efforts to find work.

JBSTATR2 Len : 2 WORK SITUATION IN PAST WEEK - RECODE

NOTE: The industry variable WRKIDST2 corresponds to the variable WRKINDU2 prior to 2003. The variable name was changed to reflect changes to the industry codes in the 2003 NSDUH. Because of changes in 2003, caution is advised in comparing data from WRKIDST2 with data in WRKINDU2 from prior years. Industry categories do not correspond exactly between the two variables. Even when the same broad industry categories appear in the two variables, the types of industries or the definitions of the specific industries within these broad categories may not be the same. As in previous years, respondents with multiple jobs chose which job to describe. Hence, it is possible that some respondents described their work in the National Guard or Military Reserves even though they responded previously that they are not currently on active duty in the Armed Forces.

Which of these categories best describes the business or industry in which you work?

IMPUTED EMPLOYMENT AND WORKPLACE

IMPUTED EMPLOYMENT AND WORKPLACE

The following variable, EMPSTATY, was created to promote consistency across survey years. The similar variable EMPSTAT3 was created in 1999 and 2000; it could not be created in the survey years since 2001 because of changes to the questionnaire. (See the comment before JBSTATR2 for more details.) The levels of EMPSTATY are close to those in the Current Population Survey. The main difference is that EMPSTATY considers people who did not have a job last week and were not looking for a job all to be unemployed. In comparison, the CPS definition requires people who did not have a job last week and were not looking for a job to be waiting to be recalled to their old job, in order for them to be classified as unemployed.

EMPSTATY	Len : 2	IMPUTATION REVISED EMPLOYMENT STATUS		
			Freq	Pct
		1 = Employed full time	20452	37.16
		2 = Employed part time	9209	16.73

COUNTY

The variable PDEN00 is based on 2000 Census data and the June 2003 Core Based Statistical Area classifications provided by the Office of Management and Budget (OMB).

PDEN00

Len : 1 POPULATION DENSITY 2000

	Freq	Pct
1 = Segment in a CBSA with 1 million or more persons	23352	42.43
2 = Segm. in a CBSA with fewer than 1 million persons	26658	48.44
3 = Segment not in a CBSA	5025	9.13

SEGMENT

The Census provides data for five types of American Indian areas (AIAs):

Federally-recognized American Indian reservations (AIRs) and off-reservation trust land areas - areas that have been set aside by the U.S. for the use of American Indian tribes. The tribes have primary governmental authority over the AIRs and associated off-reservation trust lands. Federal AIRs may cross State and all other area boundaries.

State-recognized American Indian Reservations (SAIRs) - reservations established by some State governments for tribes recognized by the State. The tribes may have governmental authority over the SAIRs. SAIRs must be defined within a single State but may cross county and other types of boundaries.

Oklahoma tribal statistical areas (OTSAs) - areas intended to represent the former American Indian reservations that existed in Indian and Oklahoma territories prior to Oklahoma statehood in 1907. OTSAs are contained within the State of Oklahoma but may cross all other area boundaries.

Tribal designated statistical areas (TDSAs) - areas identified and delineated for federally-recognized American Indian tribes that do not currently have an AIR or off-reservation trust land. A TDSA is intended to encompass a compact and contiguous area that contains a concentration of individuals who identify with the delineating federally-recognized American Indian tribe. TDSAs may cross State and all other area boundaries.

State designated tribal statistical areas (SDTSAs) - areas identified and delineated for State-recognized tribes that are not federally-recognized and do not have an AIR or off-reservation trust land. SDTSAs provide State-recognized tribes without reservations statistical data for a geographic area that encompasses a substantial concentration of tribal members. SDTSAs must be defined within a single State but may cross county and other types of boundaries. SDTSAs were called State Designated American Indian Statistical Areas (SDAISAs) for Census 2000.

The AIAs are mutually exclusive, i.e., no AIA can overlap another AIA. In cases where more than one tribe claims jurisdiction over an area, the Census Bureau creates a joint-use area as a separate entity to define this area of dual claims.

Some NSDUH segments can cross more than one AIA. In order to assign a single AIA to a segment, a 'majority' AIA variable was created by summing the total number of dwelling units within each of the AIAs within the segment and then assigning the AIA with the most dwelling units to that segment. The resulting 'majority' AIAs were summarized to form MAIIN002. MAIIN002 is based on 2000 census data.

APPENDIX A

Drug Codes for Open-Ended Questions

APPENDIX A

Drug Codes for Open-Ended Questions (2006 CAI NSDUH)

Numerical Listing

NOTE: Due to changes in the survey instrument in 1999,
codes for some drugs may differ from those used in prior survey years.

Code	Definition
101	Butisol
102	Buticaps
103	Amytal
104	Mebaral
105	Placidyl, Ethchlorvynol
106	Doriden
107	Noludar
108	Nembutal
109	Seconal
110	Tuinal
111	Dalmane, Flurazepam
112	Restoril, Temazepam
113	Halcion, Triazolam
114	Amobarbital
115	Phenobarbital
116	Methaqualone, Sopor, Quaalude [see also 138]
117	Chloral hydrate, Noctec
118	Pentobarbital, Pentothal, Sodium pentothal, Thiopental
119	Secobarbital
120	Downers; OTHER Sedative, NOT OTHERWISE SPECIFIED
121	USED SEDATIVE, DON'T KNOW NAME
122	Over-the-counter sleep aid; not specified <OTC>
123	Unisom <OTC>
124	Yellow jackets
126	Sominex <OTC>
127	Nytol <OTC>
128	Nervine <OTC>
129	Reds
130	Phenergan, Promethazine
131	Haldol, Haloperidol
132	Sleepettes <OTC>
136	Dimetapp <OTC>
137	7-14
138	Mandrax, Mandrix [see also 116]
139	Black widows

Code	Definition
140	Seldane
141	Dilantin
142	Belladona
145	Red devil(s)
146	Bentyl, Dicyclomine
148	Actifed <OTC>
152	Eskabarb
153	Luminal
154	Alurate
156	Sodium barbital
157	Barbiturates
159	Octanox
163	Blue meanies
164	Yellow zombies
171	NyQuil <OTC>
172	Dream Ease <OTC>
173	Wafers
174	Ambien, Zolpidem
176	Melatonin <OTC>
177	Bean
178	Quetiapine, Seroquel
179	Water tee [sic]
180	Tylenol P.M. <OTC>
181	Excedrin P.M. <OTC>
182	Melzone
183	Mysoline
184	Red and blues
186	Butalbital
187	Belladonna plant/flower/root, deadly nightshade
188	Estazolam, Prosom
189	Sonata
190	Dormin <OTC>
191	Blues
192	Promazine
193	Meclizine
194	Quiet World <OTC>
195	Lotusate, Talbutal
196	Simply Sleep <OTC>
197	Topamax, Topiramate

Code	Definition
198	Seducaps
199	Ansiovit <OTC>
201	Valium, Diazepam
202	Librium, Chlordiazepoxide HCl
203	Limbitrol [see also 276]
204	Menrium
205	Serax, Oxazepam
206	Tranxene
207	Ativan, Lorazepam, Orfidal
208	Centrax
209	Xanax, Alprazolam, Tafil, Xanax bars
210	Paxipam
211	Buscar
212	Miltown
213	Equanil
214	Deprol
215	Vistaril
216	Atarax, Hydroxyzine
217	Durrax
219	SK-Lygen
220	Meprobamate
221	OTHER Tranquilizer, NOT OTHERWISE SPECIFIED
222	USED TRANQUILIZER, DON'T KNOW NAME
223	Carbacot, Marbaxin, Methocarbamol, Robaxin
224	Triavil
225	Desyrel, Trazodone hydrochloride
226	Stelazine, Trifluoperazine HCl
227	Thorazine
228	Amitriptyline, Elavil
229	Librax
230	Compazine, Prochlorperazine
232	Mellaril
233	Trilafon, Perphenazine
234	Flexeril, Cyclobenzaprine
235	Imipramine
237	Dormicum, Hypnovel, Midazolam, Versed
240	Lithium carbonate, Lithonate
241	Prozac, Fluoxetine
242	Equagesic
243	Etrafon
245	Tryptophan
246	Klonopin, Clonazepam, Diocam, Rivotril
247	Adapin, Doxepin, Sinequan
249	Asendin
250	Aventyl, Nortab, Nortriptyline, Pamelor
252	Strawberry whip cream
257	Zestril

Code	Definition
259	Desipramine, Norpramin
260	PCB
262	Prolixin
263	Vivactil
266	Verstran
267	Marezine
268	Rohypnol, Flunitrazepam, roche, roofies
270	Torzien
271	Zoloft
275	Loxitane
276	Limbitrol DS [see also 203]
278	Benzodiazepines
280	Ketaset
281	Blue ringer
282	Clozapine, Clozaril
283	Paroxetine, Paxil
284	Tofranil
285	Risperdal, Risperdol, Resperidone
288	Baclofen
289	Olanzapine, Zyprexa
290	Skelaxin
291	Celexa
292	Serzone
293	Anafranil, Clomipramine
294	Fluvoxamine, Luvox
295	Mirtazapine, Remeron
296	Novoxapam
297	Cafia
298	Acepromazine, PromAce
299	Code no longer used
301	Dexedrine
302	Dexamyl
303	Eskatrol
304	Benzedrine
305	Biphetamine
306	Desoxyn
307	Tenuate, Diethylpropion
308	Tepanil
309	Didrex
310	Plegine
311	Preludin
312	Ionamin
313	Fastin, Phentermine, Adipex-P
314	Pondimin, Fenfluramine
315	Voranyl
316	Sanorex
317	Mazanor
318	Ritalin, Methylphenidate
319	Cylert
320	Dextroamphetamine

Code	Definition
321	Methedrine
322	Methamphetamine ("ice" or "crank"), Meth
323	Obedrin-L.A.
324	Uppers; OTHER Stimulant, NOT OTHERWISE SPECIFIED
325	USED STIMULANT, DON'T KNOW NAME
326	White cross
327	Black beauties, black beauty
328	Pink hearts
329	Bird's eggs, robin's eggs, speckled eggs
330	Blue birds, blue jays, blue robins, speckled bird
331	Blancs, whites
332	Ephedrine
333	357 Magnum, Magnum 44 <OTC>
334	Crossroads, cross tops
335	Dexatrim <OTC> [see also 347, 378]
336	Diet pills
337	White molly
339	Amphetamines
341	Pink roses
342	Purple hearts
343	Nitroglycerine
344	Bennies
345	Black molly
346	Marax
347	Phenylpropanolamine <OTC> [see also 335, 378]
348	Crystal
349	Melfiat, Phendimetrazine
351	Cathinone, cat, khat, q'at
352	Lemons
353	No-Doz <OTC>
354	Vivarin <OTC>
355	Crystal meth
356	Dexies
357	Heart-shaped black pills
358	20/20
359	Criss cross
360	Rainbow speed
363	Bam(s)
364	Pseudoephedrine <OTC>
366	Duromine
368	Peanut butter crank
369	Artane
371	Cogentin
374	Christmas tree(s)
376	TAC
377	Albuterol, Proventil, Ventolin
378	Control <OTC> [see also 335, 347]
379	Hearts

Code	Definition
380	Pink ladies
381	P.O.T.C.
382	Footballs, pink footballs, purple footballs
383	Pre-Sate
384	Little crosses
385	Little pink ones
386	Herbal ecstasy
388	Pink lemon
390	Max Alert
393	OP 33
394	Debs
395	Black cats
396	Black RJs, RJ8
397	F-40
398	Pink crosses
401	Darvon
402	Dolene
403	SK-65
404	Wygesic
405	Levo-Dromoran
406	Percodan, Roxiprin
407	Demerol, Meperidine
408	Dilaudid, Hydromorphone
409	Tylenol with codeine, Tylenol 3, Tylenol 4
410	Phenaphen with codeine, Phenaphen 3
411	Talwin
412	Talwin NX
413	Talacen
414	Propoxyphene
415	Codeine
416	Anileridine
417	Morphine, Roxanol
418	Methadone, Dolophine
419	Stadol, Stadol NS
420	OTHER Analgesic, NOT OTHERWISE SPECIFIED
421	USED ANALGESIC, DON'T KNOW NAME
422	Motrin
423	Percocet
424	Fioricet
425	Advil <OTC>
426	Fiorinal
427	Darvocet, Darvocet-N
429	Frost 222
430	Aspirin, Ecotrin, Empirin <OTC>
431	Tylox
432	Rufen
433	Paregoric

Code	Definition
434	Vicodin, Lortab, Lorcet, Anexsia, Co-Gesic, Lorcet-HD, Lorcet Plus, Maxidone, Norco, Zydone
435	Tylenol, Tylenol Extra-Strength <OTC>
436	Bufferin <OTC>
438	Anaprox, Naprosyn, Naproxen, Naxen
439	222, Canadian 222
442	Ibuprofen
443	Diflunisal, Dolobid
444	Aspirin with codeine, Empirin 3
445	Dolex, Norgesic Forte
447	Synalgos, Synalgos DC
450	Acetaminophen, including non-Tylenol brands <OTC>
453	Organidin with codeine
454	Novocain, Procaine
455	Fiorinal with codeine
457	T's and blues, tee's and b's, tops and bottoms
458	Finalin, Mepergan, Mepergan Fortis, Meprozone
462	Norflex
465	Fentanyl, Duragesic, Sublimaze
466	Midol <OTC>
467	Tolectin
468	Excedrin <OTC>
469	Leritine
470	Cafergot
471	Butazolidin
472	Indocin, Indomethacin
473	Pyridium
476	Duradrin, Isocom, Midrin
477	Melumbrina, Neo-Melumbrina
478	Nogirtronia
480	Robitussin AC with codeine
481	Acular, Dolac, Ketorolac tromethamine, Torradlo
487	Ariel
490	Nalbuphine, Nubain
491	PDR
495	Red cross
496	Ultram
498	Ponstel, Mefenamic acid
499	Aleve <OTC>
501	Gasoline or lighter fluids
502	Spray paints
503	Other aerosol sprays
504	Shoeshine liquid, glue, or toluene; Super Glue; rubber cement; airplane or model glue; chemical glue
505	Lacquer thinner or other paint solvents

Code	Definition
506	Amyl nitrite, "poppers," locker room odorizer, "rush," isobutyl nitrate, bolt
507	Halothane, ether, or other anesthetics; chloroform
508	Nitrous oxide, "whippets," dentist gas
509	Correction fluids, degreasers, cleaning fluids, Liquid Paper [see also 524], K2r spot remover, Typewash
510	OTHER Inhalant, NOT OTHERWISE SPECIFIED
511	Markers, felt-tip pens, ink pens, Sharpies
512	Incense
516	Freon, refrigerant
517	Toluol
518	Acetone, nail polish remover
519	Helium
520	Old paint, paint
521	Propane [see also 525, 544]
522	Liquid TV (MTV), TV tuner, TV11Y
523	Matches
524	White-Out [see also 509]
525	Butane [see also 521, 544]
526	Nail polish
527	Phenyl nitrate
528	Whipped-cream can
529	Moth balls
531	Candy, powdered candy, sugar
533	Window sealant
534	Deodorant [see also 827]
536	Fire halt
537	Boat horn
538	Condensed horn
539	ScotchGard
540	PAM
541	Binaca
542	Brasso, lens cleaner, spirits of ammonia
543	Liquid oxygen, oxygen
544	Lighter gases, not specified [see also 521, 525]
545	Car tailpipe exhaust fumes, CO, gasoline motor exhaust fumes
546	Leather protector, suede protector
548	Cologne, isopropanol vapors, rubbing alcohol
550	Methyl chloride
551	Oven cleaner
553	Pixie sticks
554	Raid
555	Chillers
556	Energine
557	Hagwash [sic], Hogwash
558	Kool Aid

Code	Definition
559	LOLOY
560	Dishwashing detergent, laundry detergent, soap
561	Amputee gas cleanser
562	Ban apple gas
563	Acetylene
564	Electric contact cleaner
565	Trichloroethane
566	Smoked tea from Lipton tea bag
567	Pertussin spray
568	Tally
569	Peganento
571	Black jack
572	Etam
573	Furniture polish
574	Tornado
576	C.A.T.
577	Rave runners
580	Medusa
582	WD-40
585	TCL
586	Carbon from empty soft drink bottle
587	Mineral ice
588	Antifreeze
589	Tire shine
590	Canned air, compressed air
591	Air brush propellant
592	Computer air duster, computer cleaner, dust-off, dust X
594	Starting fluid
595	Chlorine
596	Femo clay
597	Trichloronitrate
598	Ethylene dichloride
599	Potpourri
601	LSD ("acid") [see also 618]
602	Peyote
603	Mescaline
604	Psilocybin (mushrooms), shrooms
605	PCP ("angel dust," phencyclidine)
606	"Ecstasy" (MDMA), X-TC, "X"
607	OTHER Hallucinogen, NOT OTHERWISE SPECIFIED
609	Jimson weed
610	Crystal T
611	Greens
612	Happy stick, sherm, sherman, shermstick
613	Duckweed
614	MDA, Methylenedioxy amphetamine
615	Homemade drugs
616	DET, Dimethyltryptamine, DMT

Code	Definition
617	Morning glory seeds, morning glory tendrils, ricea
618	Acid paper, blotter (acid) [see also 601]
619	Tic
620	Blue dragon
621	Red dragon
622	Microdot(s), green microdot, purple microdot
623	Mickey, mickey mouse club, mickey mousers
624	Orange sunshine, sunshine, yellow sunshine
625	Window, window pane, 4-way pane
626	Jet fuel
627	Hawaiian wood rose, Hawaiian Woodrose seeds
628	Hawaiian rosebud seed tea
629	Rocket Fuel
630	Black Owsley
631	Purple Owsley
633	Mr. Natural
634	Unicorn
635	Ginseng seeds, ginseng weed
636	DOM, STP
637	Purple haze
639	Nutmeg, Mace
640	Purple pyramid
642	Pink Floyd
643	Mount queen, queen
645	Thai stick
648	Designer drugs
650	Datura stramonium, daytura, thorn apple
651	Mellow Yellow
652	ALD-52
653	Cricket, cricketshit
654	Eve
655	Flying elephant
656	Mars
657	Orange barrel
658	Special K, Ketamine
659	Boat
660	Toad, toad licking
662	Kanepolin
663	Animal tranquilizer, horse tranquilizer
664	Purple fingers
665	Paniolis
666	Zonick
668	Yellow tiny pills
669	Stropharia
670	Monkey dust
672	Suncrush
673	Orange

Code	Definition
674	Pee-pope
677	Skunk II
678	Banana peels
679	Hell bells
681	Lovely
682	Kif
683	Yage
686	Spider in my feet
687	Spray
688	AMP
690	RID
691	Maximum impact
693	Lemon drops
695	Angel's trumpet
698	2C-B Nexus
699	BOHA-49B
701	OTHER Opiates, NOT OTHERWISE SPECIFIED
702	Heroin
703	Opium
704	Dope
705	Speedball (heroin + cocaine)
706	Smack
707	Black tar heroin
709	Poppy
710	Laudanum
801	OTHER Drugs, NOT OTHERWISE SPECIFIED
802	THC, cannabinol, marinol
803	Marijuana, MarrJane [sic], Mary Jane, MJ, pot, weed, hemp
804	Hashish
805	Cocaine, coca, cocaPna, coke
806	Crack, rock
807	Alcohol, beer, ethanol, EtOH, pink champagne
808	All of the ones I've tried
809	Pills
810	Freebase
812	Cigars
813	Cigarettes, tobacco (type unspecified)
814	Caffeine <OTC>
815	Coffee <OTC>
816	Smokeless tobacco, snuff, chewing tobacco
817	Hard stuff
818	Nicotine
819	Inderal, Propranalol
820	Penicillin
821	Amoxicillin, Ampicillin, Pentrexyl

Code	Definition
822	Rabbit tobacco
824	Steroids
825	Theo-Dur
826	Alupent
827	Aluminum chloride [see also 534]
828	Tetracycline
829	Robitussin DM <OTC>
830	Mad bull
831	Honey oil
832	Primo
833	Bone
834	Loveboat
836	Antabuse
837	Paris 400
840	Over-the-counter cough medicine (contents unspecified) <OTC>
841	Allerest <OTC>, Contac <OTC>
843	Antihistamine, cold medicine, cold tablets <OTC>
844	Blood pressure medication
846	Erythromycin
847	GHB, NSC
848	Liquid vitamin, vitamin pills <OTC>
849	Monosodium glutamate (MSG) <OTC>
850	Slack
852	Formaldehyde, wak [sic], whack (embalming fluid)
854	Juice
857	Wicki stick
858	Antibiotic
865	Diuretics, water pills
866	Boomers
867	Boron
873	Contraceptives, Ferutal, Mircette, Ortho Novum,
874	Premarin
875	Buds
876	Glass
877	Methazolamide
880	Frios
881	YLOALE
883	Dextromethorphan Hydrobromide <OTC>
884	Snow
885	Drixoral <OTC>
886	Spanish fly
891	Famotidine, Pepcid
892	Carafate, Sucralfate
893	Estrogen
894	Depakene, Depakote, Valproic Acid
895	Tagamet, Cimetidine
896	Catapres, Clonidine
897	Synthroid, Levothyroxine

Code	Definition
898	Propylene
899	Bromophen
900	Not a drug
900	Non-drug reason given for a drug
1001	Benadryl, Diphenhydramine <OTC>
1002	Dimenhydrinate, Dramamine, sea/motion sickness pill <OTC>
1003	Donnatal
1004	Valerian <OTC>
1005	Imovane, Zopiclone
1006	Oxcarbazepine, Trileptal
1007	Robitussin P.M. <OTC>
1008	Rohr 714, Rorer 714
1009	Mogadon, Nitrazepam
1010	Diprivan, Propofol
1011	Lunesta
1012	Brevital, Methohexital
1013	Ambien CR
1014	Tylenol Flu Nighttime <OTC>
1015	Wild lettuce
1016	Phenazepam
2001	Sanoma, Soma, Carisoprodol
2002	Muscle relaxers
2003	Zanies, zannies, zans, zany bars
2004	Bromazepam, Lexillum, Lexomil, Lexotan
2005	Insidon, Opipramol
2006	Chlorzoxazone
2007	R2
2008	747
2009	Droperidol, Inapsine
2010	Buscopan
2011	Lexapro
2012	Geodon, Ziprasidone
2013	Hyoscyamine, Levsin
2014	Methoxisal, Robaxisal
2015	Flexodin
2016	Xanax XR
3001	Brown and clear
3002	Pep ups
3003	Primatene tablets <OTC>
3004	Black Cadillac
3005	Methylamandlanamine
3006	Green amps
3007	Nasal inhalant
3008	Miniwhites
3009	Ephedrone, Methcathinone
3010	KOOD12

Code	Definition
3011	Escalation
3012	Stud 100, stud the rock
3013	Tweek
3014	Uptime
3015	Fen-Phen (fenfluramine and phentermine)
3017	Dayquil <OTC>
3018	Up-johns
3019	Peppies
3020	White powder
3021	Blue balls

APPENDIX C

Tobacco Brand Codes for Open-Ended Questions

The final tobacco brand codes were created from listings of brands that appeared on the computer screen(s) corresponding to that particular type of tobacco, or from answers that respondents specified, if they indicated use of "a brand not on this list." For each tobacco product (cigarettes, chewing tobacco, snuff, and cigars), the available responses in the contiguous order of appearance on the screen (based on the 1999 through 2004 CAI instruments) were used to initially create each tobacco product group. Although the tobacco brands that appeared on the screens for respondents changed beginning in 2005 for cigarettes, snuff, and cigars, the editing and coding procedures in this survey year continued to use existing codes that had been developed prior to 2005. For example, American Spirit cigarettes became the first brand on the screen for question CG11 in 2005 ("The next questions are about the brand of cigarettes you smoke -- the brand is the name that is on the pack. During the past 30 days, what brand of cigarettes did you smoke most often?"). For consistency with prior years, however, mention of American Spirit cigarettes continues to retain a code of 161, even though CG11=1 (with this answer verified in question CG13) would indicate that the respondent smoked American Spirit cigarettes most often in the past 30 days.

Tobacco brand codes 100-199 and 1000-1999 represent cigarette brands, codes 200-299 and 2000-2999 represent chewing tobacco brands, codes 300-399 and 3000-3999 represent snuff brands, and codes 400-499 and 4000-4999 represent cigar brands. Additional codes were added to each group list as needed. Miscellaneous tobacco and non-tobacco groups are represented by the 500-599, 600-699, 700-799, and 800-899 series.

For tobacco brands that respondents could choose from a list, no distinction was made in the coding between situations where respondents chose that particular brand from the list, and those where respondents reported use of "a brand not on this list" and then specified use of that brand. In addition, there was no distinction between particulars such as menthol, light, or full-flavor varieties in the coding. In addition, the coding took into account situations where respondents might specify a brand that corresponded to a different type of tobacco. For example, if a snuff brand was specified as a brand of "chewing tobacco," then the reported brand of "chewing tobacco" was assigned a code in the 300 series, corresponding to snuff.

APPENDIX D

Recoded Substance Dependence and Abuse Variable Documentation

The 2006 National Survey on Drug Use and Health (NSDUH) computer-assisted interviewing (CAI) instrumentation included questions that were designed to measure dependence and abuse of illicit drugs, alcohol, and dependence on nicotine (cigarettes). For nicotine (cigarettes), questions pertaining to dependence were based on criteria from the Nicotine Dependence Syndrome Scale (NDSS; Shiffman, Hickcox, Gnys, Paty, & Kassel, 1995; Shiffman, Waters, & Hickcox, 2004) and the Fagerstrom Test of Nicotine Dependence (FTND; Fagerstrom, 1978; Heatherton, Kozlowski, Frecker, & Fagerstrom, 1991). The above-mentioned criteria were first used to measure nicotine dependence in NSDUH in 2003. For substances other than nicotine (cigarettes), which include alcohol, cocaine, heroin, pain relievers, sedatives, marijuana, tranquilizers, stimulants, hallucinogens, and inhalants, dependence and abuse questions were based on the criteria in the *Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*, 4th edition (American Psychiatric Association [APA], 1994). Due to the complexity of defining the dependence and abuse variables, additional details regarding the creation of these variables are included in this appendix.

Given the current editing and imputation procedures, along with the use of both core and noncore questions to determine whether a respondent was asked the dependence and abuse questions, users should be aware of the possible inconsistencies that may exist between the dependence and abuse variables and the imputed substance use and frequency of use variables for selected substances.

Responses from core substance use, frequency of substance use, and noncore substance use questions were used as criteria to determine whether a respondent was asked the alcohol and/or illicit drug dependence and abuse questions. Unknown responses to the core substance use and frequency of substance use questions were imputed. However, the imputation process did not take into account data reported in the noncore CAI modules. Therefore, responses to the dependence and abuse questions that were inconsistent with responses to the imputed substance use or frequency of use questions could exist. These inconsistent responses remained in the edited data and were not excluded in the creation of the dependence and abuse recodes. Since different sets of criteria were used as skip logic for each substance, different types of inconsistencies between the dependence and abuse variables and the imputed substance use and frequency of substance use variables could occur by substance. These inconsistencies are discussed in further detail in the appropriate sections on each substance.

Differences also exist between the methodologies used for determining dependence on nicotine (cigarettes) and for determining dependence on other substances. For example, to classify as nicotine (cigarette) dependent, a respondent must be a past month user of cigarettes. However, to classify as dependent on one of the other substances by *DSM-IV* criteria, a respondent must be a past year user of that substance. A second difference is that the Nicotine Dependence Syndrome Scale (NDSS) questions are imputed in order to optimize the number of respondents who may be classified for nicotine (cigarette) dependence, unlike the *DSM-IV* dependence questions that are used in the nonimputed, edited form.

Nicotine (Cigarette) Dependence

The 2006 NSDUH CAI questions designed to assess nicotine (cigarette) dependence were based on the NDSS and the FTND. To identify patterns of nicotine (cigarette) dependence within the 2006 NSDUH data, variable indicators were created to measure dependence on nicotine through the use of cigarettes. A respondent was defined as being dependent if he or she met either the NDSS or the FTND criteria for dependence.

Nicotine Dependence Syndrome Scale (NDSS):

The conceptual roots of the NDSS are similar to those behind the *DSM-IV* concept of dependence (Edwards & Gross, 1976). NSDUH contains 19 NDSS questions that address five aspects of dependence:

1. Smoking drive (compulsion to smoke driven by nicotine craving and withdrawal)
 - a. After not smoking for a while, you need to smoke in order to feel less restless and irritable (IRCGIRTB)
 - b. When you don't smoke for a few hours, you start to crave cigarettes (IRCGCRV)
 - c. You sometimes have strong cravings for a cigarette where it feels like you're in the grip of a force you can't control (IRCGCRGP)
 - d. You feel a sense of control over your smoking - that is, you can "take it or leave it" at any time (IRCGNCTL)
 - e. You sometimes worry that you will run out of cigarettes (IRCGROUT).
2. Nicotine tolerance
 - a. Since you started smoking, the amount you smoke has increased (IRCGINCR)
 - b. Compared to when you first started smoking, you need to smoke a lot more now in order to be satisfied (IRCGSAT)
 - c. Compared to when you first started smoking, you can smoke much, much more now before you start to feel anything (IRCGLMR).
3. Continuous smoking
 - a. You smoke cigarettes fairly regularly throughout the day (IRCGRGDY)
 - b. You smoke about the same amount on weekends as on weekdays (IRCGRGWK)
 - c. You smoke just about the same number of cigarettes from day to day (IRCGRGNM)
 - d. It's hard to say how many cigarettes you smoke per day because the number often changes (IRCGNCG)
 - e. It's normal for you to smoke several cigarettes in an hour, then not have another one until hours later (IRCGSLHR).
4. Behavioral priority (preferring smoking over other reinforcing activities)
 - a. You tend to avoid places that don't allow smoking, even if you would otherwise enjoy them (IRCGAVD)
 - b. There are times when you choose not to be around your friends who don't smoke because they won't like it if you smoke (friends question - CIGFNLKE)
 - c. Even if you're traveling a long distance, you'd rather not travel by airplane because you wouldn't be allowed to smoke (IRCGPLN).
5. Stereotypy (fixed patterns of smoking)
 - a. Do you have any friends who do not smoke cigarettes (friends question - CIGFNSMK)

- b. The number of cigarettes you smoke per day is often influenced by other things - how you're feeling, or what you're doing, for example (IRCGINFL)
- c. Your smoking is not affected much by other things. For example, you smoke about the same amount whether you're relaxing or working, happy or sad, alone or with others (IRCGNINF).

Each of these five domains can be assessed by a separate measure, but an average score across all domains also can be obtained for overall nicotine dependence (Shiffman et al., 2004). The NDSS algorithm for calculating this average score was based on the respondent's answers to 17 of the 19 questions listed above. The items regarding nonsmoking friends (4b - CIGFNLKE and 5a - CIGFNSMK) were excluded due to higher item nonresponse rates.

For respondents who answered 16 of the 17 NDSS nicotine (cigarette) dependence questions used in the NDSS algorithm, imputation using the 16 answered NDSS items as covariates in a weighted least squares regression model was implemented (Ault et al., 2008).

Responses to items IRCGIRTB, IRCGCRV, IRCGCRGP, IRCGAVD, IRCGPLN, IRCGROUT, IRCGRGDY, IRCGRGWK, IRCGRGNM, IRCGNINF, IRCGINCR, IRCGSAT, and IRCGLMR were coded from 1 to 5 where

- 1= Not at all true
- 2= Somewhat true
- 3= Moderately true
- 4= Very true
- 5= Extremely true

Responses to items IRCGNCTL, IRCGNCG, IRCGSLHR, and IRCGINFL were reverse coded from 5 to 1 where

- 5= Not at all true
- 4= Somewhat true
- 3= Moderately true
- 2= Very true
- 1= Extremely true

For respondents who reported smoking cigarettes in the past month, the NDSS score, NDSSANSP=1, was calculated as the sum of the responses to the previous questions divided by 17. The NDSS score was calculated only for those who had responses to all 17 questions after imputation. If a respondent did not have valid responses (based on actual reporting and imputation) to all 17 questions, then his or her NDSS score was defined as missing.

A respondent was defined as nicotine dependent, NDSSDNSP, if the NDSS score was greater than or equal to 2.75. If the NDSS score was less than 2.75 or missing, then the respondent was determined to be nondependent, NDSSDNSP=0, based on the NDSS. The threshold of 2.75 was derived by examining the distribution of scores in other samples of smokers who were administered the NDSS, including a contrast of scores obtained for nondependent smokers (chippers) versus heavy smokers (Shiffman, Paty, Kassel, Gnys, & Zettler-Segal, 1994).

Fagerstrom Test of Nicotine Dependence (FTND):

The FTND is a multi-item measure of dependence, but much of its ability to discriminate dependent smokers derives from a single item assessing how soon after waking smokers have their first cigarette (Heatherton, Kozlowski, Frecker, Rickert, & Robinson, 1989). Because most nicotine is cleared from the bloodstream overnight, smokers typically wake in nicotine deprivation, and rapid movement to smoke is considered a sign of dependence. A respondent who reported smoking cigarettes in the past month was defined as nicotine dependent based on the FTND, FTNDDNSP, if the first cigarette smoked was within 30 minutes of waking up on the days he or she smoked (CIGWAKE=1 or 2).

Nicotine (Cigarette) Dependence:

Using both the NDSS and the FTND, a respondent was defined as having nicotine (cigarette) dependence in the past month, DNICNSP, if he or she met either the NDSS (NDSSDNSP=1) or FTND (FTNDDNSP=1) criteria for dependence.

DSM-IV Dependence and Abuse

The 2006 NSDUH CAI questions designed to assess substance dependence and abuse were based on the criteria for dependence and abuse in the *DSM-IV* (APA, 1994). To identify patterns of substance abuse in the 2006 NSDUH data, variable indicators were created to measure dependence on and abuse of illicit drugs and/or alcohol. For marijuana, inhalants, hallucinogens, and tranquilizers, a respondent was defined as having dependence if he or she met three or more of six standard dependence criteria. A seventh withdrawal criterion was added for alcohol, pain relievers, cocaine, heroin, sedatives, and stimulants. A respondent was defined as having dependence if he or she met three or more of seven dependence criteria. For each illicit drug and alcohol, a respondent was defined as having abused that substance if he or she met one or more of four abuse criteria and was determined not to be dependent upon the substance of interest.

Dependence and abuse variables are mutually exclusive with dependence taking precedence (i.e., dependence is determined first and respondents are only classified as having been abused if they are not already classified as dependent, regardless of responses to the abuse questions). Therefore, it is possible for the variables showing abuse of a combination of substances to not correspond with the abuse status of those individual substances. For example, a respondent who is classified as having abused cocaine in the past year may be classified as not having abused illicit drugs because he or she was dependent on marijuana and already classified as being dependent on illicit drugs.

For alcohol and marijuana, the criteria used to determine whether a respondent was asked the dependence and abuse questions included past year use of the respective substance and reported use of the respective substance on more than 5 days in the past year. Because respondents were asked the dependence and abuse questions if they reported substance use in the past year, regardless of whether they reported their frequency of substance use in the past year, inconsistencies could occur where the imputed frequency of use variable indicated less frequent use than required for respondents to be asked the dependence and abuse questions originally.

For stimulants, heroin, and cocaine, the criteria included reporting past year use in a core drug module or past year use in the noncore special drugs module. Inconsistencies could occur when a core substance use variable indicated no use in the past year but a dependence and abuse variable indicated substance dependence or abuse.

For hallucinogens, pain relievers, tranquilizers, inhalants, and sedatives, the only criteria used was that the respondent reported past year use of the respective substance. Thus, no inconsistencies could occur where the respondent was considered a nonuser of the substance but was dependent on or abusing the substance.

In 2005 and 2006, new questions were added to the noncore special drugs module to identify respondents who had used methamphetamine but had failed to report it in the core prescription stimulant module because they did not think of methamphetamine as a prescription drug. Persons identified as methamphetamine users in these new questions were administered the stimulant dependence and abuse questions as if they had reported methamphetamine use in the core stimulant module. Based on the decisions made during the methamphetamine analysis, respondents who met the criteria for stimulant dependence or abuse but had reported past year methamphetamine use only on the new special drug use questions (i.e., did not indicate methamphetamine use from the core drug module or other questions in the special drugs module) were categorized as NOT having past year stimulant dependence or abuse. Furthermore, if these

same respondents were categorized as not having past year dependence on or abuse of any other substance (e.g., pain relievers, tranquilizers, or sedatives for the psychotherapeutic drug grouping), then they were categorized as NOT having past year dependence on or abuse of psychotherapeutics, illicit drugs, illicit drugs or alcohol, and illicit drugs and alcohol. Further details are provided in Section B.4.6 of Appendix B of the *Results from the 2006 National Survey on Drug Use and Health: National Findings* (Office of Applied Studies [OAS], 2007).

A respondent might have provided ambiguous information about past year use of any individual substance, in which case these respondents were not asked the dependence and abuse questions for that substance. Subsequently, these respondents could be imputed to be past year users of the respective substance. In this situation, the dependence and abuse data were unknown. Thus, these respondents were classified as not dependent on or abusing the respective substance, without ever having been asked the dependence and abuse questions.

Listed below are the definitions used for each of the individual dependence and abuse measures, as well as specific notes about inconsistency issues for each measure. Additional variables were created using a combination of these individual dependence and abuse measures and are listed in the main part of the codebook.

Substance Dependence Recodes Defined with Withdrawal Criteria

ALCOHOL:

To be defined with alcohol dependence, DEPNDALC, a respondent must have met three or more of these alcohol dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of alcohol (ALCLOTTM=1 or ALCGTOVR=1)
- (2) Used alcohol more often than intended or was unable to keep set limits on alcohol use (ALCKPLMT=2)
- (3) Needed to use alcohol more than before to get desired effects or noticed that same amount of alcohol use had less effect than before (ALCNDMOR=1 or ALCLSEFX=1)
- (4) Inability to cut down or stop using alcohol every time tried or wanted to (ALCCUTEV=2)
- (5) Continued to use alcohol even though it was causing problems with emotions, nerves, mental health, or physical problems (ALCEMCTD=1 or ALCPHCTD=1)
- (6) Alcohol use reduced or eliminated involvement or participation in important activities (ALCLSACT=1)
- (7) Reported experiencing two or more alcohol withdrawal symptoms at the same time that lasted longer than a day after alcohol use was cut back or stopped. Symptoms include (i) sweating or feeling that heart was beating fast, (ii) having hands tremble, (iii) having trouble sleeping, (iv) vomiting or feeling nauseous, (v) seeing, hearing, or feeling things that were not really there, (vi) feeling like could not sit still, (vii) feeling anxious, and (viii) having seizures or fits. (ALCWDSMT=1).

Note: A respondent could answer the dependence questions if he or she reported using alcohol in the past year, regardless of whether he or she reported the frequency of days in which he or she drank an alcoholic beverage. Thus, cases may exist where a respondent was classified as dependent on alcohol but drank an alcoholic beverage less than 6 days in the past year according to the imputed frequency of use variable (IRALCFY).

COCAINE:

To be defined with cocaine dependence, DEPNDCOG, a respondent must have met three or more of these cocaine dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of cocaine (COCLOTTM=1 or COCGTOVR=1)
- (2) Used cocaine more often than intended or was unable to keep set limits on cocaine use (COCKPLMT=2)
- (3) Needed to use cocaine more than before to get desired effects or noticed that same amount of cocaine use had less effect than before (COCNDMOR=1 or COCLSEFX=1)
- (4) Inability to cut down or stop using cocaine every time tried or wanted to (COCCUTEV=2)
- (5) Continued to use cocaine even though it was causing problems with emotions, nerves, mental health, or physical problems (COCEMCTD=1 or COCPHCTD=1)
- (6) Cocaine use reduced or eliminated involvement or participation in important activities (COCLSACT=1)

- (7) Reported feeling blue or down when trying to stop or cut down using cocaine (COCFLBLU=1) as well as experiencing two or more additional cocaine withdrawal symptoms at the same time that lasted longer than a day after cocaine use was cut back or stopped. Symptoms include (i) feeling tired or exhausted, (ii) having bad dreams, (iii) having trouble sleeping or sleeping more than normal, (iv) feeling hungry more often, and (v) feeling either very slowed down or could not sit still. (COCWDSMT=1).

Note: A respondent could answer the dependence questions if he or she reported injecting cocaine with a needle in the past year, even if he or she reported not using cocaine in the past year. Thus, cases may exist where a respondent was classified as being dependent on cocaine, even though he or she had not used cocaine in the past year according to the imputed recency variable (COCYR).

HEROIN:

To be defined with heroin dependence, DEPNDHER, a respondent must have met three or more of these heroin dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of heroin (HERLOTTM=1 or HERGTOVR=1)
- (2) Used heroin more often than intended or was unable to keep set limits on heroin use (HERKPLMT=2)
- (3) Needed to use heroin more than before to get desired effects or noticed that same amount of heroin use had less effect than before (HERNDMOR=1 or HERLSEFX=1)
- (4) Inability to cut down or stop using heroin every time tried or wanted to (HERCUTEV=2)
- (5) Continued to use heroin even though it was causing problems with emotions, nerves, mental health, or physical problems (HEREMCTD=1 or HERPHCTD=1)
- (6) Heroin use reduced or eliminated involvement or participation in important activities (HERLSACT=1)
- (7) Reported experiencing three or more heroin withdrawal symptoms at the same time that lasted longer than a day after heroin use was cut back or stopped. Symptoms include (i) feeling kind of blue or down, (ii) vomiting or feeling nauseous, (iii) having cramps or muscle aches, (iv) having teary eyes or a runny nose, (v) feeling sweaty, having enlarged eye pupils, or having body hair standing up on skin, (vi) having diarrhea, (vii) yawning, (viii) having a fever, and (ix) having trouble sleeping. (HERWDSMT=1).

Note: A respondent could answer the dependence questions if he or she reported injecting with a needle, smoking, sniffing, or snorting heroin in the past year, even if he or she reported not using heroin in the past year. Thus, cases may exist where a respondent was classified as dependent on heroin, even though he or she had not used heroin in the past year according to the imputed recency variable (HERYR).

PAIN RELIEVERS:

To be defined with pain reliever dependence, DEPNDANL, a respondent must have met three or more of these pain reliever dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of pain relievers (ANLLOTTM=1 or ANLGTOVR=1)

- (2) Used pain relievers more often than intended or was unable to keep set limits on pain reliever use (ANLKPLMT=2)
- (3) Needed to use pain relievers more than before to get desired effects or noticed that same amount of pain reliever use had less effect than before (ANLNDMOR=1 or ANLLSEFX=1)
- (4) Inability to cut down or stop using pain relievers every time tried or wanted to (ANLCUTEV=2)
- (5) Continued to use pain relievers even though they were causing problems with emotions, nerves, mental health, or physical problems (ANLEMCTD=1 or ANLPHCTD=1)
- (6) Pain reliever use reduced or eliminated involvement or participation in important activities (ANLLSACT=1)
- (7) Reported experiencing three or more pain reliever withdrawal symptoms at the same time that lasted longer than a day after pain reliever use was cut back or stopped. Symptoms include (i) feeling kind of blue or down, (ii) vomiting or feeling nauseous, (iii) having cramps or muscle aches, (iv) having teary eyes or a runny nose, (v) feeling sweaty, having enlarged pupils, or having body hair standing up on skin, (vi) having diarrhea, (vii) yawning, (viii) having a fever, and (ix) having trouble sleeping. (ANLWDSMT=1).

SEDATIVES:

To be defined with sedative dependence, DEPNDSED, a respondent must have met three or more of these sedative dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of sedatives (SEDLTTM=1 or SEDGTOVR=1)
- (2) Used sedatives more often than intended or was unable to keep set limits on sedative use (SEDKPLMT=2)
- (3) Needed to use sedatives more than before to get desired effects or noticed that same amount of sedative use had less effect than before (SEDNDMOR=1 or SEDLSEFX=1)
- (4) Inability to cut down or stop using sedatives every time tried or wanted to (SEDCUTEV=2)
- (5) Continued to use sedatives even though they were causing problems with emotions, nerves, mental health, or physical problems (SEDEMCTD=1 or SEDPHCTD=1)
- (6) Sedative use reduced or eliminated involvement or participation in important activities (SEDL SACT=1)
- (7) Reported experiencing two or more sedative withdrawal symptoms at the same time that lasted longer than a day after sedative use was cut back or stopped. Symptoms include (i) sweating or feeling that heart was beating fast, (ii) having hands tremble, (iii) having trouble sleeping or sleeping more than normal, (iv) vomiting or feeling nauseous, (v) seeing, hearing, or feeling things that were not really there, (vi) feeling like could not sit still, (vii) feeling anxious, and (viii) having seizures or fits. (SEDWDSMT=1).

STIMULANTS:

To be defined with stimulant dependence, DEPNDSTM, a respondent must have been routed to the dependence and abuse questions in 2006 based on variables that existed in 2005 (STMDAFLG=98) and must have met three or more of these stimulant dependence criteria (i.e., respondents who did not indicate methamphetamine use or other stimulant use from the core

drug module or questions in the special drugs module other than the two new 2005 special drug use questions and the new 2006 special drug consistency check questions mentioned above and who met three or more of these stimulant dependence criteria were categorized as NOT having past year stimulant dependence):

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of stimulants (STMLOTTM=1 or STMGTOVR=1)
- (2) Used stimulants more often than intended or was unable to keep set limits on stimulant use (STMKPLMT=2)
- (3) Needed to use stimulants more than before to get desired effects or noticed that same amount of stimulant use had less effect than before (STMNDMOR=1 or STMLSEFX=1)
- (4) Inability to cut down or stop using stimulants every time tried or wanted to (STMCUTEV=2)
- (5) Continued to use stimulants even though they were causing problems with emotions, nerves, mental health, or physical problems (STMEMCTD=1 or STMPHCTD=1)
- (6) Stimulant use reduced or eliminated involvement or participation in important activities (STMLSACT=1)
- (7) Reported feeling blue or down when trying to stop or cut down using stimulants (STMFLBLU=1) as well as experiencing two or more additional stimulant withdrawal symptoms at the same time that lasted longer than a day after stimulant use was cut back or stopped. Symptoms include (i) feeling tired or exhausted, (ii) having bad dreams, (iii) having trouble sleeping or sleeping more than normal, (iv) feeling hungry more often, and (v) feeling either very slowed down or like could not sit still. (STMWDSMT=1).

Note: A respondent could answer the dependence questions if he or she reported injecting stimulants with a needle in the past year, even if he or she reported not using stimulants in the past year. Thus, cases may exist where a respondent was classified as being dependent on stimulants, even though he or she had not used stimulants in the past year according to the imputed recency variable (STMYR).

Substance Dependence Recodes Defined without Withdrawal Criteria

HALLUCINOGENS:

To be defined with hallucinogen dependence, DEPNDHAL, a respondent must have met three or more of these hallucinogen dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of hallucinogens (HALLOTTM=1 or HALGTOVR=1)
- (2) Used hallucinogens more often than intended or was unable to keep set limits on hallucinogen use (HALKPLMT=2)
- (3) Needed to use hallucinogens more than before to get desired effects or noticed that same amount of hallucinogen use had less effect than before (HALNDMOR=1 or HALLSEFX=1)
- (4) Inability to cut down or stop using hallucinogens every time tried or wanted to (HALCUTEV=2)
- (5) Continued to use hallucinogens even though they were causing problems with emotions, nerves, mental health, or physical problems (HALEMCTD=1 or HALPHCTD=1)
- (6) Hallucinogen use reduced or eliminated involvement or participation in important activities (HALLSACT=1).

INHALANTS:

To be defined with inhalant dependence, DEPNDINH, a respondent must have met three or more of these inhalant dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of inhalants (INHLOTTM=1 or INHGTOVR=1)
- (2) Used inhalants more often than intended or was unable to keep set limits on inhalant use (INHKPLMT=2)
- (3) Needed to use inhalants more than before to get desired effects or noticed that same amount of inhalant use had less effect than before (INHNDMOR=1 or INHLESEFX=1)
- (4) Inability to cut down or stop using inhalants every time tried or wanted to (INHCUTEV=2)
- (5) Continued to use inhalants even though they were causing problems with emotions, nerves, mental health, or physical problems (INHEMCTD=1 or INHPHCTD=1)
- (6) Inhalant use reduced or eliminated involvement or participation in important activities (INHLSACT=1).

MARIJUANA:

To be defined with marijuana dependence, DEPNDMRJ, a respondent must have met three or more of these marijuana dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of marijuana (MRJLOTTM=1 or MRJGTOVR=1)
- (2) Used marijuana more often than intended or was unable to keep set limits on marijuana use (MRJKPLMT=2)

- (3) Needed to use marijuana more than before to get desired effects or noticed that same amount of marijuana use had less effect than before (MRJNDMOR=1 or MRJLSEFX=1)
- (4) Inability to cut down or stop using marijuana every time tried or wanted to (MRJCUTEV=2)
- (5) Continued to use marijuana even though it was causing problems with emotions, nerves, mental health, or physical problems (MRJEMCTD=1 or MRJPHCTD=1)
- (6) Marijuana use reduced or eliminated involvement or participation in important activities (MRJLSACT=1).

Note: A respondent could answer the dependence questions if he or she reported using marijuana in the past year, regardless of whether he or she reported the frequency of days in which he or she used marijuana. Thus, cases may exist where a respondent was classified as dependent on marijuana but used marijuana less than 6 days in the past year according to the imputed frequency of use variable (IRMJFY).

TRANQUILIZERS:

To be defined with tranquilizer dependence, DEPNDTRN, a respondent must have met three or more of these tranquilizer dependence criteria:

- (1) Spent a great deal of time over a period of a month getting, using, or getting over the effects of tranquilizers (TRNLOTTM=1 or TRNGTOVR=1)
- (2) Used tranquilizers more often than intended or was unable to keep set limits on tranquilizer use (TRNKPLMT=2)
- (3) Needed to use tranquilizers more than before to get desired effects or noticed that same amount of tranquilizer use had less effect than before (TRNNDMOR=1 or TRNLSEFX=1)
- (4) Inability to cut down or stop using tranquilizers every time tried or wanted to (TRNCUTEV=2)
- (5) Continued to use tranquilizers even though they were causing problems with emotions, nerves, mental health, or physical problems (TRNEMCTD=1 or TRNPHCTD=1)
- (6) Tranquilizer use reduced or eliminated involvement or participation in important activities (TRNLSACT=1).

Substance Abuse Recodes

ALCOHOL:

To be defined with abuse of alcohol, ABUSEALC, a respondent must have met one or more of these alcohol abuse criteria in the past year and must not have been dependent upon alcohol in the past year (DEPNDAALC=0):

- (1) Serious problems at home, work, or school caused by using alcohol, such as
 - neglecting their children
 - missing work or school
 - doing a poor job at work or school
 - losing a job or dropping out of school(ALCSERP=1)
- (2) Used alcohol regularly and then did something that might have put you in physical danger (ALCPDANG=1)
- (3) Use of alcohol caused you to do things that repeatedly got you in trouble with the law (ALCLAWTR=1)
- (4) Problems with family or friends that were probably caused by using alcohol (ALCFMFPB=1) and continued to use alcohol even though you thought using alcohol caused these problems (ALCFMCTD=1).

Note: A respondent could answer the abuse questions if he or she reported using alcohol in the past year, regardless of whether he or she reported the frequency of days in which he or she drank an alcoholic beverage. Thus, cases may exist where a respondent was classified to have abused alcohol but drank an alcoholic beverage less than 6 days in the past year according to the imputed frequency of use variable (IRALCFY).

COCAINE:

To be defined with abuse of cocaine, ABUSECOC, a respondent must have met one or more of these cocaine abuse criteria in the past year and must not have been dependent upon cocaine in the past year (DEPNDCOC=0):

- (1) Serious problems at home, work, or school caused by using cocaine, such as
 - neglecting their children
 - missing work or school
 - doing a poor job at work or school
 - losing a job or dropping out of school(COCSERP=1)
- (2) Used cocaine regularly and then did something that might have put you in physical danger (COCPDANG=1)
- (3) Use of cocaine caused you to do things that repeatedly got you in trouble with the law (COCLAWTR=1)
- (4) Problems with family or friends probably caused by using cocaine (COCFMFPB=1) and continued to use cocaine even though you thought using cocaine caused these problems (COCFMCTD=1).

Note: A respondent could answer the abuse questions if he or she reported injecting cocaine with a needle in the past year, even if he or she reported not using cocaine in the past year. Thus, cases may exist where a respondent was classified to have abused cocaine, even though he or she had not used cocaine in the past year according to the imputed recency variable (COCYR).

HALLUCINOGENS:

To be defined with abuse of hallucinogens, ABUSEHAL, a respondent must have met one or more of these hallucinogen abuse criteria in the past year and must not have been dependent upon hallucinogens in the past year (DEPNDHAL=0):

- (1) Serious problems at home, work, or school caused by using hallucinogens, such as
 - neglecting their children
 - missing work or school
 - doing a poor job at work or school
 - losing a job or dropping out of school(HALSERPB=1)
- (2) Used hallucinogens regularly and then did something that might have put you in physical danger (HALPDANG=1)
- (3) Use of hallucinogens caused you to do things that repeatedly got you in trouble with the law (HALLAWTR=1)
- (4) Problems with family or friends probably caused by using hallucinogens (HALFMFPB=1) and continued to use hallucinogens even though you thought using hallucinogens caused these problems (HALFMCTD=1).

HEROIN:

To be defined with abuse of heroin, ABUSEHER, a respondent must have met one or more of these heroin abuse criteria in the past year and must not have been dependent upon heroin in the past year (DEPNDHER=0):

- (1) Serious problems at home, work, or school caused by using heroin, such as
 - neglecting their children
 - missing work or school
 - doing a poor job at work or school
 - losing a job or dropping out of school(HERSERPB=1)
- (2) Used heroin regularly and then did something that might have put you in physical danger (HERPDANG=1)
- (3) Use of heroin caused you to do things that repeatedly got you in trouble with the law (HERLAWTR=1)
- (4) Problems with family or friends probably caused by using heroin (HERFMFPB=1) and continued to use heroin even though you thought using heroin caused these problems (HERFMCTD=1).

Note: A respondent could answer the abuse questions if he or she reported injecting with a needle, smoking, sniffing, or snorting heroin in the past year, even if he or she reported not using heroin in the past year. Thus, cases may exist where a respondent was classified to have abused heroin, even though he or she had not used heroin in the past year according to the imputed recency variable (HERYR).

INHALANTS:

To be defined with abuse of inhalants, ABUSEINH, a respondent must have met one or more of these inhalant abuse criteria in the past year and must not have been dependent upon inhalants in the past year (DEPNDINH=0):

- (1) Serious problems at home, work, or school caused by using inhalants, such as
 - neglecting their children
 - missing work or school
 - doing a poor job at work or school
 - losing a job or dropping out of school(INHSERP=1)
- (2) Used inhalants regularly and then did something that might have put you in physical danger (INHPDANG=1)
- (3) Use of inhalants caused you to do things that repeatedly got you in trouble with the law (INHLOWTR=1)
- (4) Problems with family or friends probably caused by using inhalants (INHFMFPB=1) and continued to use inhalants even though you thought using inhalants caused these problems (INHFMCTD=1).

MARIJUANA:

To be defined with abuse of marijuana, ABUSEMRJ, a respondent must have met one or more of these marijuana abuse criteria in the past year and must not have been dependent upon marijuana in the past year (DEPNDMRJ=0):

- (1) Serious problems at home, work, or school caused by using marijuana, such as
 - neglecting their children
 - missing work or school
 - doing a poor job at work or school
 - losing a job or dropping out of school(MRJSERP=1)
- (2) Used marijuana regularly and then did something that might have put you in physical danger (MRJPDANG=1)
- (3) Use of marijuana caused you to do things that repeatedly got you in trouble with the law (MRJLOWTR=1)
- (4) Problems with family or friends probably caused by using marijuana (MRJFMFPB=1) and continued to use marijuana even though you thought using marijuana caused these problems (MRJFMCTD=1).

Note: A respondent could answer the abuse questions if he or she reported using marijuana in the past year, regardless of whether he or she reported the frequency of days in which he or she used marijuana. Thus, cases may exist where a respondent was classified to have abused marijuana but used marijuana less than 6 days in the past year according to the imputed frequency of use variable (IRMJFY).

PAIN RELIEVERS:

To be defined with abuse of pain relievers, ABUSEANL, a respondent must have met one or more of these pain reliever abuse criteria in the past year and must not have been dependent upon pain relievers in the past year (DEPN DANL=0):

- (1) Serious problems at home, work, or school caused by using pain relievers, such as
 - neglecting their children
 - missing work or school
 - doing a poor job at work or school
 - losing a job or dropping out of school(ANLSERP B=1)
- (2) Used pain relievers regularly and then did something that might have put you in physical danger (ANLPDANG=1)
- (3) Use of pain relievers caused you to do things that repeatedly got you in trouble with the law (ANLLAWTR=1)
- (4) Problems with family or friends probably caused by using pain relievers (ANLFMFPB=1) and continued to use pain relievers even though you thought using pain relievers caused these problems (ANLFMCTD=1).

SEDATIVES:

To be defined with abuse of sedatives, ABUSESED, a respondent must have met one or more of these sedative abuse criteria in the past year and must not have been dependent upon sedatives in the past year (DEPN DSED=0):

- (1) Serious problems at home, work, or school caused by using sedatives, such as
 - neglecting their children
 - missing work or school
 - doing a poor job at work or school
 - losing a job or dropping out of school(SEDSERP B=1)
- (2) Used sedatives regularly and then did something that might have put you in physical danger (SEDPDANG=1)
- (3) Use of sedatives caused you to do things that repeatedly got you in trouble with the law (SEDLAWTR=1)
- (4) Problems with family or friends probably caused by using sedatives (SEDFMFPB=1) and continued to use sedatives even though you thought using sedatives caused these problems (SEDFMCTD=1).

STIMULANTS:

To be defined with abuse of stimulants, ABUSESTM, a respondent must have been routed to the dependence and abuse questions in 2006 based on variables that existed in 2005 (STM DAFLG=98), must have met one or more of these stimulant abuse criteria in the past year (i.e., respondents who did not indicate methamphetamine use or other stimulant use from the core drug module or questions in the special drugs module other than the two new 2005 special drug use questions and the new 2006 special drug consistency check questions mentioned above and who met one or more of these stimulant abuse criteria were categorized as NOT having

abused stimulants in the past year), and must not have been dependent upon stimulants in the past year (DEPNDSTM=0):

- (1) Serious problems at home, work, or school caused by using stimulants, such as
 - neglecting their children
 - missing work or school
 - doing a poor job at work or school
 - losing a job or dropping out of school(STMSERP=1)
- (2) Used stimulants regularly and then did something that might have put you in physical danger (STMPDANG=1)
- (3) Use of stimulants caused you to do things that repeatedly got you in trouble with the law (STMLAWTR=1)
- (4) Problems with family or friends probably caused by using stimulants (STMFMPB=1) and continued to use stimulants even though you thought that using stimulants caused these problems (STMFMC=1).

Note: A respondent could answer the abuse questions if he or she reported injecting stimulants with a needle in the past year, even if he or she reported not using stimulants in the past year. Thus, cases may exist where a respondent was classified to have abused stimulants, even though he or she had not used stimulants in the past year according to the imputed recency variable (STMYR).

TRANQUILIZERS:

To be defined with abuse of tranquilizers, ABUSETRN, a respondent must have met one or more of these tranquilizer abuse criteria in the past year and must not have been dependent upon tranquilizers in the past year (DEPNDTRN=0):

- (1) Serious problems at home, work, or school caused by using tranquilizers, such as
 - neglecting their children
 - missing work or school
 - doing a poor job at work or school
 - losing a job or dropping out of school(TRNSERP=1)
- (2) Used tranquilizers regularly and then did something that might have put you in physical danger (TRNPDANG=1)
- (3) Use of tranquilizers caused you to do things that repeatedly got you in trouble with the law (TRNLAWTR=1)
- (4) Problems with family or friends probably caused by using tranquilizers (TRNFMPB=1) and continued to use tranquilizers even though you thought using tranquilizers caused these problems (TRNFMCTD=1).

APPENDIX E

Recoded Mental Health

The 2005 National Survey on Drug Use and Health (NSDUH) included a "serious mental illness" module that was designed to provide data on mental health measures for adults aged 18 or older. Measures available using the 2005 data include serious psychological distress (SPD) and serious mental illness (SMI). SMI was not originally measured for the 2005 NSDUH but was developed to allow comparisons of serious mental illness measures with 2008 and later years and is described in the report, *Statistical Models to Predict Mental Illness from 2005 to 2007* (Center for Behavioral Health Statistics and Quality [CBHSQ], 2017).

For the 2006 NSDUH, serious psychological distress (SPD) was measured using the K6 screening instrument for nonspecific psychological distress (Furukawa, Kessler, Slade, & Andrews, 2003; Kessler et al., 2003). The six items of the K6 scale gather information regarding how frequently a respondent experienced symptoms of psychological distress during the one month in the past year when he or she was at his or her worst emotionally. These six items are referred to as the adult short-form module and compose the Psychological Distress module in the 2006 NSDUH questionnaire, which was named the Serious Mental Illness module in the 2005 NSDUH questionnaire.

In NSDUH reports prior to 2004, the K6 scale was used to measure serious mental illness (SMI). For a detailed discussion of the reasons that the K6 was used to measure SPD instead of SMI for the 2004 and later NSDUH reports, as well as details on a methodological history of SPD, see Section B.4.4 of Appendix B in the *Results from the 2004 National Survey on Drug Use and Health: National Findings* (Office of Applied Studies [OAS], 2005).

Changes to the 2008 questionnaire resulted in the retroactive creation of adjusted variables for 2005 in order to allow multiyear analyses. The Mental Health module in the 2008 questionnaire (referred to as the Psychological Distress module in 2006) was revised to include questions related to two functional impairment scales. See Aldworth, Kott, Yu, Mosquin, and Barnett-Walker (2010) for more details. In addition, the K6 questions were revised to ask about two reference periods: (1) the past 30 days and (2) the month in the past 12 months when the distress was the worst (if different than the past 30 days). This change allowed for both past year and past month measures of SPD to be developed. The 2008 past year SPD measure (SPDYR) was created by combining both responses from past month and worst month in the past year K6 items. Due to these changes in the questionnaire, the 2008 past year SPD variable was not comparable with the past year SPD variable from the 2004 through 2007 NSDUHs (SPD_UADJ) and was therefore renamed. Because of the lack of comparability in the past year SPD measure and the fact that the past month measure of SPD more closely corresponds with SPD reference periods reported in other surveys, such as the National Health Interview Survey and the Behavioral Risk Factor Surveillance System, only past month SPD was presented in the 2008 detailed tables and 2009 mental health detailed tables (OAS, 2009; CBHSQ, 2010).

A study was implemented to assess the possibility of generating adjusted past year SPD variables for 2004 through 2007, which could be compared with past year variables from 2008 and later NSDUHs. Results of this study suggested that adjusted past year SPD variables for 2004 through 2007 were comparable with past year SPD variables from 2008 and later NSDUHs. Therefore, a statistically adjusted version of past year SPD was created for 2005 through 2007, which is described in more detail later in this appendix. Adjusted variables were

not created for 2004, because the 2004 estimates were subject to a higher degree of sampling fluctuation due to the split-sample design.

Listed below are the K6 questions for both reference periods (the past 30 days and the month in the past 12 months when the distress was the worst), their associated edited variable names, and possible response categories for each question. Note that the questions regarding the past 30 days (DSTxxx30) and the question asking whether there was a worse month in the past 12 months than the past 30 days (DSTWORST) were not asked in 2006, because they were not added to the questionnaire until 2008. Also note that the wording of the questions regarding the worst month (DSTxxxxx) is from the 2006 questionnaire. However, there were minor wording changes beginning in 2008 to account for the additional questions.

The following seven questions are from the 2008 questionnaire. These questions were not asked in 2006, but they are included here as a reference because statistically adjusted 2006 past year SPD variables were created to be comparable with those from 2008.

DSTNRV30 During the past 30 days, how often did you feel nervous?

- 1 All of the time
 - 2 Most of the time
 - 3 Some of the time
 - 4 A little of the time
 - 5 None of the time
- DK/REF

Response categories are the same for the next five questions:

DSTHOP30 During the past 30 days, how often did you feel hopeless?

DSTRST30 During the past 30 days, how often did you feel restless or fidgety?

DSTCHR30 During the past 30 days, how often did you feel so sad or depressed that nothing could cheer you up?

DSTEFF30 During the past 30 days, how often did you feel that everything was an effort?

DSTNGD30 During the past 30 days, how often did you feel down on yourself or, no good, or worthless?

DSTWORST The last questions asked about how you have been feeling in the past 30 days. Now think about the past 12 months. Was there a month in the past 12 months when you felt more depressed, anxious, or emotionally stressed than you felt during the past 30 days?

- 1=Yes
2=No

The following six questions are from the 2006 questionnaire. Slightly modified versions of these questions were asked in 2008 of respondents with DSTWORST=1.

DSTNRVOS Most people have periods when they are not at their best emotionally. Think of one month in the past 12 months when you were the most depressed, anxious, or emotionally stressed. If there was no month like this, think of a typical month.

During that month, how often did you feel nervous?

- 1 All of the time
 - 2 Most of the time
 - 3 Some of the time
 - 4 A little of the time
 - 5 None of the time
- DK/REF

Response categories are the same for the following questions:

DSTHOPLS During that same month when you were at your worst emotionally . . . how often did you feel hopeless?

DSTRSTLS During that same month when you were at your worst emotionally . . . how often did you feel restless or fidgety?

DSTCHEER During that same month when you were at your worst emotionally . . . how often did you feel so sad or depressed that nothing could cheer you up?

DSTEFFRT During that same month when you were at your worst emotionally . . . how often did you feel that everything was an effort?

DSTNGOOD During that same month when you were at your worst emotionally . . . how often did you feel down on yourself, no good, or worthless?

Based on the K6 questions above, two sets of recoded SPD variables are available on the data file. The first set, referred to as unadjusted SPD, is based only on the K6 questions found in the 2006 questionnaire, referencing the worst month during the past 12 months. The unadjusted variables are used in the 2006 detailed tables (OAS, 2007). The second set, referred to as adjusted SPD, is statistically adjusted to be comparable with recodes in 2008 and later NSDUHs that take into account both reference periods (i.e., past 30 days and worst month during the past 12 months). Below are details on how each set of recoded SPD variables is defined and how to implement multiyear comparisons.

Unadjusted SPD

In 2006, based on the six worst month items of the K6 scale (DSTNRVOS, DSTHOPLS, DSTRSTLS, DSTCHEER, DSTEFFRT, and DSTNGOOD), an SPD score variable

(SPD_USCR) was created for adult respondents (persons aged 18 or older) by transforming the reported response category for each of the six questions so that "all of the time" was coded 4, "most of the time" was coded 3, "some of the time" was coded 2, "a little of the time" was coded 1, and "none of the time" was coded 0, along with response options of "don't know," refusals, bad data, blanks, and legitimate skips. The SPD score variable was calculated by summing these assigned values across all six variables and had values from 0 to 24. Exceptions included youths aged 12 to 17 who were assigned the standard SAS missing code (SPD_USCR=.) because the K6 scale was not administered to respondents younger than 18.

The final analysis variable (SPD_UADJ) is based on the SPD score variable (SPD_USCR) and indicates whether each adult respondent has been classified as having SPD. Adults were classified as having past year SPD (SPD_UADJ=1) if their SPD score was 13 or greater (SPD_USCR \geq 13), and they were classified as not having past year SPD (SPD_UADJ=0) if their SPD score was less than 13 (SPD_USCR $<$ 13). This cut point was chosen to equalize false positives and false negatives (Kessler et al., 2003). Exceptions included youths aged 12 to 17 who were assigned the standard SAS missing code (SPD_UADJ=.) because the K6 scale was not administered to respondents younger than 18.

To do multiyear trend (or multi-year pooled data) analyses for SPD that include the 2004 NSDUH data, refer to the 2005 documentation for details on how to use and compare data for these measures, including necessary weight adjustments.

Adjusted SPD

For 2008 and later years, each of the two sets of K6 questions listed above were given a score between 0 and 24 using the same scoring procedures as those described above for SPD_USCR. A worst K6 total score variable (K6SCMAX) was created that takes on the higher of the two K6 total scores for the past 30 days or past 12 months, and a respondent is considered to have past year SPD (SPDYR) if K6SCMAX \geq 13. Due to these changes in 2008, the K6 total score (K6SCMAX) and past year SPD (SPDYR) variables are not comparable with corresponding variables for 2005 through 2007 (SPD_USCR and SPD_UADJ) and thus have different variable names.

In order to be able to make SPD comparisons across survey years starting with 2005, adjusted versions of worst K6 total score (K6SMXADJ) and past year SPD (SPDYRADJ) variables were created. Because the past 30-day questions did not exist for 2005 through 2007, a statistical adjustment was applied to yield scores comparable with those from 2008 and later NSDUHs. See Aldworth et al. (2010) for details regarding the adjustment method. A respondent is considered to have past year SPD (SPDYRADJ) if K6SMXADJ \geq 13.

For the analyses of trends across time using these adjusted recodes starting with the 2005 data, revised variables should be created that take on the values of the adjusted variables K6SMXADJ and SPDYRADJ, respectively for 2005 through 2007, and the values of K6SCMAX and SPDYR, respectively for 2008 and later NSDUHs. Both sets of variables are based on the full sample of data, so the standard analysis weight (ANALWT_C) should be used.

SMI Estimates for 2005 to 2007

In 2008, the Substance Abuse and Mental Health Services Administration (SAMHSA) implemented a new program to produce national and state estimates of the prevalence of mental illness. The Mental Health Surveillance Study (MHSS) was conducted as part of the NSDUH from 2008 to 2012 for the primary purpose of developing models that estimate the prevalence of SMI and any mental illness (AMI) in the adult (18 or older) civilian, noninstitutionalized population of the United States. The MHSS consisted of two major components:

- a new questionnaire module administered to all adult respondents that captured data on psychological distress and impairment caused by mental health issues, and
- a subsample of adults selected from the main NSDUH study for follow-up clinical interviews.

Information from the clinical interviews was used to determine the "gold-standard" measure of SMI status ("yes" or "no") for each subsample respondent. The clinical interview data were linked with the data obtained from the new module to develop a prediction model to estimate SMI and AMI for the full NSDUH sample (CBHSQ, 2014). A prediction model was developed that included gold-standard SMI status (obtained from the clinical interviews) as the response variable. The predictor variables included variables such as psychological distress and impairment measures that were collected in the main NSDUH questionnaire for adults. The resulting prediction model developed from the MHSS clinical data was then applied to all adult NSDUH respondents to obtain the predicted probability of SMI for each respondent. Next, a cut point was determined so that if the predicted probability of SMI for a respondent met or exceeded the cut point, then he or she was *predicted* to be SMI positive; otherwise, he or she was predicted to be SMI negative. That is, a dichotomy of *SMI status* was computed. Receiver operating characteristic (ROC) analysis was applied to determine the cut point that resulted in the weighted number of false-positive and false-negative counts being (at least approximately) equal, thus ensuring unbiased estimates. Using the same model, a cut point for producing unbiased estimates of AMI was also determined.

SAMHSA has produced estimates of SMI and AMI each year since 2008 using models developed with 2008 to 2012 clinical interview data, along with data from the main survey mental health module that has remained in NSDUH. Unfortunately, these models could not be applied to the 2007 and earlier NSDUH data because some of the predictors in the 2008 to 2012 models were not collected before 2008. However, the 2005 to 2007 NSDUHs did collect some of the necessary predictors, along with other mental health variables that could potentially be good predictors of SMI and AMI. Given the analytic benefits of having comparable indicators of SMI and AMI for additional years of NSDUH data, alternative models were developed from the MHSS data with the intention of generating estimates of SMI and AMI in 2005 to 2007 that were comparable with the 2008 and later estimates (CBHSQ, 2017).

Because the aim was to provide alternative estimates of SMI (AMI) that matched those derived from SMIYR_U (AMIYR_U), the SMIYR_U (AMIYR_U) variable(s) was designated as the *response variable(s)* in the alternative models. Therefore, the entire adult NSDUH data

from 2008A¹ to 2012 was available for the development of those models. Candidate *predictor variables* were created from information contained in common in all NSDUHs from 2005 to 2012. A set of suitable predictor variables meeting this requirement was identified, and subsets of these variables were selected to formulate alternative final SMI and AMI prediction models. The final models were selected based on how well the associated cut point estimators performed in terms of the total error rate in the ROC analysis and in terms of bias at the overall and domain (i.e., subpopulation) levels.

Unfortunately, even the final selected alternative AMI prediction model exhibited a fairly high total error rate and levels of bias statistically, significantly different from zero at the .05 level for a large number of domains. Therefore, a decision was made not to proceed with creating measures of AMI for 2005 to 2007 based on the final alternative AMI prediction model.

However, the final selected alternative SMI prediction model exhibited a very low level of bias and a low total error rate overall. In addition, very few domains exhibited levels of bias significant at the .05 level. Therefore, a decision was made to proceed with creating measures of SMI for 2005 to 2007 based on the final alternative SMI prediction model.

SMI estimates for 2005 to 2007 are created as follows (CBHSQ, 2017). The following variable SMIPP_A represents the predicted probability that a respondent has SMI based on the final alternative SMI prediction (logistic regression) model:

$$\begin{aligned} \text{SMIPP_A} = & 1 / (1 + \exp [-(-8.481558862 + 0.344567199 * \text{WSPDSC2_A} \\ & + 2.131295774 * \text{AMDEYR_A} + 0.172135081 * \text{AGE1830} \\ & + 0.507779212 * \text{ADSDSSC3_A} + 1.694191582 * \text{ADWRSTHK_A} \\ & + 0.772597986 * \text{DEPRSYR_A})]). \end{aligned}$$

This variable, SMIPP_A, is considered comparable with the variable SMIPP_U for 2008 and later NSDUHs; however, it is based on a different set of predictors. The 2008 and later SMI variables are based on the 2012 model (CHBSQ, 2014). Users should consider the differences in methodology prior to making any decisions on whether and how to use this variable. The predictor variables included in this alternative model are not available on the data file.

The variable SMIYR_A represents predicted SMI status ("yes" or "no") after dichotomizing SMIPP_A using the cut point 0.372556455 (i.e., if SMIPP_A is less than the cut point, then SMIYR_A = 0; if SMIPP_A is greater than or equal to the cut point, then SMIYR_A = 1). This variable is not recommended to be used when analyzing variables that were used as predictor variables for the SMI model: past year suicidal thoughts, past year major depressive episode (MDE), past year depression, Kessler-6 (K6) scale, or Sheehan Disability Scale (SDS). Furthermore, the use of this variable is not recommended to be used when analyzing other variables closely linked with the predictor variables (including past year suicide attempts, suicide plans, medical treatment for suicide attempts, lifetime MDE or depression, SPD, or components

¹ The 2008A NSDUH refers to Sample A of the 2008 NSDUH (i.e., the half sample assigned to the WHODAS questions in 2008).

used in the K6 or SDS). This variable, SMIYR_A, is considered comparable with the variable SMIYR_U for 2008 and later NSDUHs; however, it is based on a different set of predictors. The 2008 and later SMI variables are based on the 2012 model (CHBSQ, 2014). Users should consider the differences in methodology prior to making any decisions on whether and how to use this variable.

APPENDIX F

Recoded Depression Variable Documentation

The 2006 National Survey on Drug Use and Health (NSDUH) computer-assisted interviewing (CAI) instrumentation included two modules, the adult depression module and the adolescent depression module, which were designed to measure whether or not respondents had experienced a major depressive episode (MDE) in their lifetime and past year. Additional questions to assess impairment levels caused by MDE and treatment received for depression were included at the end of each MDE module.

This appendix provides details about the questions designed to assess MDE, comparability issues across survey years, development of adjusted lifetime and past year MDE variables, variable naming conventions, and analysis and weighting information. Variable specifications for lifetime and past year MDE as well as MDE with severe impairment are also provided. A flowchart (see Figure 1) is included to provide details regarding the routing logic leading up to the MDE questions specifying which respondents were asked the MDE questions and were defined as having MDE. The Key Mental Health Variables appendix provides a table with the variable names for the most commonly used NSDUH mental health measures (including depression) as well as information regarding comparability across survey years starting with the 2002 NSDUH.

The NSDUH CAI questions designed to assess MDE symptoms were based on the criteria in the *Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*, 4th edition (American Psychiatric Association, 1994). More specifically, MDE questions for adults were adapted from the depression section of the National Comorbidity Survey-Replication (NCS-R; Harvard School of Medicine, 2005), and those for adolescents (youths) were adapted from the depression section of the National Comorbidity Survey-Adolescent (NCS-A; Harvard School of Medicine, 2005). To make the modules developmentally appropriate for youths, there are minor wording differences in a few questions between the adult and youth modules. A person was defined as having had a lifetime MDE if he or she had five or more of nine symptoms for MDE in the same 2-week period in his or her lifetime, in which at least one of the symptoms was a depressed mood or loss of interest or pleasure in daily activities. A person was defined as having MDE in the past year if he or she had a lifetime MDE and a period of time in the past 12 months when he or she felt depressed or lost interest or pleasure in daily activities for 2 weeks or longer, while also having some of the other symptoms for lifetime MDE.

When the depression modules were first introduced in 2004, all youth respondents, but only half of adult respondents, received the questions because of a split-sample design. Further details on the 2004 split sample are provided in Appendix A of the 2004 national findings report (Office of Applied Studies [OAS], 2005b). Starting with the 2005 NSDUH, all youth and adult respondents received the questions in their respective depression modules. In the 2008 NSDUH, the adult mental health module (known as the psychological distress module in 2006) was updated. This module precedes the adult depression module in the questionnaire, which remained unchanged. In this revised 2008 mental health module, the K6 questions on nonspecific psychological distress were asked about two reference periods, the past 30 days and the month in the past 12 months when the distress was the worst. In addition, adult respondents were administered the mental health module through a split-sample design consisting of one of two impairment scales, an abbreviated World Health Organization Disability Assessment Schedule (WHODAS) or the Sheehan Disability Scale (SDS), to measure impairment due to emotions, nerves, or mental health. See the 2008 Recoded Mental Health codebook appendix for further

details. Starting in 2009, the split sample was removed, and the CAI instrument included only the WHODAS questions.

These changes and the fact that this revised mental health module precedes the adult depression module within the questionnaire could have influenced the adult respondent's answers to subsequent depression-related items. This type of influence is referred to as a context effect. A detailed analysis was conducted to examine potential context effects on MDE variables based on the changes in the mental health module. It was determined that MDE estimates for adults aged 18 or older from 2008 could not be compared with the 2007 and prior year estimates. Two subsamples (i.e., WHODAS and SDS) also were examined to determine whether the MDE data from the two 2008 subsamples were comparable. Because of differences in MDE estimates between the two samples, combining the SDS and WHODAS half-samples to produce an overall 2008 adult MDE estimate is not recommended. This applies to all adult MDE-related estimates (treatment/counseling for MDE, MDE-related impairment, etc.). See Appendix B, Section B.4.7, in the 2008 national findings report (OAS, 2009) for further details on the decisions on the 2008 analyses.

Starting with the 2009 NSDUH, the mental health module includes only the WHODAS questions; therefore, the estimates for adult MDE from 2009 onward can be compared with the WHODAS half-sample from 2008. See Appendix B, Section B.4.2, in the 2009 mental health findings report (Center for Behavioral Health Statistics and Quality [CBHSQ], 2010) for details on the 2009 analyses.

In order to be able to use the full sample of 2008 data and also to make adult MDE comparisons across survey years starting with 2005 and continuing through 2008 and later years, adjusted versions of adult lifetime MDE (AJAMDELT) and adult past year MDE (AJAMDEYR) variables were created retroactively for the years 2005 through 2008. These variables were adjusted to make MDE estimates from the SDS half-sample in 2008 and all adult respondents for 2005 through 2007 comparable with the MDE estimates based on the WHODAS half-sample in 2008 and all adult respondents in later years. In the 2008 data, the values of the adjusted MDE variables are identical to the values of the unadjusted MDE variables for respondents in the WHODAS subsample. Lifetime and past year MDE status variables for respondents in the SDS subsample were adjusted by a two-step process in which the adjustment procedure was first applied at an individual level to the past year MDE indicator variable, and then to the lifetime indicator variable. The adjustment was done in such a way that consistency was enforced between past year and lifetime MDE; that is, a respondent with past year MDE could not be adjusted to have no lifetime MDE. Specifically, a weighted logistic regression was fit for the NSDUH data from 2005 to 2009 with past year MDE as the binary dependent variable. Independent variables in this model controlled for the questionnaire differences between NSDUHs from 2005 to 2007 and NSDUHs from 2008 and 2009, as well as for the context effects associated with the SDS half sample in 2008. This model was used to compute predicted probabilities of past year MDE for each respondent. The predicted probabilities, which can have any value between 0 and 1, then were dichotomized such that each respondent was specified as having or not having MDE in the past year. Adjusted lifetime MDE estimates were similarly constructed, with the additional condition that respondents reporting past year MDE were assumed to have lifetime MDE. No adjusted variables were created for the adult impairment or depression treatment variables. Details about the adjustment of the adult MDE data for 2005 to

2008 can be found in a report describing these procedures (Aldworth, Kott, Yu, Mosquin, & Barnett-Walker, 2012).

For adolescents aged 12 to 17, MDE estimates are comparable throughout all years beginning with 2004. No changes were made to the 2008 questionnaire that would affect the responses to youth depression items. Changes in 2009 to the youth mental health service utilization (YMHSU) module, which precedes the adolescent depression module in the questionnaire, were also found to not affect comparability of the youth depression variables for 2009 and prior years. These changes included the replacement of five questions that asked about receipt of special education services and school counseling and time spent in jail or foster care with questions that asked about receipt of mental health services in the education and justice system sectors. A context effect analysis evaluating the potential effects of the 2009 changes determined that comparability is not affected by these changes. For more information on the 2009 youth analyses results, see Appendix B, Section B.4.2, in the 2009 mental health findings report (CBHSQ, 2010).

Naming Conventions

In the 2004-2007 NSDUHs, MDE data from both the adult and youth modules were used to create single, combined recoded lifetime (MDELT) and past year MDE (MDEYR) variables, even though adult and youth data were not comparable because of wording differences between the modules. For example, the lifetime MDE variable in the datasets prior to 2008 contained both adolescent lifetime MDE created using data from the adolescent section and adult lifetime MDE created using data from the adult section. In the 2004-2007 detailed tables, analyses using combined variables were subset to the age group of interest to present estimates separately for adults and youths (OAS, 2005a; 2006; 2007; 2008). Note that in the 2004 detailed tables only, estimates were also presented for adults and youths combined, but producing combined estimates is no longer recommended.

Starting with the 2008 NSDUH, the MDE variables were renamed, and a separate set of variables was created each for adults and for youths. The new variable names have continued to be used in the 2009 and later NSDUHs. Under the new naming convention, adult MDE variables begin with "A" and youth MDE variables begin with "Y" (e.g., AMDEYR, YMDEYR). There is one adolescent variable that does not follow this naming convention (i.e., MDEIMPY). Variables where youth and adult data were not combined into a single variable prior to 2008 were not renamed for adolescents (i.e., YSDSHOME, YSDSWRK, YSDSREL, YSDSSOC, YSDSOVRL, and MDEIMPY), since there was no change in variable construction or comparability. In addition, prior to 2008, the combined set of MDE variables was located in the Recoded Adult and Adolescent Depression section of the codebook. Currently, all adult and youth MDE variables are now located in either the Recoded Adult Depression or Recoded Adolescent Depression sections, respectively.

For adults, the 2008 variable name change denotes a break in the trend for the estimates due to the context effects noted earlier. To address the break in the trend, an adjustment was applied to the 2005-2008 adult MDE data, and the resulting new variables have retroactively been added to the respective data files. These adjusted adult MDE variables begin with the abbreviation "AJ" for "adjusted" (i.e., AJAMDEYR, AJAMDELT). With the addition of the

adjusted adult MDE variables, the documentation for the existing adult MDE variables has been retroactively revised to refer to the existing variables as unadjusted adult MDE variables.

In summary, for adults, the new variable names indicate that the MDE data from 2008 or later should not be compared or combined with unadjusted variables from 2004 to 2007. However, adjusted variables were later added for 2005 through 2008 to allow comparisons across years from 2005 onward. Adjusted adult MDE variables are not available for 2004. The adjusted variables for 2005 through 2008 can be renamed to match the adult past year MDE (AMDEYR) and adult lifetime MDE (AMDELTA) variables for 2009 and subsequent years to produce comparable estimates across years, as seen in the 2010 mental health detailed tables (CBHSQ, 2012).

New variable names indicate changes that may or may not impact comparability with prior years. As described above, the 2008 adult MDE estimates are not considered comparable with 2007 and prior years. For adolescents, despite the new variable names, the MDE data from 2008 or later can be compared or combined with MDE data from 2004 to 2007 since there was no change to the youth modules. But in order to do so, either the original or new set of youth MDE variables should be renamed to match the other so that the data can be combined. See the 2008 Recoded Depression Variable Documentation codebook appendix for sample code on how to rename the 2008 or later survey year variables back to prior year names. In addition, a summary of variable names and comparability across years is presented in Table 1 for both adult and youth lifetime and past year MDE. All variables in a column are comparable for the time periods specified despite nonidentical variable names.

Table 1. Lifetime and Past Year Major Depressive Episode (MDE) Variable Comparability: 2004 NSDUH and Later Survey Years

NSDUH Survey Year	Adult MDE			Youth MDE
	Comparable Variables 2004-2007	Comparable Variables 2008 and Later Years Unadjusted Data	Comparable Variables 2005 and Later Years Adjusted Data	Comparable Variables 2004 and Later Years
2004	MDELTA, MDEYR ¹			MDELTA, MDEYR ¹
2005-2007	MDELTA, MDEYR ¹		AJAMDELTA, AJAMDEYR	MDELTA, MDEYR ¹
2008		AMDELTA, AMDEYR ²	AJAMDELTA, AJAMDEYR	YMDELTA, YMDEYR
2009 and Later Years		AMDELTA, AMDEYR	AMDELTA, AMDEYR	YMDELTA, YMDEYR

NOTE: All the variables within the same column are comparable across years, once the variables have been renamed to match.

¹ To use these lifetime and past year MDE variables in comparisons, the data must be subset to adults or youths depending on the analysis of interest. Presenting estimates using combined adult and youth data is not recommended due to wording differences between the adult and youth modules.

² To use these lifetime and past year MDE variables in comparisons, the data must be subset to the WHODAS subsample (MHSAMP08=1).

Weights

Analyses using unadjusted 2005 and 2006 MDE variables for adults or youths, such as those in the 2006 detailed tables (OAS, 2007), should be weighted using the standard analysis weight (ANALWT_C). A select group of trend tables within the 2006 detailed tables show MDE estimates back to 2004, when a split-sample design occurred in the adult depression module. For details on how to generate adult trend estimates from 2004 to 2006, see the 2005 codebook documentation. Analyses using MDE variables for youths across all years should be weighted by the standard analysis weight (ANALWT_C).

To analyze the 2005-2008 adjusted adult MDE variables in conjunction with the 2009 and subsequent year adult MDE variables (e.g., the MDE multiyear trend analyses published in the 2010 mental health detailed tables [CBHSQ, 2012]), the standard analysis weight (ANALWT_C) should be used across all years.

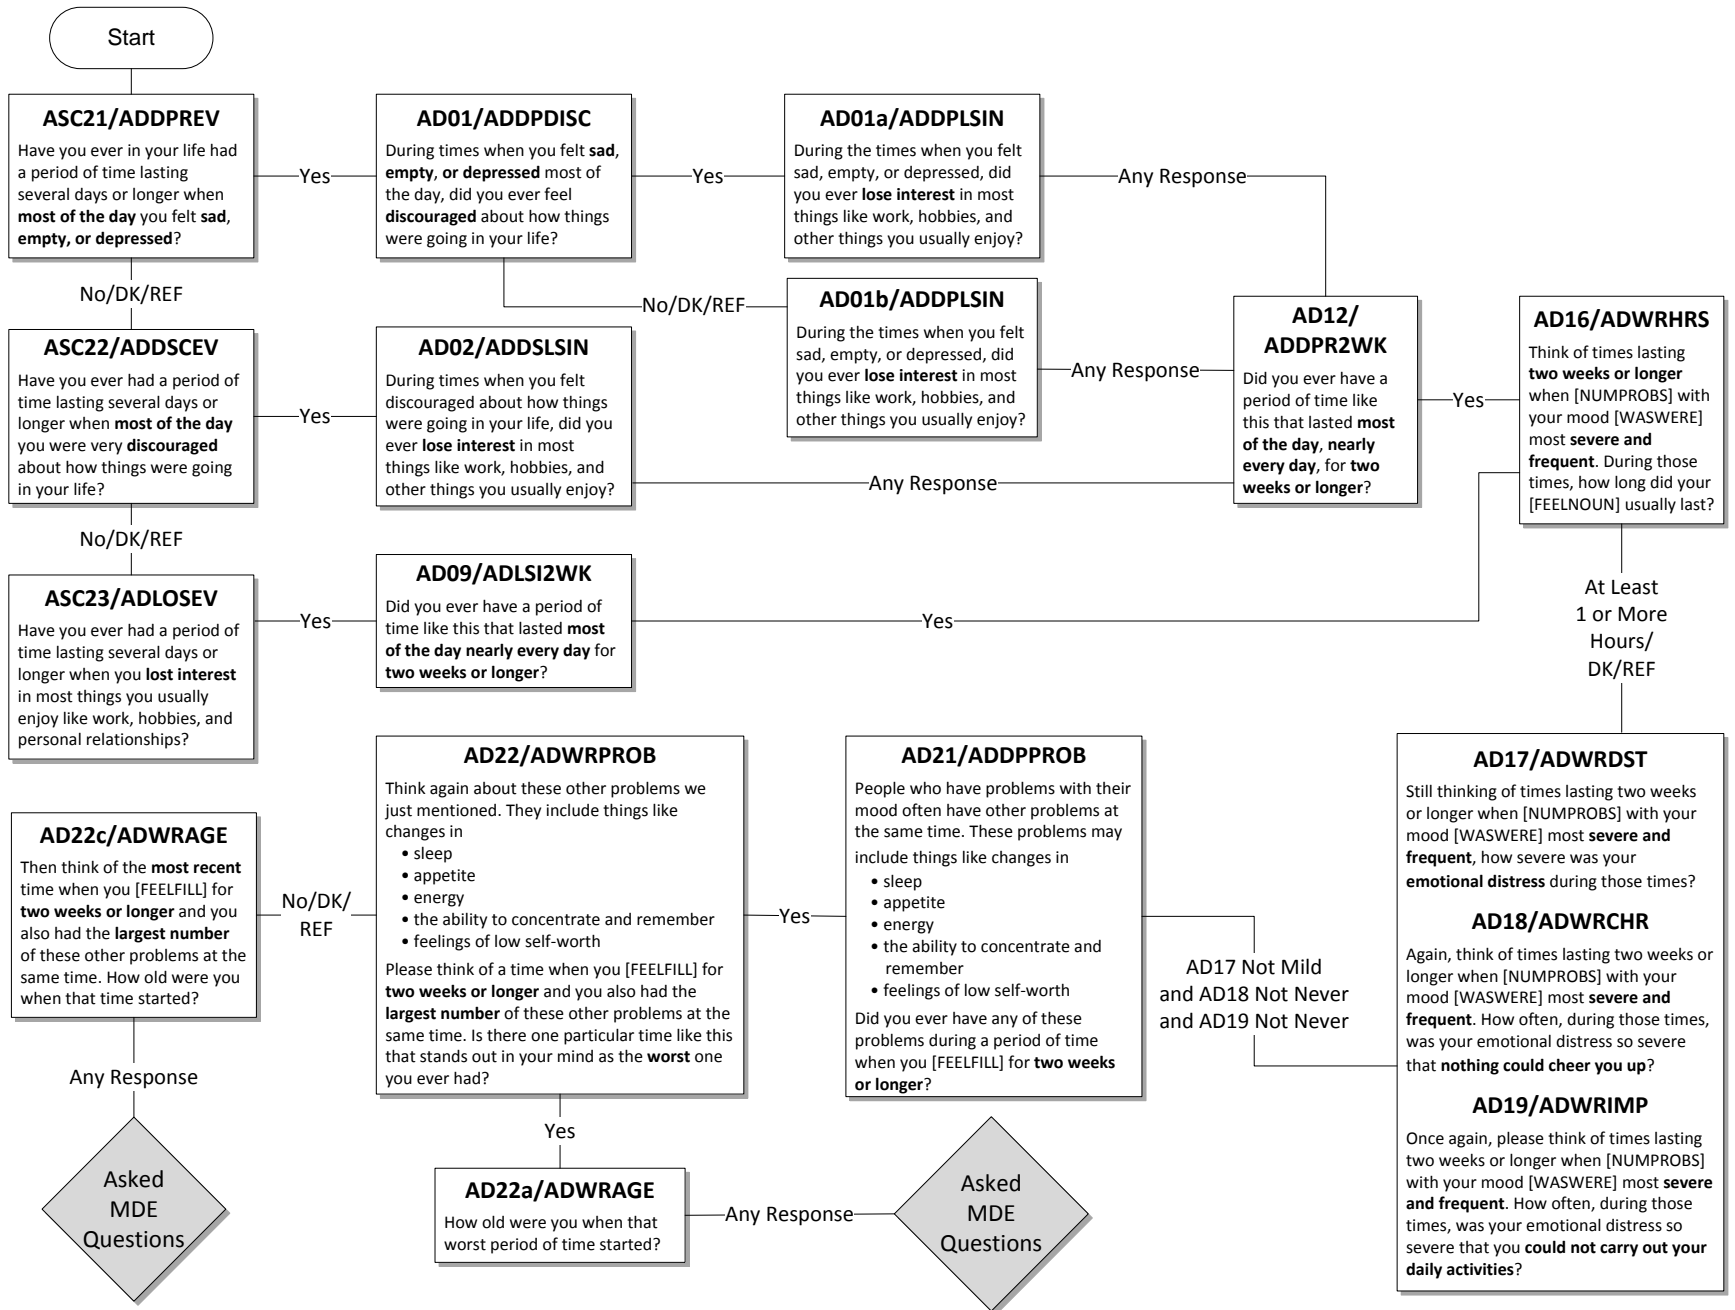

Furthermore, when creating estimates based on more than a single year of data, the appropriate weight for each year should be divided by the number of years of data that are combined to correctly estimate weighted population totals. For example, if a user combines 2005-2008 data to generate an annual average using the adjusted adult MDE variables, users should divide ANALWT_C by 4.

MDE Variable Specifications

In the adult and youth depression modules of the NSDUH, respondents were asked a series of introductory questions to determine whether they had a worst period of time where they experienced feeling sad, empty, depressed, discouraged, or a loss of interest. If respondents fit certain criteria based on the routing logic found in these introductory questions, then they were asked the questions related to the nine attributes (symptoms) of MDE. In order to demonstrate which respondents were actually asked the MDE attributes questions based on these introductory questions, a flowchart using the adult questions is included as Figure 1. These introductory questions in addition to the questions related to the nine attributes associated with MDE (see below) were used to score MDE.

This appendix includes information used for adults to define the lifetime MDE variable (MDELT) and the past year MDE variable (MDEYR), which are combined for adults and youths and found in the Recoded Adult and Adolescent Depression section of the codebook. The adult impairment recodes defined for only adults are found in the Recoded Adult Depression section of the codebook. Similar questions were asked of youth respondents and used to define similar youth MDE variables but are not specifically defined in this appendix. The questions shown in the flowchart and the documentation below refer to the adult depression-associated question indicator from the CAI instrument specifications followed by the corresponding edited variable name to assist users in mapping the information back to the CAI.

Figure 1. Routing Logic Prior to Adult Major Depressive Episode (MDE) Attribute Questions

F-6

The questions below, shown with their associated question indicator from the CAI specifications, refer to the worst period of time the respondent has had that stands out in his or her mind; or, if he or she does not recall a worst period of time, the questions refer to the most recent period of time when the respondent experienced any or all of the following: sadness, discouragement, or lack of interest in most things. **It should be noted that no exclusions were made for MDE caused by medical illness, bereavement, or substance use disorders.**

During that [worst/most recent] period of time...

1. Depressed mood most of the day

- a. ... did you feel sad, empty, or depressed **most of the day nearly every day**? (AD24A)
- b. ... did you feel discouraged about how things were going in your life **most of the day nearly every day**? (AD24C)

A respondent was assigned a positive response to this symptom (D_MDEA1=1) if he or she answered "yes" to either of the above questions.

2. Markedly diminished interest or pleasure in all or almost all activities most of the day

- a. ... did you lose interest in almost all things like work and hobbies and things you like to do for fun? (AD24E)
- b. ... did you lose the ability to take pleasure in having good things happen to you, like winning something or being praised or complimented? (AD24F)

A respondent was assigned a positive response to this symptom (D_MDEA2=1) if he or she answered "yes" to either of the above questions.

3. Weight

- a. Did you have a much smaller appetite than usual nearly every day during that time? (AD26A)
- b. Did you have a much **larger** appetite than usual nearly every day? (AD26B)
- c. Did you gain weight without trying to during that [worst/most recent] period of time? (AD26C)
 - i. ... because you were growing? (AD26C1)
 - ii. ... because you were pregnant? (AD26C2)
- d. How many pounds did you gain? (AD26D)
- e. Did you lose weight without trying to? (AD26E)
 - i. ... because you were sick or on a diet? (AD26E1)
- f. How many pounds did you lose? (AD26F)

A respondent was assigned a positive response to this symptom (D_MDEA3=1) if he or she answered "yes" to questions "a" or "b" above, or the answer to either question "d" or "f" was greater than or equal to 10. (Note that "d" was asked only if "c_i" and "c_{ii}" were not "yes," and "f" was asked only if "e_i" was not "yes.")

4. Insomnia or hypersomnia

- a. Did you have a lot more trouble than usual falling asleep, staying asleep, or waking too early nearly every night during that [worst/most recent] period of time? (AD26G)
- b. During that [worst/most recent] period of time, did you sleep a lot more than usual nearly every night? (AD26H)

A respondent was assigned a positive response to this symptom (D_MDEA4=1) if he or she answered "yes" to either of the above questions.

5. Psychomotor agitation or retardation

- a. Did you talk or move more slowly than is normal for you nearly every day? (AD26L)
 - i. (if AD26L=1) Did anyone else notice that you were talking or moving slowly? (AD26M)
- b. Were you so restless or jittery nearly every day that you paced up and down or couldn't sit still? (AD26N)
 - i. (if AD26N=1) Did anyone else notice that you were restless? (AD26O)

A respondent was assigned a positive response to this symptom (D_MDEA5=1) if he or she answered "yes" to either of the above "a_i" or "b_i" questions. (Note that "a_i" was only asked if "a" was "yes" and "b_i" was only asked if "b" was "yes.")

6. Fatigue or loss of energy

- a. During that [worst/most recent] period of time, did you feel tired or low in energy nearly every day even when you had not been working very hard? (AD26J)

A respondent was assigned a positive response to this symptom (D_MDEA6=1) if he or she answered "yes" to the above question.

7. Feelings of worthlessness

- a. Did you feel that you were not as good as other people nearly every day? (AD26U)
 - i. (if AD26U=1) Did you feel totally worthless nearly every day? (AD26V)

A respondent was assigned a positive response to this symptom (D_MDEA7=1) if he or she answered "yes" to question "a_i." (Note that "a_i" was only asked if "a" was "yes.")

8. Diminished ability to think or concentrate or indecisiveness

- a. During that [worst/most recent] time period, did your thoughts come much more slowly than usual or seem confused nearly every day? (AD26P)
- b. Did you have a lot more trouble concentrating than usual nearly every day? (AD26R)
- c. Were you unable to make decisions about things you ordinarily have no trouble deciding about? (AD26S)

A respondent was assigned a positive response to this symptom (D_MDEA8=1) if he or she answered yes to any of the above questions.

9. Recurrent thoughts of death or recurrent suicide ideation

- a. Did you often think about death, either your own, someone else's, or death in general? (AD26AA)
- b. During that period, did you ever think it would be better if you were dead? (AD26BB)
- c. Did you think about committing suicide? (AD26CC)
 - i. Did you make a suicide plan? (AD26DD)
 - ii. Did you make a suicide attempt? (AD26EE)

A respondent was assigned a positive response to this symptom (D_MDEA9=1) if he or she answered "yes" to any of the above questions.

Respondents were classified with lifetime MDE if they had at least five of the nine above attributes. Respondents who have had MDE in their lifetime (MDELT=1 for both adults and youths) and who have reported that they had a period of depression lasting 2 weeks or longer, while also having some of the symptoms mentioned during the past 12 months (ADPB2WK=1 for adults and YOPB2WK=1 for youths), were classified as having past year depression (MDEYR=1 for both adults and youths). Respondents with no lifetime MDE (MDELT=2 for both adults and youths) or respondents with lifetime MDE (MDELT=1 for both adults and youths) but no period of depression lasting 2 weeks or longer in the past year while having other symptoms (ADPB2WK=2 for adults or YOPB2WK=2 for youths) were defined as not having past year MDE (MDEYR=2 for both adults and youths).

Otherwise, respondents were classified as system missing for lifetime or past year MDE if they had unknown depression information and/or they were aged 12 to 17 (for adults) or aged 18 or older (for youths).

Respondents with lifetime MDE and respondents with recurrent thoughts of death or recurrent suicide ideation (D_MDEA9=1 for adults and D_MDEA9Y=1 for youths), regardless of MDE classification, were guided through the remainder of the depression module. Note that because of this second criterion, variables for treatment of depression may have values for respondents who were not classified as having lifetime MDE. If the subpopulation of interest is respondents with lifetime MDE or past year MDE, these restrictions should be implemented in the analysis using the appropriate variables. Users who are interested in the suicide ideation data¹ from the depression modules should also be aware of the routing logic shown in Figure 1 because only a subset of respondents are asked the suicide-related questions.

¹ The suicide estimates presented in the detailed tables are from the mental health module data, not the depression suicide module data.

MDE with Severe Impairment Variable Specifications

Respondents defined as having had MDE in the past year then were asked questions from the SDS to measure the level of functional impairment in major life activities reported to be caused by the MDE in the past 12 months (Leon, Olfson, Portera, Farber, & Sheehan, 1997).

The SDS measures mental health-related impairment in four major life activities or role domains. These four domains are defined separately for adults aged 18 or older and youths aged 12 to 17 to reflect the different roles associated with the two age groups. Each module consists of four questions that are assessed on a 0 to 10 visual analog scale with categories of "none" (0), "mild" (1-3), "moderate" (4-6), "severe" (7-9), and "very severe" (10).

A maximum impairment score (ASDSOVRL for adults and YSDSOVRL for youths) is then defined as the single highest severity level of role impairment across the four SDS role domains. The four SDS role domain variables were recoded so that no interference = 1, mild = 2, moderate = 3, severe = 4, and very severe = 5. A maximum level of interference over all four domains was then defined (ASDSOVRL or YSDSOVRL). Ratings greater than or equal to 7 on the scale (ASDSOVRL or YSDSOVRL=4, 5) were considered severe impairment. The 2006 detailed tables (OAS, 2007) present estimates of treatment for MDE but do not present any estimates of MDE with role impairment using the SDS. However, estimates of MDE with role impairment using the SDS (MDEIMPA=1 for adults and MDEIMPY=1 for youths) for 2006 and 2007 are included in the 2007 detailed tables (OAS, 2008). The 2006 and 2007 adult MDE with severe impairment data are not comparable with 2008 and later years for the reason discussed previously. Youth MDE with severe impairment data are comparable from 2006 onward. Estimates for role impairment were calculated separately for youths and adults because the four domains are slightly different for the two groups. The questions pertaining to the four domains are listed below for both adults and youths.

Adult Depression Module: Functional Impairment

AD66a Think about the time in the past 12 months when these problems with your mood were **most severe**.

Using the 0 to 10 scale shown below, where 0 means **no** interference and 10 means very **severe** interference, select the number that describes how much these problems interfered with each of the following activities during that period. You can use any number between 0 and 10 to answer. If this activity doesn't apply to you, type 95.

How much did your [depression symptoms] interfere with your home management, like cleaning, shopping, and working around the house, apartment, or yard?

AD66b During the time in the past 12 months when your [depression symptoms] were most severe, how much did this interfere with your ability to work?

AD66c How much did your [depression symptoms] interfere with your ability to form and maintain **close** relationships with other people during that period of time?

AD66d How much did [depression symptoms] interfere with your social life during that period of time?

Adolescent Depression Module: Functional Impairment

YD66a Think about the time in the past 12 months when these problems with your mood were the **worst**.

Using the 0 to 10 scale shown below, where 0 means **no** problems and 10 means very **severe** problems, select the number that describes how much your [depression symptoms] caused problems with each of the following activities during that time. You can use any number between 0 and 10 to answer. If this activity doesn't apply to you, type 95.

How much did your [depression symptoms] cause problems with your chores at home?

YD66b During the time in the past 12 months when your [depression symptoms] were worst, how much did this cause problems with your ability to do well at school or work?

YD66c How much did your [depression symptoms] cause problems with your ability to get along with your family during that time?

YD66d How much did your [depression symptoms] cause problems with your social life during that time?

18	Protective Service Occupations First-Line Supervisors/Managers of Correctional Officers First-Line Supervisors/Managers of Police and Detectives First-Line Supervisors/Managers of Fire Fighting and Prevention Workers Supervisors, Protective Service Workers, All Other Fire Fighters Fire Inspectors Bailiffs, Correctional Officers, and Jailers Detectives and Criminal Investigators Fish and Game Wardens Parking Enforcement Workers Police and Sheriff's Patrol Officers Transit and Railroad Police

2003 Census Code	Occupation category
	Animal Control Workers Private Detectives and Investigators Security Guards and Gaming Surveillance Officers Crossing Guards Lifeguards and Other Protective Service Workers
19	Food Preparation and Serving Related Occupations Chefs and Head Cooks First-Line Supervisors/Managers of Food Preparation and Serving Workers Cooks Food Preparation Workers Bartenders Combined Food Preparation and Serving Workers, Including Fast Food Counter Attendants, Cafeteria, Food Concession, and Coffee Shop Waiters and Waitresses Food Servers, Nonrestaurant Dining Room and Cafeteria Attendants and Bartender Helpers Dishwashers Hosts and Hostesses, Restaurant, Lounge, and Coffee Shop Food Preparation and Serving Related Workers, All Other
20	Cleaning and Building Service Occupations First-Line Supervisors/Managers of Housekeeping and Janitorial Workers First-Line Supervisors/Managers of Landscaping, Lawn Service, and Groundskeeping Janitors and Building Cleaners Maids and Housekeeping Cleaners Pest Control Workers Grounds Maintenance Workers
21	Entertainment Attendants and Related Workers First-Line Supervisors/Managers of Gaming Workers First-Line Supervisors/Managers of Personal Service Workers Animal Trainers Nonfarm Animal Caretakers Gaming Services Workers Motion Picture Projectionists Ushers, Lobby Attendants, and Ticket Takers Miscellaneous Entertainment Attendants and Related Workers
22	Funeral Related Occupations and Personal Care and Service Workers Funeral Service Workers Barbers Hairdressers, Hairstylists, and Cosmetologists Miscellaneous Personal Appearance Workers Baggage Porters, Bellhops, and Concierges Tour and Travel Guides Transportation Attendants Child Care Workers Personal and Home Care Aides Recreation and Fitness Workers Residential Advisors Personal Care and Service Workers, All Other

2003 Census Code	Occupation category
23	Sales and Related Workers First-Line Supervisors/Managers of Retail Sales Workers First-Line Supervisors/Managers of Non-Retail Sales Workers Cashiers Counter and Rental Clerks Parts Salespersons Retail Salespersons Advertising Sales Agents Insurance Sales Agents Securities, Commodities, and Financial Services Sales Agents Travel Agents Sales Representatives, Services, All Other Sales Representatives, Wholesale and Manufacturing Models, Demonstrators, and Product Promoters Real Estate Brokers and Sales Agents Sales Engineers Telemarketers Door-To-Door Sales Workers, News and Street Vendors, and Related Workers Sales and Related Workers, All Other
24	Office and Administrative Support Workers (5000-5930) First-Line Supervisors/Managers of Office and Administrative Support Workers Switchboard Operators, Including Answering Service Telephone Operators Communications Equipment Operators, All Other Bill and Account Collectors Billing and Posting Clerks and Machine Operators Bookkeeping, Accounting, and Auditing Clerks Gaming Cage Workers Payroll and Timekeeping Clerks Procurement Clerks Tellers Brokerage Clerks Correspondence Clerks Court, Municipal, and License Clerks Credit Authorizers, Checkers, and Clerks Customer Service Representatives Eligibility Interviewers, Government Programs File Clerks Hotel, Motel, and Resort Desk Clerks Interviewers, Except Eligibility and Loan Library Assistants, Clerical Loan Interviewers and Clerks New Accounts Clerks Order Clerks Human Resources Assistants, Except Payroll and Timekeeping Receptionists and Information Clerks Reservation and Transportation Ticket Agents and Travel Clerks Information and Record Clerks, All Other Cargo and Freight Agents Couriers and Messengers Dispatchers Meter Readers, Utilities Postal Service Clerks Postal Service Mail Carriers

2003 Census Code **Occupation category**

Postal Service Mail Sorters, Processors, and Processing Machine Operators
 Production, Planning, and Expediting Clerks
 Shipping, Receiving, and Traffic Clerks
 Stock Clerks and Order Fillers
 Weighers, Measurers, Checkers, and Samplers, Recordkeeping
 Secretaries and Administrative Assistants
 Computer Operators
 Data Entry Keyers
 Word Processors and Typists
 Desktop Publishers
 Insurance Claims and Policy Processing Clerks
 Mail Clerks and Mail Machine Operators, Except Postal Service
 Office Clerks, General
 Office Machine Operators, Except Computer
 Proofreaders and Copy Markers
 Statistical Assistants
 Office and Administrative Support Workers, All Other

25 Farming, Fishing, and Forestry Occupations (6000-6130)

First-Line Supervisors/Managers/Contractors of Farming, Fishing, and Forestry Workers
 Agricultural Inspectors
 Animal Breeders
 Graders and Sorters, Agricultural Products
 Other Agricultural Workers
 Fishers and Related Fishing Workers
 Hunters and Trappers
 Forest and Conservation Workers
 Logging Workers

26 Construction Trades and Extraction Workers (6200-6940)

First-Line Supervisor/Managers of Construction Trades and Extraction Workers
 Boilermakers
 Brickmasons, Blockmasons, and Stonemasons
 Carpenters
 Carpet, Floor, and Tile Installers and Finishers
 Cement Masons, Concrete Finishers, and Terrazzo Workers
 Construction Laborers
 Paving, Surfacing, and Tamping Equipment Operations
 Pile-Driver Operators
 Operating Engineers and Other Construction Equipment Operators
 Drywall Installers, Ceiling Tile Installers, and Tapers
 Electricians
 Glaziers
 Insulation Workers
 Painters, Construction and Maintenance
 Paperhangers
 Pipelayers, Plumbers, Pipefitters, and Steamfitters
 Plasterers and Stucco Masons
 Reinforcing Iron and Rebar Workers
 Roofers
 Sheet Metal Workers
 Structural Iron and Steel Workers
 Helpers, Construction Trades
 Construction and Building Inspectors

2003 Census Code **Occupation category**

Elevator Installers and Repairers
 Fence Erectors
 Hazardous Materials Removal Workers
 Highway Maintenance Workers
 Rail-Track Laying and Maintenance Equipment Operators
 Septic Tank Servicers and Sewer Pipe Cleaners
 Miscellaneous Constructions and Related Workers
 Derrick, Rotary Drill, and Service Unit Operators, Oil, Gas, and Mining
 Earth Drillers, Except Oil and Gas
 Explosives Workers, Ordnance Handling Experts, and Blasters
 Mining Machine Operators
 Roof Bolters, Mining
 Roustabouts, Oil and Gas
 Helpers – Extraction Workers
 Other Extraction Workers

27 Installation, Maintenance, and Repair's Workers

First-Line Supervisors/Managers of Mechanics, Installers, and Repairers
 Computer, Automated Teller, and Office Machine Repairers
 Radio and Telecommunications Equipment Installers and Repairers
 Avionics Technicians
 Electric Motor, Power Tool, and Related Repairers
 Electrical and Electronics Installers and Repairers, Transportation Equipment
 Electrical and Electronics Repairers, Industrial and Utility
 Electronic Equipment Installers and Repairers, Motor Vehicles
 Electronic Home Entertainment Equipment Installers and Repairers
 Security and Fire Alarm Systems Installers
 Aircraft Mechanics and Service Technicians
 Automotive Body and Related Repairers
 Automotive Glass Installers and Repairers
 Automotive Service Technicians and Mechanics
 Bus and Truck Mechanics and Diesel Engine Specialists
 Heavy Vehicle and Mobile Equipment Service Technicians and Mechanics
 Small Engine Mechanics
 Miscellaneous Vehicle and Mobile Equipment Mechanics, Installers, and Repairers
 Control and Valve Installers and Repairers
 Heating, Air Conditioning, and Refrigeration Mechanics and Installers
 Home Appliance Repairers
 Industrial and Refractory Machinery Mechanics
 Maintenance and Repair Workers, General
 Maintenance Workers, Machinery
 Millwrights
 Electrical Power-Line Installers and Repairers
 Telecommunications Line Installers and Repairers
 Precision Instrument and Equipment Repairers
 Coin, Vending, and Amusement Machine Servicers and Repairers
 Commercial Divers
 Locksmiths and Safe Repairers
 Manufactured Building and Mobile Home Installers
 Riggers
 Signal and Track Switch Repairers

APPENDIX I

Key Mental Health Variables

This Key Mental Health Variables appendix provides several tables that list a set of the most commonly used mental health measures, their associated variable names, and their availability from 2002 to 2016 for the National Survey on Drug Use and Health (NSDUH). These tables also show whether there are comparable or adjusted measures available for the years indicated. Table 1 lists key mental health measures for youths aged 12 to 17, Table 2 lists key mental health measures for adults aged 18 or older, and Table 3 lists the mental health measures that have adjusted versions that allow for the comparisons of estimates across the years where changes were made. Because of such changes, this appendix is being provided as a guide in helping users with these commonly used mental health variables.

As noted above, this appendix only contains a subset of the mental health variables available. Groups of variables that are defined similarly may not all be included in the tables below. Examples of these groups are the variables for location of outpatient mental health treatment and the reason for not receiving mental health treatment, which are listed in Table 2. The variables for location where outpatient mental health treatment was received such as at a day hospital or treatment program (MHLDTMT3), at a school setting (MHLSCHL3), and other locations (MHLOTH3) are not specifically listed in Table 2 but are defined similarly to the variable for received outpatient mental health treatment from private therapist (MHLTHER3) and follow the same pattern of comparability. The variables for reasons for not receiving mental health treatment including fear of negative affect on job (MHRJOBS2), insurance does not cover treatment at all (MHRNCOV2), have no transportation to treatment or inconvenient (MHRTRAN2), and did not want others to find out (MHRFOUT2) are also not listed in Table 2 but follow the same comparability pattern as the variable for reason for not receiving mental health treatment because could not afford cost (MHRCOST2). This appendix is intended to be a guide to assist analysts in their use of mental health measures and does not include a full list of all mental health measures that are available.

There have been several mental health-related questionnaire and estimation changes that impact the comparability of mental health data over time. One such change made to the 2004 and 2008 questionnaires affected the mental health measures of serious psychological distress (SPD) and lifetime and past year major depressive episode (MDE). These changes resulted in noncomparable measures that caused breaks in the trends. Adjusted measures were created that allowed comparisons of estimates across the years where the changes were made. Refer to Aldworth, Kott, Yu, Mosquin, and Barnett-Walker (2012) for details on the adjusted measures, Appendix F, Recoded Depression Variable Documentation, for MDE details, and Appendix E, Recoded Mental Health, for SPD details.

The NSDUH operational definition of serious mental illness (SMI) has also undergone some changes. In previously published 2002-2003 NSDUH reports, the K6 scale used for determining psychological distress was used to produce estimates that were termed "SMI," but in 2004, the estimate produced using the K6 was renamed "SPD." Starting in 2008, a new measure of SMI was produced that used a statistical model to predict mental illness based on a respondent's answers to the NSDUH K6 and World Health Organization Disability Assessment Schedule (WHODAS) questions. For more details on this new SMI measure, see Appendix B, Section B.4.3, in the 2009 mental health findings report (Center for Behavioral Health Statistics and Quality, 2010). This model was revised to produce improved mental illness estimates

starting with the 2012 NSDUH. This updated 2012 model was then used to create revised comparable mental illness estimates for 2008 through 2011. For details on these mental illness revisions, see Appendix B, Section B.4.3, in the 2012 mental health findings report (Center for Behavioral Health Statistics and Quality, 2013). Because of this change, mental illness variables based on the 2012 model have been created from 2008 and later years. A measure of SMI was created for the 2005-2007 NSDUHs based on an alternative predictive model for a methodological report (Center for Behavioral Health Statistics and Quality, 2017). This exploratory SMI measure was developed in an attempt to be comparable with SMI variables for 2008 and later NSDUHs; however, it is based on a different set of predictors. Users should consider the differences in methodology prior to making decisions on whether and how to use the SMI measure. For more information on how mental illness variables were created and how to use these variables, see Appendix E, Recoded Mental Health.

Table 1. Key Mental Health Measures for People Aged 12 to 17: 2002-2016

Mental Health Measure (Variable Name)	Years Available														
	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
Lifetime MDE (MDEL, YMDEL)			*	*	*	*	X	X	X	X	X	X	X	X	X
Past Year MDE (MDEYR, YMDEYR)			*	*	*	*	X	X	X	X	X	X	X	X	X
MDE with Severe Role Impairment (MDEIMPY)					X	X	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from MD in Past Year (TXMDEYR, YTXMDEYR)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Prescription Drugs in Past Year (RXMDEYR, YRXMDEYR)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Either MD or Prescription Drugs in Past Year (MDETXRX, YMDETXRX)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Health Professional in Past Year (YHLTMDE) ¹			X	X	X	X	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Alternative Service Professional in Past Year (YALTMDE)									X	X	X	X	X	X	X
Received Treatment for MDE from Health Professional or Prescription Drugs in Past Year (YMDEHPRX) ¹			X	X	X	X	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Health Professional Only in Past Year (YMDEHPO) ¹			X	X	X	X	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Prescription Drugs Only, Not from Health Professional in Past Year (YMDERXO2) ¹			X	X	X	X	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Health Professional and Prescription Drugs in Past Year (YMDEHARX) ¹			X	X	X	X	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from General Practitioner (DOCMDE, YDOCMDE)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Other MD (OMDMDE, YOMDMDE)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Psychologist (PSY1MDE, YPSY1MDE)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Psychiatrist (PSY2MDE, YPSY2MDE)			*	*	*	*	X	X	X	X	X	X	X	X	X

Table 1. Key Mental Health Measures for People Aged 12 to 17: 2002-2016 (continued)

Mental Health Measure (Variable Name)	Years Available														
	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
Received Treatment for MDE from Social Worker (SOCMDE, YSOCMDE)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Counselor (COUNMDE, YCOUNMDE)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Other MH Professional (OMHMDE, YOMHMDE)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Nurse/Occupational Therapist (NURSMDE, YNURSMDE)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Religious or Spiritual Advisor (RELMDE, YRELMDE)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Another Healer (HBCHMDE, YHBCHMDE)			*	*	*	*	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Other Professional (OTHMDE, YOTHMDE)			*	*	*	*	X	X	X	X	X	X	X	X	X
(Revised) Received Treatment in Inpatient Specialty MH Setting (ANYMHIN2) ^{2,3}	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X

Received Treatment in Specialty MH, Education, Medical, or Foster Care Setting (ANYSEDMF)								X	X	X	X	X	X	X	X
Received Treatment in General Medical Setting (YPED)	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X
Received Treatment in Juvenile Justice Setting (YJAIL)								X	X	X	X	X	X	X	X
Number of Visits for Inpatient Specialty MH Services (SPINVST, SPINVST2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Number of Visits for Outpatient Specialty MH Services (SPOUTVST)					X	X	X	X	X	X	X	X	X	X	X

Table 1. Key Mental Health Measures for People Aged 12 to 17: 2002-2016 (continued)

Mental Health Measure (Variable Name)	Years Available														
	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
Number of Visits for Specialty MH Services (SMHVST, SMHVST2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services for Feeling Depressed (SMHDPR, SMHDPR2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services because of Problems with Home or Family (SMHFMLY, SMHFMLY2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services because of Breaking Rules (SMHBRK, SMHBRK2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services because Thought about or Attempted Suicide (SMHSUI, SMHSUI2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services because Felt Very Afraid and Tense (SMHFEA, SMHFEA2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services because of Problems at School (SMHSCHL, SMHSCHL2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services because of Trouble Controlling Anger (SMHANGR, SMHANGR2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services because of Problems with Friends (SMHFRND, SMHFRND2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services because of Problems with Other People (SMHOTPP, SMHOTPP2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services because of Eating Problems (SMHEAT, SMHEAT2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services because of Getting into Physical Fights (SMHFITE, SMHFITE2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received Specialty MH Services because of Diagnosed Mental Disorder (SMHMEND, SMHMEND2) ^{2,4}					-	-	-	-	-	-	X ⁵	X	X	X	X
Received MH Services or Substance Use Treatment at a Specialty Facility (YMHOSPTX) ⁶														X	X
Received MH Services but Not Substance Use Treatment at a Specialty Facility (YMHNSPTX) ⁶														X	X

Table 1. Key Mental Health Measures for People Aged 12 to 17: 2002-2016 (continued)

Mental Health Measure (Variable Name)	Years Available															
	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	
Received Substance Use Treatment at a Specialty Facility but No MH Service (YSPTXNMH) ⁶															X	X
Received MH Services and Substance Use Treatment at a Specialty Facility (YMHASPTX) ⁶															X	X

MD = medical doctor, MDE = major depressive episode, MH = mental health.

NOTE: The letter X indicates that the measure is available for the year(s) shown. For measures with two variable names listed, the first name corresponds with either the asterisk (*) or the en dash (–) and the second name corresponds to the letter X in the years available columns. An asterisk (*) indicates that a comparable measure with 2008 and later years is available for the year(s) shown; thus, variables corresponding to those measures in the indicated years can be renamed to conduct analyses with the 2008 and later year variables. An en dash (–) indicates that a comparable measure with later years is **not** available; thus, variables corresponding to those measures should not be compared across breaks in comparability (i.e., do not compare those measures with an en dash (–) with those measures with the letter X). An empty cell indicates that the measure is not available.

NOTE: The standard analysis weight, ANALWT_C, should be used for all measures and years.

NOTE: This table lists only the most commonly used mental health measures; it does not constitute a comprehensive list.

NOTE: This table was finalized on June 19, 2017.

¹ These variables were created for years prior to 2010 during the 2014 NSDUH and are comparable with 2010 and later variables.

² Revised mental health service variables were developed starting in 2013 because of the change in how the child welfare setting was defined. Prior to 2013, child welfare was defined in the specialty services category as an inpatient service. Child welfare is now defined as a nonspecialty service.

³ A similarly named measure (without the “2”) exist for years 2002 through 2013 but are no longer being created starting with the 2014 NSDUH.

⁴ For measures with two variable names listed, the second-named variables include this change. The original measures (first-named variables) are no longer being created starting with the 2013 NSDUH but are instead replaced with the revised variables.

⁵ Both versions of these mental health service variables exist for the 2012 NSDUH because 2012 and 2013 estimates are presented in the 2013 mental health detailed tables (Center for Behavioral Health Statistics and Quality, 2014). The first- and second-named variables are **not** comparable for 2012.

⁶ These variables were created during the 2015 NSDUH. Note that these were not included in data files for years prior to 2015 due to substance treatment at a specialty facility not being comparable as a result of the 2015 questionnaire changes.

Source: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2002-2016.

Table 2. Key Mental Health Measures for People Aged 18 or Older: 2002-2016

Mental Health Measure (Variable Name)	Years Available														
	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
Received Treatment for MDE from MD in Past Year (TXMDEYR, ATXMDEYR) ¹			-	-	-	-	X	X	X	X	X	X	X	X	X
Received Treatment for MDE from Prescription Drugs in Past Year (RXMDEYR, ARXMDEYR) ¹			-	-	-	-	X	X	X	X	X	X	X	X	X

Moderate Mental Illness Based on Revised Predicted SMI Probability (MMIYR_U) ^{7,8}							X	X	X	X	X	X	X	X	X
Mild or Moderate Mental Illness Based on Revised Predicted SMI Probability (LMMIYRU) ^{8,9}							X	X	X	X	X	X	X	X	X

Table 2. Key Mental Health Measures for People Aged 18 or Older: 2002-2016 (continued)

Mental Health Measure (Variable Name)	Years Available														
	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
Serious or Moderate Mental Illness Based on Revised Predicted SMI Probability(SMMIYR_U) ^{6,7,8}							X	X	X	X	X	X	X	X	X
Categorical Mental Illness Indicator Revised (MI_CAT_U) ^{7,8}							X	X	X	X	X	X	X	X	X

K6 = six-item nonspecific psychological distress scale, MD = medical doctor, MDE = major depressive episode, MH = mental health, WHODAS = abbreviated eight-item World Health Organization Disability Assessment Schedule.

NOTE: The letter X indicates that the measure is available for the year(s) shown. For measures with two variable names listed, the first name corresponds with either the asterisk (*) or the en dash (-) and the second name corresponds to the letter X in the years available columns. An asterisk (*) indicates that a comparable measure with later years is available for the year(s) shown; thus, variables corresponding to those measures in the indicated years can be renamed to conduct analyses with the later year variables. An en dash (-) indicates that a comparable measure with later years is **not** available; thus, variables corresponding to those measures should not be compared across breaks in comparability (i.e., do not compare those measures with an en dash (-) with those measures with the letter X). An empty cell indicates that the measure is not available.

NOTE: The standard analysis weight, ANALWT_C, should be used for all measures and years, except those noted in footnote 1.

NOTE: This table lists only the most commonly used mental health measures; it does not constitute a comprehensive list.

NOTE: This table was finalized on October 23, 2017.

¹ To compare the 2008 data with the 2009 or subsequent years, the 2008 mental health half-sample analysis weight, MHSAWT_C, should be used in conjunction with the sample indicator (MHSAMP08=1) to subset to the 2008 WHODAS half-sample data.

² Two versions of these variables exist for years 2002 through 2008. The original variables that end with a "2" have respondents who reported receiving no outpatient mental health coded as a SAS missing. The revised variables that end with a "3" have respondents who reported receiving no outpatient mental health coded as a "No" response. The two versions are not comparable.

³ These variables were created during the 2015 NSDUH. Note that these are not comparable for years prior to 2015 due to substance treatment at a specialty facility not being comparable as a result of the 2015 questionnaire changes.

⁴ Italicized MH measures indicate variables that were excluded from the Public Use File (PUF).

⁵ The variables SMIPP_A and SMIYR_A were created for the 2005-2007 NSDUHs based on an alternative predictive model for a methodological report (Center for Behavioral Health Statistics and Quality, 2017). These exploratory variables were developed in an attempt to be comparable with SMI variables for 2008 and later NSDUHs; however, they are based on a different set of predictors. Users should consider the differences in methodology prior to making decisions on whether and how to use the SMI measure. For information on the creation of the mental illness variables, see Appendix E, Recoded Mental Health.

⁶ SMIPP (a variable included in previous versions of the 2008-2011 data files) is based on the 2008 prediction model and SMIPP_U is based on the 2012 prediction model. Mental illness variables originally created from SMIPP have been replaced with similarly named variables based on SMIPP_U. For information on the creation of the mental illness variables, see Appendix E, Recoded Mental Health.

⁷ Mental illness variables based on the 2012 prediction model have been created from 2008 and later years. For years 2008-2011, these revised variables have replaced the previously available mental illness variables. See Appendix E, Recoded Mental Health, for further details about these revised mental illness variables.

⁸ The 2008 and later years mental illness variables based on the 2012 prediction model and the 2005-2007 SMI variables based on an alternative model should not be used when analyzing variables for past year suicidal thoughts, past year MDE, the K6, or the WHODAS, nor should they be used when analyzing other variables closely linked with these variables (including past year suicide attempts, suicide plans, medical treatment for suicide attempts, lifetime MDE, serious psychological distress [SPD], or components used in the K6 or WHODAS scales). For more details, see Appendix E, Recoded Mental Health.

⁹ Mild or Moderate Mental Illness is referred to as "AMI excluding SMI" in the detailed tables.

Table 3. Comparable Versions of Key Mental Health Measures for People Aged 18 or Older: 2002-2016

Mental Health Measure	Years Available				
	2002-2003	2004	2005-2007	2008	2009-2016
Lifetime Major Depressive Episode			AJAMDELT	AJAMDELT	AMDELT
Past Year Major Depressive Episode			AJAMDEYR	AJAMDEYR	AMDEYR
K6 Total Score in Worst Month of Past Year Based on Long Form Module	SMI_SUM	SPD_ASCR			
K6 Total Score in Worst Month of Past Year Based on Short Form Module		SPD_RSCR	SPD_USCR		
Worst K6 Total Score in Past Year ¹			K6SMXADJ	K6SCMAX	K6SCMAX
Past Year Serious Psychological Distress Indicator Based on Long Form Module	SMI	SPD_ADJ, SPD_UADJ ²			
Past Year Serious Psychological Distress Indicator Based on Short Form Module		SPD_RADJ	SPD_UADJ		
Past Year Serious Psychological Distress Indicator Based on Worst K6 Total Score			SPDYRADJ	SPDYR	SPDYR

K6 = six-item nonspecific psychological distress scale.

NOTE: All variables within a row are comparable across the years indicated, even if they have different names.

NOTE: The standard analysis weight, ANALWT_C, should be used for all measures and years, except as indicated in footnote 2 below.

NOTE: This table lists only the mental health measures with adjusted versions for comparability across years.

NOTE: In the 2002 and 2003 NSDUHs, serious psychological distress was referred to as serious mental illness.

NOTE: This table was finalized on June 19, 2017.

¹ Worst K6 Total Score in Past Year is the maximum of K6 Total Score in Past Month (K6SCMON) and K6 Total Score in Worst Month of Past Year (K6SCYR).

² SPD_UADJ, restricted to the 2004 Sample A (Long Form), was used in the 2004 NSDUH detailed tables (Office of Applied Studies, 2005). SPD_ADJ was created so that comparisons of serious psychological distress based on the long form can be made between 2002, 2003, and the full 2004 sample. The standard analysis weight, ANALWT_C, should be used for SPD_ADJ, but for SPD_UADJ in 2004, the Sample A analysis weight, SPDWT_C, should be used in conjunction with the sample indicator that subsets to the 2004 Sample A data (ADLTSAMP=1).
