APPENDIX A: ORIGINAL CODEBOOK

NATIONAL YOUTH SURVEY [UNITED STATES]: WAVE V, 1980

PLEASE NOTE: See the codebook which begins on page 3 for the
appropriate column locations for the data.

The variable names in the re-formatted codebook,
(the codebook which begins on page 3), have been
assigned sequentially, (i.e., V1, V2, ..., VN).
For matching purposes, the variable labels in the
re-formatted codebook include the original variable
names (i.e., Y5-1, Y5-2, ..., Y5-N).

* Cautionary note: Extreme caution should be exercised in the use of the
Principal Wage Earner's Occupation, Education, and Hollingshead two factor
score, especially in conjunction with similar Wave 1 data that were obtai-
ned from the parents of respondents. Changes in family structure, different
referent person, and so on, do not allow these to be compared with Wave 1
data. They also may not correctly reflect family SES indicators in 1980.

* It is possible to have a code of yes to #24 and a grade completion code
but no additional school information. This pattern may occur with split
living situations in which the respondent lived in one setting for most of
the year and was not in school there. Our intent is to have all involvement
and importance measures cover the same time period and setting.

ASPIRATIONS/CURRENT SUCCESS - Questionnaire items 84 through 107 ask respondents about a variety of social, family, and educational goals. Each question consists of 2 parts. The first asks how important each goal is to the respondent; the second asks how well s/he is doing at that goal. For scaling, items are scored so that a higher score reflects greater importance and greater success.

     SELF-REPORTED DELINQUENCY FOLLOW-UP QUESTIONS: Questionnaire
items 288b, 290b, 291b, 294b, 298b, 299b, 302b, 308b, 309b, 316b,
320b, 321b, 323b, 326b, 327b and 328b ask respondents a supplementary
set of questions to describe the most recent instance of each
behavior which they have reported to have engaged in one or more
times during the previous year. Based on the supplementary
information, the nature of the most recent incident reported was
classified as inappropriate (behavior that did not fall into the
offense category), appropriate but trivial (behavior was so trivial
that official action would NOT have resulted), or appropriate and
serious.

Frequencies and rates for ALL self-reported delinquency items (285a
through 336a) are recorded on cards 9, 10, 11 and 12.

SELF-REPORTED DELINQUENCY - Questionnaire items 285a through 336a ask
respondents to report the frequency with which they engaged in each of a
variety of behaviors (both deviant and positive social behaviors) during
the previous year. Each question consists of two parts. The first asks for
an absolute frequency of each behavior; the second asks for an estimate of
the rate of occurrence of the behavior on a 6-point scale for initial
responses indicating a frequency of 10 or more. When the frequency scores
are less than 10, the rate scores 1, 2, 3 result from a fixed scoring rule
from the frequency response. Items are scored so that a higher score
reflects greater frequency or rate of involvement in each behavior.

     DRUG OR ALCOHOL USE - Questionnaire items 343 through 357 ask
respondents about a number of substances they may have used in the
past year.  For each substance used one or more times, the respondent
is asked for an estimate of the rate of use on an 8-point scale.  If
the respondent volunteered a comment that use was limited to a short
period of time during the reference year, an episodic usage code was
included.
